

Professional Summary:

AEM Full Stack Developer with 6+ years of experience delivering enterprise-scale solutions using Adobe Experience Manager, Java/J2EE, and modern front-end frameworks. Skilled in developing AEM components, templates, workflows, Content Fragments, SPA Editor, and Edge Delivery Services (EDS), with strong expertise in Angular, TypeScript, React, and Spring Boot. Experienced in CI/CD automation, AWS and AEM Cloud deployments, and building scalable omni-channel applications in Agile environments.

Technical Skills:

CMS: Adobe AEM (6.4, 6.5, AEM as a Cloud Service, Edge Delivery Services), WordPress, Drupal

Languages: Java, J2EE, JSP, Servlets, SQL, PL/SQL, MySQL, TypeScript

Web Technologies: HTML5, CSS3, JavaScript (ES6+), jQuery, Bootstrap, AJAX, JSON, Alpine.js, Apache Sling

Frameworks/Libraries: HTL (Sightly), Sling Models, OSGi, Spring Boot, Angular, React.js, Node.js, Coral/Granite UI

Databases: Oracle, SQL Server, MS Access, MongoDB

CI/CD & Tools: Jenkins, Maven, Git, SVN, Docker, AWS Lambda, Eclipse, IntelliJ, CRXDE/CRXDE-Lite

Application Servers: JBoss, WebSphere, WebLogic, Tomcat

Cloud: AWS (EC2, S3, Lambda), AEM Cloud, Dispatcher

Testing/Automation: Selenium, Jenkins Pipelines, Automated Testing

Analytics/Marketing: Adobe Analytics, Adobe Target, Adobe DTM, Audience Manager, Google Analytics, SiteCatalyst, Web Trends

Design/Patterns: MVC, Singleton, DAO, DTO, Service Locator, Business Delegate

Additional Skills: REST APIs, SOAP/WSDL, OAuth, Token-Based Authentication, Agile/Scrum, UML

Operating Systems: Windows, MacOS, Unix, Linux

Professional Experience:

Client: City of New York

Feb 2024 – Present

Role: AEM Developer

Responsibilities:

- Designed and developed REST APIs using Java/J2EE and Servlets to integrate AEM with third-party applications and microservices.
- Built AEM Content Fragments and Nested Models for API-driven and omni-channel content delivery.
- Developed SPA Editor extensions using Angular with TypeScript, allowing content authors to manage structured and reusable front-end components.
- Implemented Adobe Edge Delivery Services (EDS) and Universal Editor workflows, enabling near real-time content publishing and sub-second rendering speeds.
- Configured AEM Launches and Multi-Site Manager (MSM) for global content rollouts across regions with minimal manual effort.
- Designed and optimized Dispatcher and CDN caching strategies, improving page load time and scalability.
- Created OSGi service components and Sling event handlers to streamline background tasks and event-driven processes.
- Developed custom AEM templates and responsive components ensuring mobile-first design standards.
- Configured Authoring/Publishing environments, replication agents, and Apache rewrite rules for robust deployments.

- Integrated DAM asset workflows, metadata tagging, and versioning strategies for effective asset management.
- Built reusable Angular modules and TypeScript services integrated with backend APIs.
- Configured Jenkins/Maven CI/CD pipelines, reducing deployment failures and improving release frequency.
- Implemented i18n strategies for multi-language accessibility and localization.
- Developed and deployed OSGi bundles ensuring modular and scalable architecture.
- Implemented SMTP configurations for reliable application email notifications.
- Designed UI components using HTML5, CSS3, JavaScript ES6+, Alpine.js, and jQuery aligned with modern front-end practices.
- Provided accurate effort estimates, prepared technical design documents, and implemented robust authorization logic.
- Utilized Git for version control integrated with Jenkins for continuous integration.
- Collaborated with cross-functional Agile teams, troubleshooting issues in builds, deployments, and production environments.
- Implemented Adobe Target integration with AEM for personalized and data-driven content delivery across customer segments.
- Monitored and troubleshoot application performance using AEM logs, Cloud Manager dashboards, and Splunk integration, ensuring high availability and reliability.

Environment: AEM 6.5, AEM as a Cloud Service, Edge Delivery Services (EDS), Angular, TypeScript, HTML5, CSS3, JavaScript ES6+, Alpine.js, jQuery, Apache Sling, OSGi, Spring Boot, Git, Jenkins, MSM, DAM, Dispatcher, SMTP.

