

Lahari T

+1 (903) 884-8648 | tlahari12@gmail.com

PROFESSIONAL SUMMARY:

- Around 6 years of experience in IT industry. Experienced in Processing requirements, Design, Development, Testing and Implementation for Java and J2EE applications.
- Experienced in all the phases of **Software development Life Cycle (SDLC)** and **Agile Methodologies**.
- Worked extensively in Multithreading, File Handling I/O, Generics, Exception Handling and Collections, Streams.
- Extensively experienced in **J2EE** technologies like Core Java, Servlets, JSP, JSTL, JDBC Data Access API, XML, JNDI, Spring, Hibernate, JAX-WS and Junit.
- Experience in **Angular JS, React, React Native and REDUX**.
- Hands-on experience in frameworks like Spring such as **Spring MVC, Spring AOP, Spring Core, Spring JDBC, Spring Batch, Spring Boot, Spring ORM, Spring DAO and Spring Security**.
- Proficient in developing Client-side web applications using JavaScript, HTML/HTML5, CSS/CSS3, Bootstrap, AJAX, JSON, jQuery.
- Experience in developing microservices architecture based on **Restful (JAX-RS)** and **Soap web services (JAX-WS)**.
- Proficient in **RDBMS** concepts and good working experience with Oracle 11g, MYSQL, and SQL server and strong Skills in using NoSQL database like MongoDB.
- Proficient in writing SQL queries, Functions, Triggers, Stored procedures in **PL/SQL, JDBC, ODBC**.
- Experienced in **Middleware** persistence frameworks like **Hibernate/Spring boot JPA** Entities for mapping Java classes.
- Worked with a backend service environment using **NodeJS** and can install and manage modules using Node Package Manager (NPM).
- Experience with Java-based **ORM frameworks** such as **Hibernate** (including connection pooling, mapping, transaction management, and **HQL (Hibernate Query Language)**) and **Spring Data**.
- Worked with **Spring Data JPA** for creating automatic DAOs (Data Access Objects).

- Proficient in using various design patterns like MVC, Session Facade, Singleton Factory, Data Access Object, Service Locator.
- Experience in Deploying and configuring web applications using web/application servers like **Apache Tomcat**, JBoss, Web Sphere, Web Logic, Glassfish. Experience in **Log4j** for logging, debugging, and error tracing.
- Implemented **SOA (Service Oriented Architecture)** using Web Services and **REST** Services.
- Proficient in writing unit test cases for JavaScript-based applications and can write test cases using Test Driven Deployment (TDD). Experience in writing Junit test cases and Mockito.
- Experienced in Agile and Waterfall Methodologies, Scrum, and SDLC (includes gathering requirements, designing, coding and testing and implementation) and used JIRA as project management tool.
- Worked with build tools like **Maven**, **Gradle** for building applications in different environments.
- Worked with a Data Intelligence tool **Tableau** for visualizing the data.
- Created Unified Modelling Language (UML) diagrams such as Use Case Diagrams, Sequence Diagrams, Class Diagrams, Activity Diagrams.
- Professional experience in **Integrated development tools (IDEs)** like Eclipse, NetBeans, IntelliJ, and Visual Studio Code. Worked extensively with version control tools like GitHub, SVN, Bitbucket and bug tracking tools like Rally, JIRA.
- Implemented CI/CD and test-driven development using **Jenkins**.
- Deployed the application using AWS lambda, a serverless computing platform.
- Can adapt to the latest technology and can work in a multi-platform environment. Has the ability to take responsibility and be a productive team member.

