📁 PROJECTS

Todo List [🔗](#)

The React Todo App is a sleek, user-friendly application designed to help users manage their tasks efficiently. This project leverages modern web development technologies, including React, Redux, and Firebase, to provide a seamless and responsive user experience. The app allows users to create, read, update, and delete (CRUD) tasks.

Environment : HTML, CSS, React JS, Firebase

Demo (Without Firebase) : [Click Here](#) [🔗](#)

Demo (With Firebase) : [Click Here](#) [🔗](#)

Employee Management System [🔗](#)

The Employee Management System project helps to manage the employee details like salaries and departments in the organization

Environment : HTML, CSS, Javascript, Spring, Hibernate and MySQL Database

Food Delivery App [🔗](#)

Developed a comprehensive food delivery application using Spring Boot for the backend, HTML for the frontend, and MySQL for database management. The project includes features such as user registration, restaurant and menu management, payment gateway system, order placement, and order tracking. Implemented efficient data handling and business logic, ensuring a seamless user experience. The application supports essential functionalities required for managing a food delivery service, emphasizing a solid integration of the server-side logic with the database.

Environment : HTML, CSS, Javascript, Spring Boot, Thymeleaf, MySQL
