

## GERALD (JERRY) S. PORTER

Network Engineer VI  
Chesapeake, VA

Award-Winning, Innovative, Network Engineer VI  
Seeking Permanent Lead/Senior Network Engineering Position  
Active DoD Security Clearance

[onlyasurfer151@yahoo.com](mailto:onlyasurfer151@yahoo.com)

### PROFESSIONAL SUMMARY

Over 26 years of combined communications and network/systems engineering experience. Over 19 years of full-time LAN/WAN network and systems engineering experience from small to large municipal, national, and global enterprise environments. Experienced in management and delivering executive level technical presentations, as well as liaison with foreign partners. Experienced in contract Statement of Work (SOW) drafting, proposal writing for business development, vendor and transport provider liaison, as well as new hire interviewing and selection. Over 20 years of project management experience, including status and deliverable reporting to government and corporate leadership. Experienced in conducting site surveys for new locations, determining technical requirements for site connectivity. Capable of developing technical diagrams, conceptual diagrams, and reports for new capabilities. Experienced in architecture design development, IP address schema, planning, testing, transition, implementation, optimization, documentation, deep packet inspection, hardware and software beta testing, network security, log analysis, network monitoring, AAA, multicast, local and enterprise IOS upgrades, advanced network engineering technologies, and configuration management. Mentors Project Leads and engineers in network architecture development, providing technical guidance for standards compliance and resilient design. Guides team members in conducting logical troubleshooting of network issues, as needed, using technical skills and knowledge to solve complex problems. Familiar with various network and physical security standards including federal (NSA), Department of Defense (DISA STIG's, DIA, TEMPEST, ONI), and industry standards and best practices to harden network devices. Over 17 years of experience with network hardware installation and WAN site stand-up. Over fourteen and a half years of experience with Cisco Firewalls and ASA devices. Over 19 years of experience in Internal Gateway Protocol (IGP) and External Gateway Protocol (EGP) dynamic routing protocols to include route re-distribution, metric optimization, and Layer 2 and Layer 3 redundancy protocols. Familiar with guidelines on secure spaces and handling of data up to the Top Secret/SCI level. Experienced with Cross Domain Solutions, implementation, and accreditation. Experienced with various KG-series crypto devices and handling of Controlled Cryptographic Items (CCI). Familiar with various network cable terminations, fiber standards, cables, connectors, network modules, media converters, and transceivers. Seven years of legacy audiovisual and videoconferencing (H.323 and H.321) engineering, integration, operations, accreditation, documentation, and circuit support, prior to network engineering focus.

### TECHNICAL EXPERTISE HIGHLIGHT

**Key Network Protocols and Technologies:** TCP/IP, UDP, SSH, FTP, TFTP, SCP, DHCP, DNS, IPsec, AES, MD5, SHA, GRE, BGP, OSPF, EIGRP, RIP, Policy-based Routing, MPLS, ICMP, WCCP, HSRP, GLBP, VRRP, STP, VTP, VSS, RSTP, MST, 802.1q, 802.1x, MAB, Wake On LAN, Etherchannel, NAT, PAT, SNMP, AAA, TACACS+, RADIUS, H.321, H.323, VoIP, 802.11a-ax, LWAP, CAPWAP, IP SLA, QoS, syslog, SPAN and RSPAN, NetFlow, Cache-flow, NBAR, ACL's, SVR, PIM, IGMP, L2TP, pseudowire

**Software/Applications:** SolarWinds Orion Suite (NPM, NCM, NTA, VNQM, UDT, SAM), Infoblox IPAM, WhatsUp Gold, AdventNet ManageEngine OpManager, PRTG, MicroFocus Network Automation (some experience), Security Onion Pro (some), Cisco ASDM, Cisco ISE and legacy ACS, Cisco IOS-based IPS, Cisco AnyConnect VPN client, Cisco Ironport WSA, Cisco Embedded Event Manager (EEM), Juniper 128T Conductor and SSR, Spirent Test Center, McAfee Firewall Enterprise Admin Console (legacy), Wireshark, GEM One by General Dynamics, SecureCRT, PuTTY, Serva64, Cisco Call Manager, Cisco Call Manager Express, Cisco Unified Communications, Filezilla, WinSCP, Microsoft Office Suite, Microsoft SQL (some), Microsoft Project, and Microsoft Visio