TECHNICAL SKILLS:

Java/J2EE Technologies	Java 1.7/1.8, EJB, Hibernate, Servlets, JSP, JMS & JDBC
Databases	Oracle 11g, MySQL, SQL Server

IDE Tools	Eclipse, NetBeans, IntelliJ
Operating Systems	Windows
Front End Web Technologies	JavaScript, AJAX, HTML5, DHTML, JavaScript, Angular2/4/7, ReactJS, CSS, XML, XML Schema, JSON, YAML
Web Services and API development	REST APIs, SOAP, WSDL, JAX-RS, JAX-WS
Design Patterns	MVC, DAO, DTO, Front Controller, Session Façade, Business Delegate, Observer, Singleton, View Helper
Version Controls	GitHub, CVS, SVN
UI Framework	jQuery, AngularJS, Bootstrap
Build Tools	Maven, Gradle, Ant
Web Servers	Apache Tomcat, JBoss, Web Sphere, Web Logic
Cloud Technologies	EC2, S3, ELB, Auto-Scaling, VPC, Route53, DNS & IAM

BUSINESS EXPERIENCE:

Client: Cisco, San Jose, CA

Nov

2019 - Present

Role: Java Full Stack Developer

- As a full stack developer, I was involved in requirement analysis, design and implementation of the applications.
- Followed agile methodology and participated in the standup meetings and involved in the sprint planning, retrospection and reviews.
- Implemented Kafka producer and consumer applications with help of the zookeeper and retrieved log messages using Kafka.
- Designed and Developed the presentation layer using servlets and **JSP (Java Server Pages)** and used **JSTL** for reusability.
- Developed the user interface using JavaScript, **HTML5**, **CSS3**, **jQuery**, **Bootstrap** and **Angular 2/4/7**, **React**, **React Native** and **REDUX** for created responsive GUI Interface of the web page.
- Designed **JSON requests** according to the frontend pages and processed the JSON requests according to the different types of modules, actions and request data.
- **JSON responses** will be developed according to the request and send it back to the front end after the logic processing.
- Developed Single page applications using React and Angular, Dynamic page applications.
- Fluent in React and skilled in working with **Redux architecture** to save and update the data.
- Created reusable React components for the application and used props for single directional data flow and used state for class components.
- Experience in using React components, Forms, Events, Keys, Router, Redux and Flux concept.
- Used Reactive programming for building **reactive web applications** that automatically updates the values that are added to the database.
- Experience with spring modules like **Spring MVC**, **Spring Core**, **Spring Boot**, **Spring JDBC** and **Spring DAO**.
- Developed the application using both Java based configuration and XML based configuration.
- Developed user-friendly interface to seamlessly combine the new module with existing login system by using **AngularJS**.
- Wrote **Micro services** to export/import data and task scheduling and Spring boot, Spring and Hibernate in the micro services and Swagger API for Micro services.

- Used **REST API** calls from AngularJS and parsed the data to client and handled the security and REST services authorization using Spring Security.
- Creating **Data Access Objects (DAOs)** integrating with Hibernate and used JDBC interaction to interact with Data Access Objects.
- Used Hibernate in Data Access layer to access and update information in the database.
- Configured Dispatcher servlet and view resolver to interact with the requests and manage the MVC flow.
- Involved in writing SQL queries, functions, triggers and stored procedures for **PL/SQL** and **HQL (Hibernate Query Language)**.
- Used **Hibernate** framework in persistence layer for mapping an object-oriented domain model to a relational DB.
- Developed Entity objects and used Hibernate the **ORM** tool to access the persistent data from MYSQL.
- Implemented Spring bean configuration file and bean factory pattern and application context for bean configuration.
- Deployed the micro services to Pivotal Cloud Foundry using CI/CD pipelines for continuous integration and developed using Jenkins.
- Worked on Amazon Web Service (**AWS**) **EC2** and **Jenkins** for continuous integration.
- Experience with design patterns like session façade, singleton, business delegate and Data Transfer Object (DTO).
- Used Swagger for documenting the **Rest APIs** and created automation scripts for Rest APIs using Postman.
- Knowledge in various agile methodologies like **TDD (Test Driven Deployment)**.
- Involved in building the application and deploying the application using Apache Tomcat Server.
- Maintained DB Schema and wrote services to store and retrieve user data from MongoDB for the application.
- Used **Maven** Scripts to build the application and worked with **Log4j** for error tracking and debugging. Wrote Unit test cases and used Mockito.
- Developed components of web (**JAX-WS, REST, JAX-RPC**) and **SOAP** using various message exchange patterns.
- Used **POSTMAN** and **SoapUI** to test RESTful services and perform operations.
- Used **Spring Security** for Authentication and Authorization of the application.

