
Professional Summary

- 10+ years of experience as a Business Analyst in web-based client-server applications, developing business processes for Retail & Ecommerce Domain.
- Coordinating communications regarding enhancements, changes and issue management related to Supply Chain platforms.
- Excellent Analytical, methodical, and resourceful approach to problem solving, identifying and documenting root causes and corrective actions to meet short- and long-term business and system requirements.
- Worked with Data Warehousing & Business Intelligence (BI) tools (business analytics, data mining, data visualization)
- Expertise in design and review of various documents including the Software Requirement Specifications (SRS), Business requirements document (BRD), Use Case Specifications, Functional Specifications (FSD), Systems Design Specification (SDS), Requirement Traceability Matrix (RTM) and testing documents.
- Experience in business analysis, operations management and development, design, documentation and testing.
- Skilled in implementation of data governance, master data management, ETL, data warehouse, data marts, reporting, dashboard, analytics, segmentation, and predictive modelling.
- Monitor and track progress, prepare status reports, coordinate tasks, and activities directed toward completing the project goals.
- Closely worked with product owners to ensure understanding of user stories and keeping the backlog groomed.
- Monitored the Sprint Burndown and conducted daily stand up, encouraging open communication in the team.
- Experience in reviewing Test Procedures, defining Test Scenario, Test Cases and support User Acceptance Testing.
- Close working experience with Agile team on tracking user stories through Agile accelerator.
- Experience in Creating Unified Modelling Language (UML) diagrams such as Use Case Diagrams, Activity Diagrams, Class Diagrams and Sequence Diagrams.
- Mastery in Gap Analysis, SWOT analysis and Risk Analysis.
- In touch with User Manuals, and Training Manuals as per Project Specifications and timelines.
- Proficient in analyzing and creating Activity, Sequence, Data flow and Business flow diagrams.
- Good knowledge in improvement strategies, Competitive & Profitability Analysis.
- Experience in Conducting & Facilitating Joint Application Design (JAD) sessions.
- Comprehensive experience with SDLC methodology (Waterfall) and Agile methodology (SCRUM).
- Experienced all Scrum ceremonies, Sprint Planning, Daily Scrums, Sprint review and Retrospective meetings.
- Excellent analytical, organizational, problem-solving and time management skills.
- Comprehensive experience in translating business requirements into functional requirements to assist developers.
- Experience in Project tools such as MS Project, MS Visio, JIRA and MS Office Suite Strong experience in conducting User Acceptance Testing (UAT) and documentation of Test Cases.
- Familiar with Epic, User stories, Tasks and Potentially Shippable Product.
- Good Team Building and Problem-Solving skills in conjunction with strong Management background.

Professional Experience

Sr. Business Analyst

Merck Pharma, Branchburg, NJ

June 2023 to Present

Responsibilities:

- Involved in Inception Phase and prepared vision statement and initial data models that contain Business Requirement Documents and supporting documents that contain the essential business elements and detailed definitions.
- Coordinate all Scrum Ceremonies including Sprint Planning, Daily Standups, Sprint retrospectives, Sprint Demos, Story Grooming, and Release Planning
- Liaison between developers and project stakeholders; fostering quality communication between engineering disciplines
- Assigned tasks among development team, worked with clients to better understand their needs and present solutions using structured SDLC approach.
- Gathered user and business requirements through open-ended discussions, brainstorming sessions and role-playing.
- Documented the user requirements Analyzed and prioritized them and converted them as system requirements that must be included while developing the software.

- Define Use Cases created Use Case diagrams, Scenarios and Use Case Narratives using the UML methodologies.
- Created Mock-up forms in MS word for better visualization and understanding of the software solution.
- Facilitate JAD sessions with management, development team, users & other stakeholders to refine functional requirements.
- Identify various frequently used modules within the application as well as peak user volume for load testing purposes.
- Used MS Visio for Process modelling, Process mapping and Business Process flow diagrams.
- Worked with multiple project teams of technical professionals through all phases of the SDLC using technologies including Erwin, Data Stage, Data Warehousing, Web sphere and Cognos.
- Performed extensive data modelling to differentiate between the OLTP and Data Warehouse data models.
- Develop High-level, Logical and Physical design for Database, Data warehousing and many Distributed IT systems.
- Data mapping, logical data modelling, created class and ER diagrams and used SQL queries to filter data within the database.
- Created, managed project templates, use case templates, requirement types and tractability matrix in Requisite Pro.
- Agile Assigned tasks among development team Managed workload, schedules and coordinated status review meetings with project managers, business managers and team members.
- Produce performance reports and implement changes for improved reporting. Interface with internal customers.
- Author progress and completion report which were then submitted to project management on a weekly basis in MS project.

