SUMMARY: Senior Business Analyst with 6+ years of experience driving data-driven decision-making in **financial services, retail, and healthcare**. Expertise in **requirements gathering, stakeholder management, KPIs design, process optimization, and BI reporting**. Adept at translating business needs into scalable solutions, improving operational efficiency, customer retention, and revenue growth. Skilled in **SQL, Tableau, Power BI, and Python analytics**, with strong domain knowledge in **fintech, digital banking, and supply chain**.

SKILLS

- Business Analysis & Requirements:** BRD, FRD, Gap Analysis, Use Cases, UAT, Process Flows, Agile (Scrum, Kanban), Waterfall
- Data & Analytics:** SQL, Tableau, Power BI, Looker, Excel (Pivot Tables, VBA), Python (Pandas, NumPy), R
- Data Platforms:** Snowflake, Redshift, Azure Synapse, BigQuery, PostgreSQL, SQL Server, MySQL
- Tools & Collaboration:** JIRA, Confluence, MS Visio, Lucidchart, Figma, ServiceNow, MS Office Suite
- Domain Knowledge:** Banking (CLV, fraud detection, lending KPIs), Retail (churn, A/B testing), Healthcare/Supply Chain (vendor KPIs, logistics optimization)

EDUCATION

- | | |
|---|----------------------------|
| • University of Cincinnati, Carl H. Lindner College of Business
<i>Master of Science, Business Analytics</i> , with Data Science concentration | Cincinnati-OH, USA
2024 |
| • GMR Institute of Technology
<i>Bachelor of Technology, Mechanical Engineering</i> | India
2019 |

PROFESSIONAL EXPERIENCE

Business Analyst Intern | Novotion Inc. *Mar 2025 – Present*

PROJECT: Designed scalable **analytics dashboards and churn frameworks** for product analytics, funnel optimization, and A/B testing to improve customer engagement and retention.

Responsibilities:

- Partnered with stakeholders to capture requirements for **churn analysis, funnel tracking, and A/B testing**, aligning scope with business priorities.
- Designed and delivered **SQL-driven dashboards** in Snowflake and Tableau to track onboarding KPIs, reducing drop-offs by 15%.
- Authored **user stories, acceptance criteria, and mock-ups** in JIRA/Confluence, ensuring alignment across technical and business teams.
- Conducted **gap analysis** between legacy and target reporting systems, defining process improvements for leadership.
- Facilitated UAT, drafted **test scenarios and validation scripts**, resolving 90% of issues before release.
- Supported **CI/CD pipeline reviews** with data engineers to ensure deployments met business requirements.
- Coordinated **weekly sprint reviews and backlog prioritization**, ensuring project delivery timelines were met.
- Acted as liaison between marketing, finance, and engineering teams to align KPIs with strategic objectives.

Environment: Snowflake, SQL, Tableau, Power BI, JIRA, Confluence, Python (Pandas), GitHub Actions, BigQuery, Airflow.

Senior Business Analyst | University of Cincinnati *Sep 2023 – Dec 2024*

PROJECT: Led **business analysis initiatives** to support loan lifecycle analytics, CLV modeling, and fraud detection with secure reporting systems for fintech operations.

Responsibilities:

- Conducted **stakeholder interviews** with risk, product, and compliance teams to define reporting KPIs.
- Authored **BRDs, FRDs, and process flow diagrams** for lending analytics and fraud dashboards, reducing manual reporting by 50%.
- Designed Tableau dashboards to highlight high-value customer cohorts, increasing retention by 8%.
- Defined requirements for **real-time fraud detection reporting**, reducing chargeback losses by \$1.2M annually.
- Facilitated **cross-functional workshops** to standardize KPIs across departments, improving consistency by 40%.
- Conducted **what-if analysis for loan strategies**, providing actionable insights to leadership.
- Supported data governance initiatives by documenting **data dictionaries and reporting standards**.
- Presented project updates to executive stakeholders, translating technical outcomes into business value.

Environment: Tableau, Power BI, SQL, Snowflake, Azure Synapse, Python, JIRA, Confluence, MS Visio, Git, Airflow.

Senior Business Analyst | ICICI Bank *Jul 2021 – Jul 2023*

PROJECT: Enhanced **digital banking analytics and reporting frameworks**, focusing on campaign optimization, customer journeys, SLA monitoring, and compliance.

Responsibilities:

- Led requirements workshops for cross-sell A/B testing frameworks, improving conversions by 9.1% (\$1.4M ARR).
- Defined KPIs and dashboards for SLA monitoring, reducing average resolution times by 17%.
- Partnered with marketing to design **segmentation strategies**, lifting loan campaign conversions from 4.2% to 7.8%.
- Collaborated with compliance teams to automate bureau data ingestion, reducing acquisition costs by 30%.
- Authored **customer journey maps** for digital onboarding, reducing onboarding time by 25%.

- Produced **ROI analysis reports** for digital campaigns, helping executives reallocate budgets effectively.
- Coordinated UAT sessions for BI dashboards, ensuring accuracy and usability across business teams.
- Trained end-users and created **reference guides**, increasing adoption of reporting tools by 45%.

Environment: Tableau, Power BI, SQL, PostgreSQL, Snowflake, SQL Server, JIRA, Confluence, Airflow, Git.

Research Analyst | *Indian Space Research Organization (ISRO)*

May 2018 – Jun 2021

PROJECT: Supported **supply chain and manufacturing operations** by designing KPI dashboards, process improvements, and logistics analytics frameworks.

Responsibilities:

- Conducted requirement gathering for **supplier performance analytics**, improving on-time delivery rates by 18%.
- Designed **Power BI/Tableau dashboards** for real-time supply chain visibility across procurement and logistics.
- Defined KPIs for finance and logistics, cutting transport costs per unit by 12%.
- Documented **business processes and workflows** for warehouse operations, reducing lead times by 15%.
- Developed what-if analysis models to assess impacts of production delays, enhancing proactive planning.
- Authored **functional specs** for vendor approval workflows, increasing compliance and transparency.
- Facilitated change management and **training sessions** to improve adoption of reporting systems.
- Partnered with engineering and operations teams to ensure KPI alignment with organizational goals.

Environment: SQL, Tableau, Power BI, Python, Snowflake, Hadoop, JIRA, Confluence, ERP Data (SAP), MS Visio.