- Collaborated with team of professionals in Agile Team and used GitHub for source code management and version control. Used Slack as a communication platform between team members.

Environment: Java 8, JDK, Struts, HTML 5, CSS, JavaScript, jQuery, AJAX, DOM, JSON, Angular 2.0, Angular 7, REACT JS, NODE JS, React Native, Agile methodology, Bootstrap, Eclipse, J2EE,Servlets, Spring Framework 4.0, Spring MVC, Hibernate 4.3, Microservices, JUnit, Restful API, Spring IOC, Jenkins, Maven, JDBC, JUNIT, XML, SQL, Oracle, Tomcat, Log 4j, JIRA, GitHub.

Client: B12 Consulting, Dallas, Tx.

Feb 2019 – Oct 2019

Role: Java Developer

- Worked with the phases of SDLC as the scrum member following agile methodology and participated in sprint planning sessions.
- Extensively worked on **Core Java, multi-threading, collections and exception handling**.
- Worked on converting existing module to rest microservices and **CRUD operations using Spring Boot**.
- Created application layer POJO classes and mapped them to backend oracle database using Hibernate network.
- Used **Spring Core** for creating injection of controller and container (IOC) and integrated with **Hibernate**.
- Used Hibernate as the **Object Relational Mapping (ORM)** to access data from SQL server.
- Worked on setup of CI/CD process for application using Jenkins.
- Developed **Data Access Objects** using Spring DAO, JDBC and Spring Hibernate.
- Experience in working with web services like SOAP, WSDL, RESTful web services.
- Experience with large scale distributed systems and web-oriented architectures
- Managed the bean lifecycle and worked with the controller to handle the request and response.
- Interacted with clients to gather requirements.
- Worked with Maven build tool for automation and deployed the application using Tomcat server.

- Working experience on **JDBC, Angular JS, XML and AJAX**. Worked on handling transactions using JPA (Java persistence API).
- Handled Front end using Angular and React for developing **Single Page Applications (SPA)**.
- Created Multiple Re-Usable UI directives by defining **Angular JS Directives**, Attaching Event Listeners, Controllers, and updating DOM elements.
- Used **REST API** calls from Angular JS and parsed the data to the client and handled the security and REST Services authorization using spring security.
- Build prototypes using react navigation and used API for props management.
- Implemented stable react native components and stand-alone functions to be added to any future pages.
- Worked on **React Native** to get access to the native APIs.
- Used React Components, Reducers and Actions to implement MVC (Model View Controller).
- Used libraries like redux-reselect to increase the performance of the application.
- Used NodeJS frameworks in the development of web applications.
- Worked with databases and wrote SQL, HQL (Hibernate Query Language) queries to fetch the data from the database.
- Wrote Junit test cases and used **log4j** for debugging and error handling, tracked defects in Jira tracking portal.
- Created interfaces, analyzed use cases and designed the core functionality from presentation layer to the business layer using UML.
- Developed web pages using **Spring MVC and JSP**. Worked on reusable components using AngularJS.
- Delivered React JS applications solving the issues and following best practices.
- Worked with NPM commands and used package json for managing dependencies and dev-dependencies of node Js applications.
- Worked on Struts in presentation tier and used Spring Core/IOC to inject the object dependencies.
- Used Selenium and Cucumber test driven deployment tools for java automation.
- Used **Spring Core/IOC** to inject the object dependencies. And worked on struts in presentation tier.
- Analyzed use cases, created interfaces and designed the core functionality from Presentation layer to business logic layer using UML.

Environment: Java, Oracle, Hibernate, Spring Framework, Jenkins, Node, JDBC, Angular JS, React JS, React Native, JavaScript, AJAX, JDBC, Log 4j, Maven, Microservices, SOAP, REST, Spring ORM, Spring Core, Junit, SQL server, AWS, EC2, node.js, Struts.