Client: Rank Leisure Holdings

Oct 2021 – July 2023

Role: AEM Developer

Responsibilities:

- Designed and developed AEM templates, reusable components, and workflows supporting enterprise content solutions.
- Built headless AEM implementations with Content Fragments and Experience Fragments exposed via GraphQL APIs for structured content delivery.
- Integrated React-based SPA Editor with AEM, enabling real-time dynamic page authoring and headless content consumption.
- Developed custom OSGi services for content validation, transformation, and API responses.
- Configured multi-launch pipelines for automated and synchronized content delivery across global markets.
- Implemented AWS Lambda functions for real-time image transformation and CDN integration.
- Improved platform security by implementing OAuth authentication, API throttling, and token-based access controls.
- Integrated Adobe Analytics with AEM to track user interactions, measure KPIs, and optimize content strategies.
- Developed unit and functional test cases with JUnit and Selenium, ensuring stable deployments and reducing regression defects.
- Conducted AEM security audits and configured author/permission-based access controls.
- Designed and implemented RESTful services for integrations between AEM and external platforms.
- Built web pages using HTL (Sightly), JavaScript, HTML5, CSS3, Ajax, and Touch UI dialogs.
- Created dynamic server-side pages using JSP and Sling Models for business-specific needs.
- Worked extensively on Apache Sling, OSGi, Felix, JCR, and CRX for backend component development.
- Managed tar compaction, indexing, and application maintenance tasks for AEM repositories.
- Utilized Git for version control and integrated with Jenkins for CI/CD and nightly builds.
- Participated in Agile ceremonies, performed peer code reviews, and guided business stakeholders with POCs.
- Conducted training sessions for business users on AEM Author instance using Touch UI.
- Worked with Docker and Maven to containerize builds and streamline deployments.
- Collaborated with cross-functional teams to deliver proof-of-concepts and stakeholder demos.

Environment: AEM 6.5, React, CMS, GraphQL, Jenkins, Git, DAM, Apache Sling, OSGi, HTML5, CSS3, JavaScript, Ajax, REST, JSON, Docker, Maven, Java/J2EE, AWS Lambda.

Client: Redvue Technologies India Pvt Ltd

Jan 2019 – Sep 2021

Role: AEM Developer

Responsibilities:

- Create and maintain customer-facing Adobe AEM content management systems.
- Developed static and dynamic web pages, landing pages, and custom AEM components.
- Worked on a migration project from Drupal to AEM, ensuring data integrity and seamless transition.
- Worked extensively with Drupal for content management, module customization, and backend integrations before transitioning to AEM.
- Designed and implemented AEM components to replace Drupal-based content structures, ensuring enhanced functionality and user experience.
- Built reusable templates and workflows, reducing time to market for new content pages.
- Designed AEM-based loyalty marketing solutions, integrating with Adobe Digital Marketing Cloud tools.
- Automated repetitive tasks using advanced workflows and scheduled jobs in AEM.
- Implemented RESTful web services for seamless integration with external applications
- Developed the Mobile Application with the integrated knowledge of the web technologies like HTML5, CSS3, JavaScript, jQuery, AJAX, and JSON and Angular JS.
- Implemented monitoring and reporting through Web Analytics (Google Analytics / Webmaster Tools)
- Developed the customizable landing pages and AEM custom components.
- Experience in big data analysis and reporting using Adobe DTM Analytics, Adobe Site Catalyst, Business Objects, Web trends and Microsoft Cosmos
- Developed C-levels and executives for Adobe Digital Marketing Cloud, Target, Social, Experience Manager [AEM], Audience Manager, Campaign, Media Optimizer, and Primetime.
- Collaborated with business segments on digital and online marketing strategy.
- Utilized various JQUERY plugins to build Rich Internet Application (RIA) to make it look more intuitive. Involved in implementation of RESTful web service APIs using AJAX calls and JSON as data exchanging tool.
- Developed the web page code with high flexibility using the Document Object Model (DOM) i.e., removability and reinsertion of nodes is made easy.
- Experience in SOA (Service Oriented Architecture) and Web Services technologies (SOAP, WSDL, RESTFUL).
- Ability to develop quickly and with high quality via Sprints under the SCRUM methodology.

Environment: AEM 6.4, Jenkins, DTM, HTML5, CSS3, JavaScript, jQuery, Apache Sling, Web Analytics, JSP, AJAX, JSON, REST, Apache Felix.

Certifications:

- **Adobe Certified Expert – Adobe Experience Manager Sites Developer**
- **AWS Certified Solutions Architect – Associate**
- **Docker Certified Associate (DCA)**
- **Microsoft Azure Administrator Associate**

Education:

- **Master's in computer science, University of Central Missouri, Warrensburg, MO.**
 - **Bachelors in Computer Science, VVIT, AP.**
-
