Create, Implement, and Support ICM and CVP call routing scripts and required reports .	Work directly with the business group to design, and test ICM and CVP call flows to meet the business requirements
Support Cisco Agent Desktop and Cisco Supervisor Desktop clients	Identify new offerings that arise from new technologies
Identify new offerings that arise from customer demand and needs	Maintain documentation of the UC environment and operational procedures

Ford, MI (Jan'10 – Jan'13) Sr. CISCO UCCE Consultant - Project Manager

As an Application Consultant, my primary focus is IVR application development within Cisco Unified Contact Center Enterprise (UCCE) and Express (UCCX). We support over 40 clients in 24x7x365 proactive model. Services include: the architecting and/or re-architecting, managing, and maintaining of each client environment.

Responsibilities:

Support multiple production UCCE environments utilizing: Intelligent Call Management (ICM) 4.x to 8.x, Customer Voice Portal (CVP) 4.x to 8.x, IP-IVR, Unified Management Portal (UCMP), and Unified Call Manager (UCM) 4.x to 8.x, Unified IS and Intelligence Center (CUIS/CUIC), and Unity Connections. Support Genesys: Genesys Framework, Genesys Internet Suite, Genesys Outbound Suite 5.1 & 6.x, Genesys Voice Treatment Option, Genesys Routing, WFM, GVP, VXML, and Genesys Reporting Suite, CME, CCPulse. Support UCC version 8.5 to 9.0. Support CM 8.5 to 9.0. Experience building the HR call center Using the Genesys and migrated from 5.1 to 6.5. Support several UCCX (Unified Contact Center Express) environments. Maintain, support, develop and ICM and CVP Studio (VXML) scripts. Design, deploy and maintain one of the largest UCCE Government deployments on UCCE 8.5. Support ACME Session Border Controllers (SBCs), Cisco AS5400 and ISR routers, and various LAN switches. Interface with other groups within BCBS to provide a fully supported enterprise voice and data solution. Perform training for new employees and current employees. Review and maintain a 24x7x365 staff schedule.

AC Neilson, IL (Jan'07 – Dec'09) CISCO UCCE Consultant - Project Manager

As a Voice Engineer, I administrate multiple Cisco Unified Contact Center Enterprise (UCCE) environments for a multi-national business customer with locations in over 20 countries averaging over 42 million minutes per month.

Responsibilities:

Support four production UCCE environments utilizing: Intelligent Call Management (ICM) 7.2.x/7.5.x, Customer Voice Portal (CVP) 4.x/7.x, IP-IVR, Unified Management Portal (UCMP), Remote Silent Monitor (RSM) 1.x, Unified Call Manager (UCM) 5.x/6.x/7.x, and Unity Connections. Support Genesys: Genesys Framework, Genesys Internet Suite, Genesys Outbound Suite 5.1 & 6.x, Genesys Voice Treatment Option, Genesys Routing, WFM, GVP, VXML, and Genesys Reporting Suite, CME, CCPulse. Experience building the Integrity Hotline call center and migrated from 5.1 to 6.5. Support the implementation of ACME Session Border Controllers (SBCs) and Cisco AS5400, AS5350 and ISR routers to front end both Cisco and Avaya call centers. Design, develop and maintain ICM and CVP Studio (VXML) scripts. Researched and deployed VMWare based Cisco Agent Desktop (CAD). Supported Corporate functions including Unity, UCM and Emergency Responder (CER). Ongoing research of new products in increase functionality, usability, and reliability of the UCCE environments. Plan and Review budget for phone system expansion. Deploy VMWare based Client AWA's to support groups. Perform training for tier one and two support departments. Responsible for Designing, Developing and deploying Genesys CTI Routing Strategies. Develop routing Strategies based on Skill Based Routing. Wrote routing strategies using Genesys IRD. Complete Understanding of Genesys CME (Configuration Manager). Analyze the Issues encountered after deploying into Production, and fix them. Attend Crisis Bridges and resolve/Circumvent Issues in a timely manner. Troubleshoot Genesys CTI Call routing Issues Did reality check using Workforce Management. Designed the Architecture for Genesys Voice Portal (GVP) having multiple Voice Portal Farms and IVR Network Mode, for multiple call centers. Designed the Architecture for Genesys Workforce Management (WFM) for Agent's scheduling of agents, real-time adherence of agent schedules, forecasting of work volume based upon historical data. Designed and developed VXML Framework for Voice Applications for various SBU's. Create and Manage Virtual Agent Groups, Virtual Queues for Skill Based Routing. Use Virtual Agent Groups for Estimated Wait time Statistics to be used in routing. Create and configure Agents, Skills, Routing Points and ACD Queues in CME. Responsible for Reviews and documentation for reporting the status to the project manager. Develop a call recording solution using C++. Develop a customized outbound solution using Genesys ActiveX toolkit.