**Operating Systems/Servers/Environments:** Cisco IOS-XE, Cisco ASA IOS, Cisco FXOS (some), Junos (some), Juniper SSR/SVR (some), Dell OS (legacy), CENTOS, Linux (RHEL), Microsoft OS through Windows 11, Windows Server through 2022, VMware ESXi (some), Proxmox Virtual Environment (some), Amazon Elastic Compute Cloud (EC2)

**Hardware:** Broad range of Cisco router, switch, and firewall platforms including service provider-grade devices and Multi-Gigabit platforms. Current platforms include: Cisco 9200, 9300, 9400, and 9500-series switches, IE3200 and IE3300 series switches, ASR 1000-X-series routers, ASR 920-series routers, C8300-series routers, Cisco CSR 1000v, Cisco ASA's (5505, 5506X, 5508X, 5510, 5515X, 5516X, 5520, 5545), Cisco NGFW Firewalls (1010, 1120, 2130, 2140 – some experience), Cisco FMC (some), Cisco ISE, Cisco WLC, Cisco Lightweight APs, various Cisco HWIC and Network Modules, SFP's, GBIC's, media converters and

**Hardware (cont.):** transceivers, Cisco Ironport S170 WSA Juniper SSR 1400 (some), various legacy CSU/DSU's, Spirent SPT-9000A TestCenter appliance, Apposite Linktropy Mini2 WAN emulator, Orolia 1200 and 2400 GPS/NTP systems, Symmetricom SyncServer, S200 Time servers, Sunhillo Real-time Interface & Conversion Item (RICIs), Sensis SIU-2100, GD KG-175D Micro TACLANE, GD KG-175F, and GD KG-175N, Cisco VoIP phones including Cisco 8841 phones and CIS TSG-compliant phones, Owl OCDS-SFF-155 Cross Domain Solution

## PROFESSIONAL DEVELOPMENT

- **B.A., Communication**, with Minor Degrees in English and Spanish, **North Carolina State University**, Raleigh, North Carolina, 1994-98. Graduated with honors.
- **Security+** ce, CompTIA, Current, Expires October 2027
- **Cisco Certified Network Professional Enterprise**, Expires November 2027
- **Cisco Certified Specialist – Enterprise Core**, Expires 25 April 2028
- **Cisco Certified Specialist – Enterprise Advanced Infrastructure Implementation**, Expires 25 April 2028
- **Cisco Certified Specialist – Enterprise Design**, Expires 25 April 2028
- **Cisco Certified Network Associate**, Expires 25 April 2028
- Detection Engineering, Practical Analysis, and Security Onion 2.4 in Production, Security Onion Solutions, June-July 2025
- AI Solutions on Cisco Infrastructure Essentials (DCAIE) 1.0, Cisco U. April 2025
- Cisco Programming for Network Engineers | PRNE, Cisco U., November 2024
- Introduction to Session Smart Routers, Juniper Learning Portal, August 2024
- Understanding Cisco Network Automation Essentials (DEVNAE), Cisco U., May 2024
- Cisco SD-WAN Operation and Deployment | SDWFND, Cisco U., February 2024
- Designing Cisco Enterprise Networks (ENSLD) v2.0, Cisco Digital Learning, November 2023
- Implementing Cisco Service Provider Advanced Routing Solutions, Cisco Digital Learning, August 2023
- Introducing Cisco Unified Computing System, Cisco Digital Learning, October 2022
- Securing Networks with Cisco Firepower Next Generation Firewall (SSNGFW) v1.0, Cisco Digital Learning, January 2022
- SD-WAN Mastery Collection – Deploying the Data Plane (For Customers) v1.0, Cisco Digital Learning Library, July 2021
- Designing Cisco Enterprise Wireless Networks, v1.0 – Cisco Digital Learning Library, November 2020
- WDAWL v1.2 – Cisco Deploying Advanced Wireless LANs, Skyline Advance Technology Services, August, 2018
- WDBWL v1.2 – Cisco Deploying Basic Wireless LANs, Skyline Advance Technology Services, August, 2018
- Implementing Cisco MPLS, Global Knowledge, Norfolk, VA, April 2013
- Capability Maturity Model Integration (CMMI) Training Course, PEM Systems, Norfolk, VA, February 2013
- Cisco Unified Wireless Networking Course, Global Knowledge, Matthews, North Carolina, March '09
- CiscoWorks LMS 3.0 Course, Global Knowledge, Cary, North Carolina, May '08
- ICND2, Interconnecting Cisco Networking Devices 2, ECPI, Newport News, Virginia, September '07
- ICND1, Interconnecting Cisco Networking Devices, ECPI, Virginia Beach, Virginia, August '07

