Professional Experience

Associate Developer

Apr 2017 - Present

Urban Science Applications, Inc.

Long Beach, CA

- Maintained and supported existing web applications, including troubleshooting and debugging application errors.
- Developed SQL stored procedures used to improve efficiency and provide data validation for internal clients.
- Collaborated with Analysts to identify bugs, process improvements, and implement new features to existing web applications and provide estimates for overall development.
- Designed, developed and deployed new application components using .NET/C# and internal frameworks (including technical documentation and participation in code reviews).
- Tested new application features, including identification of possible user actions and potential problems with current design and functionality.
- Resolved tasks and bugs under time estimated by Manager and Senior Developer

Full Stack .NET Developer

Sep 2017- Apr 2017

Bringpro

Irvine, CA

- Collaborated with a team of 10 developers to build a minimum viable product implementing a Single Page Application design with AngularJS and ASP.NET MVC 5.
- Utilized Visual Studio 2015, SQL Server Management Studio, Team Foundation Server, Chrome Developer tools, MVC 5, Web API 2.0, JSON Serialization, AJAX, Bootstrap 3.0, CSS3, C#, T-SQL.
- Created an image storage service using DropzoneJS, AWS SDK for .NET, and Amazon S3 API.
- Followed an Agile development process by driving weekly demonstrations and discussions with client, daily standups and using TFS to manage shared codebase and perform continuous integration builds.
- Implemented Braintree for credit card management and job billing services.
- Built a Web API to receive webhooks, deserialize JSON, and store data in database.
- Integrated SignalR and Toastr to send job and user activity notifications to administrators.

Accountant

Dec 2012-Jan 2017

CBRE, Inc

El Segundo, CA

- Prepared month end accruals for employee expense reports and corporate costs totaling over \$20 million.
- Set up amortization schedules for deferred financing costs for senior notes totaling over \$2 billion and booked monthly amortization.
- Utilized Excel to create a P&L schedule to track M&A integration costs for several acquisitions.
- Assisted with the month end close process, recording journal entries, reviewing general ledger transactions, P&L variance and balance sheet analysis.

Education

University of California, Los Angeles

Sep 2009

Bachelor of Arts, Economics