Business Analyst

Macy's, New York, NY

November 2021 to May 2023

Responsibilities:

- Gathered and wrote functional & business requirements for multiple applications as well as collaborated with User Experience designers to develop wireframes that support such requirements.
- Analyzed inventory requirements from B2B & B2C clients and based on sales developed a process to optimize orders that needed to be fulfilled based on SKU dimensions, customer requirements and delivery requirements.
- Conducted Customer Service Operations and Supply Chain with the guidance of Product Manager.
- Translate Business needs into system Requirements, communicate with Business on a broader scale & with in-depth view.
- Participated in joint application development (JAD) sessions with stakeholders to capture business rules, business processes, and system requirements. Worked with key Business Stakeholders on developing system enhancements.
- Gather and decompose business requirements thru documentation, review meetings and workshops
- Lead the documentation of requirements, testing of the various interfaces as applicable and maintain other project management documentation such as fit/gap analysis
- Involved in Life Cycle a process improvement which includes Agile-Scrum, Scrum, Kanban, Helped the team to transition to the Scaled agile framework. (SAFe)
- Worked with Enterprise information architecture and data components of a Systems Development Lifecycle (ER diagrams, Data flow diagrams). Partnered with continuous product engineering teams on investigating systemic issues.
- Documented external interfaces (Wireframe), Business process and enterprise modelling/mapping artifacts including writing User stories, acceptance criteria, Functional requirement documents (FRD), System Requirement Specification Documentation (SRS). Worked with Quality Control Teams to develop Test Plan and Test Cases.
- Partner with business stakeholders to manage requirements reprioritization processes throughout the delivery lifecycle.
- Performed GUI testing and analyzed end-to-end functionality by testing the application manually.
- Partnered with the Technical Areas in the research and resolution of System and User Acceptance Testing.
- Analyzed the test results from QA teams using Performance Studio Analysis to create various scenarios.
- Used Agile methodology, utilized Software Development Life Cycle (SDLC) to develop process, standards procedures.
- Created business requirement documents and integrated the requirements and underlying platform functionality.
- Produced metrics which provide management insight into the requirements process, to include, status, size, volatility, quality, effort, etc. - Visio, Rational Tools, Traceability Matrixes.
- Created and executed SQL queries to find clues on what may be causing the opportunity.
- Participated in the Logical and Physical Design sessions and developed Design Documents.
- Worked on User Manuals, and Training Manuals as per Project Specifications and timelines.

Environment: SRS, FRD, Wireframe, SAFe, SQL, JAD, Gap Analysis, Fit and Impact Analysis, Design Sessions.

Business Analyst

Responsibilities:

- Interacted with Business Owners, Users, and Stakeholders to identify Business System Needs, evaluated solutions for business problems, and prepared Business Requirements Document (BRD) and later translated them into Functional Requirements Document (FRD).
- Represented business requirements in various views such as analysis models, process flow diagrams and user stories.
- Used prototypes for users to explain the intended systems Interface design and sign off documents.
- Conducted JAD sessions with management, SME, vendors, users and other stakeholders and gathered user and business requirements for the B2C and B2B web-based application.
- Analyzed the Data Entity Relationships and worked on Functional Requirements Document (FRD).
- Traced requirements throughout development process & verify adherence using Requirements Traceability Matrix (RTM).
- Responsible for conducting JAD Sessions with different IT Group department managers & refined the requirements.
- Complete ownership of data management, reporting activities for various clients using SQL Server and MSBI tools.
- Worked on custom reports and deployed them on server using SQL Server Reporting Services.
- Involved in performance modelling for the TO BE E-commerce portal.
- Worked closely with UI/UX teams providing suggestions flows based on as and when the UI was being developed.
- Conducted Gap Analysis to define the impact of the new requirements on the existing GUI and further prepared Business Impact Analysis Reports.
- Updated reports, queries, stored procedures using SQL Server Reporting Services.
- Gathering and documenting business cases, business rules & data mapping documents, workflows, wireframes, and mock-ups for trading strategies, enhancements to trading systems platform, and high-level requirements gathering for product development research.
- Extensively used tools such Rational Requisite Pro, UML, MS Visio, MS Project, MS Office, and MS Access.
- Involved in implementation of data governance, master data management, ETL, data warehouse, data marts, reporting, dashboard, analytics, segmentation, and predictive modelling.
- Collaborated with in-house and off-site teams, and vendors to successfully develop and manage user stories, sprints, design, development, and testing.
- Conducted Joint Application Development (JAD) sessions to allow different stakeholders to communicate with each other, resolve problems at an early stage.
- Responsible for Interacting with the Developers to explain the proposed changes and ensure understanding of the system requirements to handle these changes.