## PROFESSIONAL EXPERIENCE

### 7/24 - Present Huntington Ingalls Industries, Mission Technologies Division, Network Engineer VI and Site Lead, JBLE, Hampton, VA

Contractor Site Lead and Lead Network Engineer supporting US Air Force ACC and the 700<sup>th</sup> Air Support Squadron at Joint Base Langley-Eustis, VA, as part of the Cyber Assessment & C3I Infrastructure Cyber, EW & Space (CEWS) HII sector. Supports the Advance Battle Management System (ABMS), a Multiple Independent Levels of Security (MILS) capability meeting Joint All-Domain Command and Control (JADC2) requirements, as part of the DAF PEO C3BM portfolio. Along with a cloud-based solution providing multidomain training capabilities at various classifications for the warfighter, ABMS supports information-sharing to the Five Eyes intelligence alliance. Manages a growing contractor team of seven cyber, network, and systems engineers and one COMSEC Local Element, in the early stages of the project and capability, working towards Initial Operating Capability (IOC). Analyzes requirements and develops solutions for the growth and expansion of the Tier 2 Help Desk and Command-and-Control Network and Security Operations Center (C2NSOC), based out of Joint Base Langley-Eustis. Manages contractor team, to include event support coverage. Advises Program Management team and customer on contractor staffing plan. Serves as Technical Engineering SME to 700th ASUS, providing technical recommendations to the 700th for solutions supporting the C2NSOC's ability to monitor and administer the network. Guides the C2NSOC Team and HII Team in accreditation steps and processes, in pursuance of an Authority To Operate (ATO) for the capability. Guides government, military, and contractor team in STIG analysis and application, as well as technical approach to achieving ATO compliance. Serves as liaison and SME in discussions with vendors on technical solutions needed for the 700th. Established Cisco GEMSS account for the C2NSOC systems, working with Iron Bow as the USAF GEMSS manager. Configures network, client, and cryptography systems as needed, to include resources in AWS GovCloud, and provides guidance to team. Provides weekly and monthly reporting for contract deliverables. Regularly interfaces with the ABMS Program Management Office (PMO), advising on roles and responsibilities between teams. Provides technical recommendations and developed phased architecture expansion plan for the C2NSOC network node based on budgetary constraints, to include network

expansion to new facility. Develops BOMs for hardware and software procurement and guides government personnel on technical requirements for BOM development. Developed and maintains technical network architecture diagrams for the Command and ATO artifacts. Advises the 700 on Capabilities Milestone Document (CMD) development for critical roles assignment, capabilities achieved, and POA&M required for IOC, to include industry and DoD standards for Tier 1-3 roles. Coordinated and configured addition of terrestrial commercial WAN link for primary site node, significantly improving reliability, availability, and response. Guided team on Tenable Nessus architecture approach, standing up local ACAS/Nessus scanner at the C2NSOC node, achieving significantly improved regional scanning. Achieved "Q-1" qualification for Edge Connect "Capstone" architecture training. Trains military, government, and contractors on architecture and technical concepts. Received commendation email for contractor event support from Lt Col Jennifer Eberwine, Director of Operations, 700th Air Support Squadron (ASUS) HQ/ACC/A3.

### **1/13-6/24 Huntington Ingalls Industries, Mission Technologies Division, Network Engineer VI and Network Engineering Functional Lead, Norfolk, Virginia**

