FARMER

Business Operations | Project Manager

Accomplished Business Operations and Project Manager with expertise in streamlining operations, managing Microsoft Office 365 solutions, and enhancing business processes. Proven track record in project implementation and regulatory compliance across diverse sectors. Ready to leverage skills in strategic planning and process optimization to drive operational success in a new role.

EXPERIENCE

Business Operations/O365 Administrator/Project Manager

Jan 2017 – Present
Rolla, MO

Uptime Solutions

- Managed all operations and office tasks for small IT business including:
- Managed company CRM, including: ran the ticketing system that analyzed and assigned project resources to issue resolution and deliverables, managed AP/AR tasks, modified system for process improvements
- Managed schedules
- Answered customers inquiries
- Ordering for office and customer needs
- Accounts Payable/Account Receivable
- Proposed and developed SharePoint Migration projects for numerous smaller and medium sized solutions. Migrated data from shared drives and on-premises SharePoint and developed processes for a SharePoint and Office 365 bundled approach for local Government, Municipal Utilities, Beverage Distribution, Realty, Medical and Dental businesses.
- Worked with clients from kickoff through closeout: defined requirements to build, implement, and manage Teams, SharePoint sites and lists, built custom solutions in SharePoint and Office 365, prepared corporate deployment, adoption and end user training on SharePoint, OneDrive, Teams and O365, created and delivered end user training sessions for SharePoint, Teams, and Office 365.
- Created company documentation and sites to include FAQ's, contact forms, written and video training for all end users.

Leadership Support Project Manager

Jan 2012 – Present
Rolla, MO

Paragon Business Solutions

- Built, implemented and managed Paragon's SharePoint online site, migrating all documents from SharePoint 2007 on-premises and shared drives.
- Worked with all departments to create sites, pages, workflows, templates, forms, lists and libraries tailored to department needs, SLA compliance and document retention policies.
- Set up and managed groups and permissions for all sites, pages, libraries and documents.
- Designed, built, and implemented full project lifecycle tracking system within SharePoint utilizing forms, workflows, site templates, lists, libraries and metadata to ensure all processes followed, and all proposal, contract and project documentation stored securely, and retention policies followed.