Environment: FRD, JAD, SME, RTM, Wireframe, SQL, Gap Analysis, Impact Analysis,

Business Analyst

Cybage Software Private Limited Hyd India

August 2017 to November 2018

Responsibilities:

- Accomplished whole System Development Life Cycle from requirement analysis till deployment, using highly efficient RUP process of software development.
- Responsible for defining the scope of the business, gathering business requirements, and documenting them in Business Required Document (BRD) and Functional Required Document (FRD).
- Worked with different business users to develop scope and vision document and Business requirement specification.
- Modeled the information and came up with the requirements prioritization.
- Participated in Business Modeling by understanding needs of business, and documenting Business and System Use cases.
- Assisted the team in eliciting, organizing, and documenting required functionality and constraints.
- Worked on RUP's development cycle with four consecutive phases - Inception, Elaboration, Construction, and Transition.
- Involved in preparing of the test plan/test strategy documents and assisted the Test Engineering Team in testing and tracking the defects in the application.
- Tested B2B and B2C websites, including creating test plan and test cases, executing test cases and defect management.
- Responsible for gathering requirements from users in operations group and performing data mapping for the application, confirm and vacillating the requirement at time of BA testing.
- Obtained Data requirements, identified data sources, determined the content of data fields and created Data Mapping Documents and performed Data Extraction and Data Compilation using SQL queries.

- Created Process Flow, Use Case, Class Diagrams and Interaction Diagrams using Microsoft Visio and Rational Rose.
- Maintained project plans, task, defect and issues lists, team meetings to discuss all aspects of the project's execution, developed test scripts, participated in the QA process, and developed training materials and system documentation.
- Facilitating workshops, JAD sessions, during inception of the new web-based application for the Portfolio Information.

Environment: BRD, FRD, RUP, SQL, defect, task, Business Modeling, Kanban, Jira.

Business System Analyst

IBing Software Solutions Private Limited Hyd India

April 2015 to July 2017

Responsibilities:

- Analyzed business in creating a program which evaluates and identifies leading network physicians and hospitals using quality and efficiency criteria based on evidence-based medicine across a broad spectrum of care.
- Created Business Requirement Documents and Functional Requirement Document.
- Performed Gap Analysis by identifying existing features and documenting the enhancements to meet the end state requirements.
- Co-authored Business Requirements Specification (BRS), Use Case Specifications, Systems Requirement Specification (SRS) and Change Request in collaboration with the Business Group and the IT project group members.
- Worked with the business community to define business requirements and analyze the technical solutions.
- Conducted sessions for Requirement gathering, Business Process flow, Business Process Modeling and Business Analysis.
- Designed and developed project document templates based on SDLC methodology.
- Facilitated Joint Application Development (JAD) sessions with user and IT group members.
- Collaborated with the QA team to develop the test plan, test conditions and test cases to be used in testing based on business requirements, technical specifications and/or product knowledge.
- Worked with several HIPAA teams addressing the specific requirements of each part of the HIPAA regulation.
- Used Quality center for writing test plan and managing and track requirements.
- Involved in comprehensive testing of the system (UAT) to check, if it satisfies functional specifications.

TECHNICAL SKILLS

- Presentation skills: Skilled public speaker/meeting facilitator with all facts of presentation tools.
- Project Metrics: Reporting, Communication, Scope, Schedule, Cost, Risk, Resource Management, Invoicing and Procurement, Contract Management
- Modelling Tools: Visio, UML, Snag-it, Balsamic, Jira, Confluence, SharePoint, rational, Postman, GitHub, CMS, Tableau, Wireframe, Azure DevOps, MS Planner, MS Teams, ANDI, NVDA, Salesforce, OneDrive, Microsoft Dynamics 365, Version One
- Tools: HP ALM & QC, HP Load Runner, Salesforce, Toad, Joomla, WordPress, Tumblr, Drupal
- Operations and Maintenance: Management, Contract development, stakeholder negotiation with Service Level agreements
- Methodologies: Champion of Agile principles, Kanban, Waterfall
- Quick document productions: BRD, Design, Workflows, UAT, Persona, System reference guides, Status reports, meeting minutes, Release plans, deployment plans, 508 Compliance document /testing