Network Engineering Division Lead for team of 35+ network design and operations engineers, as well as communications engineers, for the NAVSEA Warfare Center (NWSWC), Corona. NWSWC supports the global Naval Continuous Training Environment (NCTE) enterprises as part of the Navy Enterprise Tactical Training Network (NETTN) portfolio, as well as the US Air Force's Live Mission Operations Network (LMON). NETTN network enterprises support air, shore, and ship-based distributed Live, Virtual, and Constructive (LVC) training services to the warfighter at various classification levels and across multiple domains. LMON supports US Air Force Live Range training requirements. Supported simulation and Navy Fleet synthetic training services, with substantial multicast requirements, and service provider hardware platforms over a hybrid MPLS transport with QoS support. Conducted direct customer liaison, project oversight, and reporting. Conducted site surveys, as well as liaison with partners. Provided executive level technical and conceptual briefings on designs, capabilities, and functional operations, as needed, for review and acceptance by engineering staff and customer. Mentored design engineers and project technical leads, providing guidance in network engineering and architecture development, implementation, and operation. Addressed technical issues with project leads on project design and/or implementation issues. Developed solutions to meet customer requirements, ensuring systems meet government Information Assurance, physical security, and TEMPEST requirements. Managed portfolio of network service projects for baseline management, deployment, and Tier 3 engineering escalation and periodically reported on labor, ODC, and travel funding expensed on projects, coordinating with various government and contractor project stakeholders. Reviewed and approved Installation Design Plan developed by draftsmen in Fielding/Installation team for accuracy, as Network Functional Lead. Drafted Bill of Materials (BOM's) for the equipment and resources needed, to include multi-million dollar LCM budget for architecture refresh. Provided quality assurance oversight on BOMs developed by subordinate engineers, mentoring team on portfolio standards and business rules that guide hardware and licensing selection. Developed plans of action and milestones for the implementation of solutions. Maintained familiarity and knowledge of various network management and monitoring tools, devices, capabilities, and protocols. Supported beta testing of network hardware and software. Experienced in configuration of cryptographic devices and keymat, including various KG-series platforms, as a COMSEC User. Designed wireless solution according to NSA Commercial Solutions for Classified (CSfC) standards for wireless transport of classified data including sensitive, mobile Augmented Reality and Virtual Reality Ship Bridge training capability, with solution receiving full Authority to Operate (ATO) for capability. Designed WAN solution with automated fail-over using Cisco EEM for Full Motion Video (FMV) training capability over the Unified Video Dissemination Systems (UVDS) and the Global Broadcast Service (GBS) transports. Project Lead for global Enhanced Network Monitoring Project, implementing significantly improved and automated network health monitoring and configuration management capability with budget of approximately \$425k and successfully transitioned capability into production across multiple independent network enclaves. Designed Development LAN capability and initial program capability for TS/SCI network environment, including implementation of a Cross Domain Solution between domains of different classification levels and achieved Authority to Operate (ATO) for capability. Proposal writing contribution led to almost \$900 million contract win for O&M support, growing company value for Alion Science and Technology and leading to acquisition of company by Huntington Ingalls Industries. Due to outstanding project documentation and management, managed projects were selected for evaluation and accreditation, earning a CMMI Level 3 certification for the company and organization. Received Letter of Commendation from Flag Officer for outstanding event support for high visibility RDT&E event at NUWC, Pearl Harbor, Hawaii. Promoted to Deputy and then Functional Lead, despite many engineers having been on the team significantly longer and since program's initiation.

**5/09-12/12 Northrop Grumman Technical Services, Advanced Warfighting Solutions, US Air Force/SPAWAR Support, Senior Network Engineer, Communications Engineer III, Suffolk, Virginia**

Senior network design engineer and network engineering Subject Matter Expert on team of six tier II/III engineers for Cisco Gold Partner in Engineering and Network Operations Center environment. Maintained SLAs with customer with 24/7, one hour outage reporting for operational network. Functioned as team lead network engineering liaison with Cisco sales and engineering staff. Re-designed and transitioned enterprise to meshed VPN solution with optimized dynamic routing, QoS, and multicast support. Stood up new AAA capability on the network and implemented Cisco IronPort Web Security Appliance. Brought security posture up to federal, Department of Defense, and industry standards and best practices. Achieved a virtually transparent WAN link fail-over design for critical Air Force Air Traffic Control Services Network in Afghanistan between E1 over fiber and IP over satellite TDMA transports. Introduced Voice over IP capability with Cisco Call Manager Express. Designed secure and custom DMVPN solution for Air National Guard unit mobile TPS-75 Radar feed with redundant ISP's and DMVPN Hubs, ensuring resilient network connectivity while in the field. Developed new business on all contracts with innovative, successful, and highly resilient solutions. Received out-of-cycle promotion and two "Timely Award" bonuses for ingenious project designs and flawless implementation.

**2/08-5/09 Department of Communications and Information Technology, Telecommunications Division, Network Team, Systems Engineer I, City of Virginia Beach**

Worked as Tier II/III network systems engineer in four-person Network Team supporting WAN/LAN network connectivity for city staff of approximately 8000 employees with 5000 client machines and 600+ network devices, as well as public users. Base-lined all network devices for automated central management, standardized logging levels, and hardened network device security configuration. Stood up new WAN sites with IPsec VPN solution. Configured eight Cisco firewalls, in coordination with Information Security Department. Administered complex partner network connections and gigabit data center core. Maintained hardware inventory and life cycle management plan. Coordinated campus Wireless staff network installation and verification. Received letter of commendation from Jill Burr, City of Virginia Beach Pungo-Blackwater Library Director, for outstanding customer Support, July 2008.

