Internet/Intranet Tools	MS-Front Page, Flash, DreamWeaver, SharePoint, Salesforce.com
Documentation Tools	MS-Word, MS-Excel, MS-Power Point
Packages	Adobe Photoshop, MS Project, MS Visio, MS Office, SOAP UI
Other	SQL, MS Access, Rational Unified Process (RUP), Rapid Application Development (RAD), Joint Application Development (JAD), SDLC

EXPERIENCE

Bridge2Solutions

Apr 2014 – Present

Product Owner/Business Analyst

Alpharetta, GA

1. Extensively used agile methodologies (user stories, JIRA, scrum, etc.) in gathering, documenting, prioritizing requirements and authored detailed functional specifications.
2. Worked with major financial institutions on multiple initiatives involving new products, integration, compliance and maintenance related projects.
3. Served internally as the voice of customer in working with Program/Project Management, Development, Infrastructure and Quality Assurance.
4. Involved in all phases of the SDLC: initial requirement gathering, estimation, scope sign-off, development, testing, implementation and maintenance.
5. On boarded and mentored fellow Business Analysts.

Contract Business Analyst

Nov 2011 – Apr 2014

Clients include RouteOne Inc., Ford Motor Company

Detroit, MI

1. Helped in gathering requirements, prioritizing, testing and project coordination of a mainframe purchasing system, contracting system and related mobile applications.
2. Gathered and reviewed business requirement meetings from customers based across varied geographic locations.
3. Conducted defect review meetings that included personnel from both business and development.
4. Helped in prioritizing defects based on resources/effort/business impact.
5. Interacted with offshore test team and answered any requirement related queries.
6. Assisted project manager with release planning activities, testing team with test scenario review and questions related to requirements.
7. Created help/user guides for new service offerings, requirement specification documents.
8. Worked on mobile application development and deployment.

Silverpop Systems

July 2010 – Nov 2011

Business Systems Analyst

Atlanta, GA

1. Handled multiple systems/project for customer service, finance, training and ticketing departments and helped with requirements gathering, testing and deployment.
2. Led and implemented a Learning Management System starting from the initial business case development.
3. Created roadmaps for supporting system per the company's business strategy and prioritized projects accordingly.
4. Met with various departmental directors in coming up with a roadmap that was based on company's business strategy.
5. Assisted project managers/ directors with business case development which was then presented to Sr.VPs.

Razorfish LLC

August 2007 – July 2010

Business Analyst

Atlanta, GA

1. Created surveys and documented responses (in SharePoint) to elicit business requirements and other business related information.
2. Worked with both Management and non-Management sources to understand the current business processes (and problems) and the future vision.
3. Documented current business processes through process flows with focus to determine related improvements.
4. Presented business findings to Management and helped them prioritize in implementing related features.
5. Authored functional specifications for existing applications identified for technology migrations.
6. Conducted meetings to elicit requirements and conveyed those requirements to the project team.
7. Performed competitive analysis to recommend possible features for implementation.

8. Developed features/functions matrix and assisted with their prioritization.
9. Authored detailed functional specifications based on wireframes and other creative design documents.
10. Authored the testing strategy document that includes various types of testing, timelines, processes and other testing related details.
11. Authored the test plan and the associated test scripts for verifying proposed functionality.
12. Reviewed functional specifications, wireframes, design documents to come up with various testing related documents.
13. Gathered requirements for product launches, micro sites, product information and other marketing related activities.

Esystems Inc

Mar 2006 – August 2007

Curam Business Analyst

Vancouver, Canada

1. Gathered Business Requirements, analyzed data/workflows, and documented the scope.
2. Developed prototype of new information processing application. Met with client groups to determine User Requirements and Goals, thus converting User Requirements into Business Requirements and User and Functional Requirement Specification.
3. Documented all operational and technical flows using MS Visio and created the Business Architecture document to provide an overview of different aspects of the application.
4. Documented how business goals were reflected in the requirements.
5. Involved in development and documentation of Business and Technical Requirements in preparation of Design and Functional Specifications for Business Needs and Processes.
6. Followed the UML based methods using Rational Rose/MS Visio to create Use Case Diagrams, Activity Diagrams, State Chart Diagrams, Sequence Diagrams, and Collaboration Diagrams
7. Prepared Business Process Models that includes modeling of all the activities of business from conceptual to procedural level.
8. Coordinated work plan between project manager and client with MS Project.

EarthLink, Inc

Atlanta, GA

Systems Analyst

Jan 2004 – Mar 2006

1. Coordinated and controlled the distribution and implementation of code changes across various environments.
2. Liaison between the users and the different teams involved in the application development for the better understanding of the business and IT processes.
3. Reviewed change requests for completeness and absence of error prior to submittal for change.
4. Developed scorecards and various reports to measure failure rates, types of releases and other release related information.
5. Assisted in training of new software release management staff and software developers on use of tools, systems, processes and procedures.
6. Documented & Implemented procedures to conform code releases to SOX (Sarbanes Oxley) requirements.

Université de Nantes

Nantes, France

Student Tutor

Sep 2003-Dec 2003

1. Tutored 135 students during the semester in MS Office and other related technologies.
2. Helped student understand the material and aided them in writing the final report.
3. Graded students work and responded to students questions.

Total Benefit Communications (TBC)

Atlanta, Georgia

Business Analyst Intern

Jan 2002 – Apr 2002

1. Conducted research and pricing analysis on company and competitor products/promotions.
2. Served as a liaison between software vendor and Senior Management as part of the project development team.
3. Prepared strategic business plan in relation to future expansion plans for the CEO.
4. Design and manage procedures to cross reference solution elements to the requirements
5. Utilized business and technical tools to develop business, financial, and system requirements analyses with supporting variance reports, current and target business process flows, traceability matrices, and front-end prototypes.

Georgia-Pacific Corporation
Technical Analyst Intern

Atlanta, Georgia
Feb 2001- Aug 2001

1. Responsible for upgrades, software and hardware roll outs as per the client requirement.
2. Provided desk side support for over 200 clients in the HR department that involved the use of Customer Relationship Management software.
3. Assisted with testing new software upgrades before rolling out to employees.
4. Responsible for documenting, answering and providing first level support services
5. Documented workflow according to RUP specifications and adhering to UML standards.

NCR Inc.
Quality Assurance Intern

Duluth, Georgia
Feb 2000 - Aug 2000

1. Improvised various testing methods on a Point Of Sale (POS) Application that required periodic testing after each build
2. Prepare test plans for Point Of Sale (POS) Applications
3. Review and evaluate project deliverables to ensure they conform to quality standards
4. Tracked errors and bugs to maximize code performance using computer based tracking system resulting in 25% code efficiency.
5. Conduct product releases according to Standard Operating Procedures and client work instructions.

EDUCATION

GEORGIA STATE UNIVERSITY, Atlanta, GA
 MS in Computer Information Systems, 2003
 BBA in Management, 2002
 BBA in Computer Information Systems, 2002

OTHER TRAINING

- ITIL (Information Technology Infrastructure Library)
- CAPM (Certified Associated in Project Management)
- CBAP (Certified Business Analyst Professional)
- CSPO (Certified Scrum Product Owner)
- Volunteer and Member of IIBA (International Institute of Business Analysis)
- Certified Product Manager
- Coursework in Advanced Statistics and Data Analysis