Client: IncNut Digital, Hyderabad, India

Dec

2016 – Nov 2018

Role: Java/J2EE Developer

- Used agile methodology for software development. Based on the business needs of the application, developed functional and non-functional features of the application.
- Participated in all Agile scrum ceremonies, project planning, design discussions and release planning activities.
- Proficient in using servlets. Applied **MVC** implementation to the web application.
- Used **Design patterns** such as DAO, Singleton, Session façade which helps in distribution of roles and responsibilities across various layers of processing.
- Developed the application using **Eclipse IDE** and used JBoss for deployment of application.
- Strong understanding of the spring modules like Spring Core, Spring MVC, Spring JDBC, Spring Boot.
- Extensively used spring framework **Dependency Injection (DI)** for object's dependency resolution, Inversion of Control (IOC) using XML configurations, Java Annotations and Java Source code.
- Integrated Spring- Hibernate frameworks for ORM functionality. Maintained web services using **Restful API**.
- Strong skills in writing queries, functions, triggers and stored procedures in PL/SQL.
- Developed UI interface using HTML, CSS, jQuery and Angular, JavaScript AJAX and Tag libraries and Bootstrap.
- Strong skills in Oracle server-side programming which includes SQL, SQL*Plus, PL/SQL Packages.
- Used **DAO** Pattern to fetch data from the database using Hibernate to carry out various database.
- Wrote JUnit test cases for unit testing. Used maven to build applications and created multi module maven project and used Jenkins for continuous integration.

- Developed detailed design documents for all the functional modules of the application to be used by the testing team to setup Test cases.
- Deployed the application using Apache Tomcat Server.
- Performed Module and Unit Level Testing with **JUnit** and **Log4J** for debugging and error tracking.
- In production support responded to service tickets and service requests within established time-based requirements.
- Designed and developed **REST** based microservices using **Spring Boot**.

Environment: Java 1.7, J2EE (JSP, Servlets), JMS, JavaScript, jQuery, HTML, API, CSS, Bootstrap CSS, JSF 2.0 X, Hibernate, Spring, Linux, XML, XPATH, Shell scripts, Perl Scripts, Eclipse, JBOSS, Agile, JDBC with Oracle 11g.

Client: VirtueGenie, Hyderabad, India
2016

Jan 2014 – Nov

Role: Jr Java Developer

- Involved in the Software Development and Lifecycle for analysis, design, testing and implementation of the project.
- Good Experience in developing web/enterprise applications using SDLC methodologies like waterfall/agile.
- Prepared business and functional requirement specification and technical documentation.
- Involved in Daily Scrum meetings, Sprint planning and estimation of the tasks for user stories and participated in retrospective and presenting demo at the end of the sprint.
- Experience on **Collections**, **Exception Handling**, **Garbage Collection** in Core Java.
- Designed use case diagrams, class and sequence diagrams in the design phase of the project and for workflow settings.
- Developed code changes using core java, **J2EE** technologies and used **Eclipse**, **JDBC** and **MySQL**.
- Used Servlets for maintaining server-side business logic.
- Used various Design patterns like service locator, session facade, singleton and factory pattern.
- Used spring framework for implementing **Spring IOC**, **JDBC**, **ORM**.
- Experience in writing **SQL** Stored procedures and functions.

- Experience in writing test cases for Junit testing and thus verifying and validating applications.
- Used **HTML, CSS, JSP, JSTL** and Java script for building web applications.
- Worked on deployment of virtual machines and troubleshooting on VM management.
- Worked on **JSON, AJAX** for request and response processing and used CVS for maintaining source code with other developers.
- Used Maven to build and deploy the application on web logic server.
- Used Git for version control across common source code used by developers.

Environment: Core Java, Collections, Multi-Threading, Struts, JavaScript, JSP, HTML, CSS, JDBC, Junit, SDLC, Eclipse, Tomcat, SQL, CVS, Waterfall, Design Patterns, DAO.

EDUCATION:

Master's in applied computer science

Northwest Missouri State University, Missouri, MO