**4/06-2/08, Northrop Grumman Technical Services, JTEN NOSC Information Transport Manager, Communications Engineer II, Joint Warfighting Center, USJFCOM**

Worked under Network Operations Security Center (NOSC) crew commander as IT team technical shift lead for immediate staff of four positions in Tier II section for world-wide Department of Defense classified Joint Training and Experimentation Network (JTEN). Network included 42 persistent WAN sites and up to 8 event sites. Achieved out-of-cycle pay raise, company bonus, as well as promotion for performance, documentation, and leadership.

**8/01-4/06, Northrop Grumman Mission Systems, Audio Visual Technician II, Joint Task Force-Civil**

AV and VTC Lead for Deployable Military Unit supporting, critical fixed and deployable communications requirements and system accreditation. Managed large and small design and integration projects, as a member of the Command's J6, C4I section. Received three command coins and two letters of commendation from Flag Officers for performance and contributions, including 9/11 support.

**3/99 – 8/01, PROSOFT Engineering Inc., Audio Visual Specialist, JWFC, USJFCOM**

Operated audio and video equipment in support of conferences, media training and during production and post-production. Directed and operated video switchers, audio boards, and control systems for conferences and video teleconferences. Performed linear and nonlinear video editing and produced video projects for various needs. Received three letters of commendation from Flag Officers for efforts.

### SELECTED ACCOMPLISHMENTS

- Email Commendation for stellar event support, Lt Col Jennifer Eberwine, Director of Operations, 700th Air Support Squadron (ASUS) HQ/ACC/A3, May 2025
- Company RMAP Bonus, February 2025
- Company RMAP Bonus, March, 2024
- Selected as **Engineering Fellow** for HII Mission Technologies, January, 2024
- Company Performance-based Bonus, November, 2023
- Company Performance-based Bonus, January, 2023
- **Promotion** to Network Engineer VI, October, 2022
- Company Performance-based Bonus, March, 2022
- Company Performance-based Bonus, December, 2021
- Company Performance-based Bonus, March, 2021
- Company Performance-based Bonus, Fall, 2020
- **Promotion** to Functional Lead, August, 2020
- **Promotion** to Deputy Functional Lead, January, 2018
- Company Performance-based Bonus, Winter, 2017
- Letter of Commendation from Rear Admiral Mathias W. Winter, Chief of Naval Research, for FST RDT&E Event support May, 2016
- Two Company Performance-based Bonuses, Fall, 2016
- Company Performance-based Bonus, Fall, 2015
- Two Company Performance-based Bonuses, 2014
- Letter of Commendation from Colonel Joseph A Sublousky, United States Air Force Central Command/A6 Director of Communications, for Low to High Network Integration Project, August 2011
- **Promotion** to Communications Engineer III, July 2011
- Timely Award, April 2011, for redundant WAN link with transparent fail-over design for United States Air Force Critical Air Traffic Control Communications Network in Afghanistan
- Timely Award, September 2010, for enterprise re-design and transition plan to meshed VPN solution for United States Air Force Air Combat Command Homeland Security operations
- Letter of Commendation from Air Commodore Steven Walker, Director General, Joint Combined Training Capability, Royal Australian Air Force, for support of Talisman Sabre 2007 Multinational Training Event
- Command Coin from Major General Jason K. Kamiya, United States Army, Commander of the JWFC, for support of the Unified Endeavor 2008-1 Training Event, October 2007
- Command Coin from the Virginia National Guard Adjutant General, Major General Claude A. Williams, for FAAR VTC support for Sudden Response '04 Exercise
- Letter of Commendation and Command Coin from Major General Bruce Davis, USANG, Commander of the Joint Task Force Civil Support, for dedicated, professional, and self-motivated support of the Command, April 2006
- Command Coin in recognition of response and support efforts on September 11, 2001 from Brigadier General Jerry W. Grizzle, USANG, Commander of the Joint Task Force Civil Support.
- Letter of Commendation from Major General George W. Casey, Jr., United States Army, Commander of the JWFC/JTASC, September, 2001
- Letter of Commendation from Major General Timothy A. Peppe, United States Air Force, Director of Joint Experimentation, Fall, 1999
