Summary An experienced information technology leader specializing in staff and resources management, facilities management, hybrid and remote work, transitioning legacy systems to cloud services, mergers and acquisitions diligence and execution, large systems integrations, vendor management and cost reduction, and value stream analysis. I am comfortable communicating with junior resources to c-level and board members.

Experience **Senior Director of Information Technology** – Modern Campus (formerly OmniUpdate, Destiny Solutions, DIGARC, Presence, Augusoft, Signal Vine, and NuCloud) – Camarillo, CA(US) / Toronto, ON (CA) **September 2014 - Present**
Managing information technology and operations for a Software-as-a-Service (SaaS) provider serving seven major product lines to higher education.

- Reports to President/CEO technology operations, including strategic improvement, growth, and cost reduction targets.
- Recruit and manage engineers, administrators, project management, and helpdesk resources. Manage alignment and measurement to strategic targets.
- Oversee managed service providers and co-managed service providers for helpdesk, equipment provisioning and deprovisioning, and on-prem remote site and data center management.
- Work with Chief Product Architects, Chief Product Officer, R&D and DevOps leadership to provide products as a high-availability multi-tenant SaaS/Cloud platform and as well as single-tenant customer-hosted on-premise systems.
- Manage four IT service workflows and teams: DevOps Cloud/SaaS Services (customer multi-tenant products), Production IT Services (customer single-tenant products), Internal IT Systems and Helpdesk (corporate).
- Plan IT capital and operational expenses for integration to master annual corporate budget. Manage IT infrastructure, licenses, and payroll expenses.
- Standardize onboarding/offboarding processes with HR/PE for SOC compliance.
- Act as technology and infrastructure SME to RFP responses regarding in customer implementations.
- Implement DevOps tools and train on disciplines to receive Agile flows from Development and continually improve SaaS/Cloud products.
- Select and manage data centers, hardware, VoIP/Phone, connectivity, security, and cloud vendors.
- Oversee management of OU Campus / Omni CMS SaaS (CentOS/Apache/TomEE/Java/PostgreSQL, Juniper, Dell, EMC, vmWare) service to North American and international customers.
- Author and maintain systems, network, process and policy documentation for IT, Security, Customer Support and DevOps. Author and maintain information security policy.
- Participated in due diligence for mergers and acquisitions of various higher-education software companies including integrations of various functional systems, vendor consolidations, and staff re-organizations.
- Supported staff and operations through three CEO and two majority ownership transitions.
- Oversaw Microsoft Active Directory / 365, Atlassian, Salesforce, ZenDesk, Zoom, phone systems migrations and consolidations.
- Participated in Private Equity Ownership's Technical Advisory Office and educational summits.
- Scaled and merged IT services through growth and acquisitions from a company of 50 staff to 400+ staff through 6 acquisitions in US and Canada, continuing to maintain a low IT headcount.
- Managed office facilities selections, openings, closings, expansion, TI, and space reductions.
- Oversaw mandated work-from-home during Covid Pandemic, including rapidly changing equipment logistics and helpdesk support operations. Continue to oversee supporting work-from-home and hybrid facilities.
- Implemented change control systems and procedures for internal and customer production systems.
- Participated in C-level staff selection, investor selection and due diligence processes.
- Refined existing ZenDesk ticketing system, implemented dedicated ticketing systems for IT and HR/Facilities Management.
- Oversaw in-production network, compute and storage upgrades to HA SaaS infrastructure.
- Oversaw selection, testing and implementation of log aggregation, SIEM, access control, inventory/asset management, networking/wireless, phone/VoIP, video conferencing, printing, and DVR/cloud security systems.

Director of Information Technology Operations – Music Reports, Inc. – Los Angeles, CA **June 2009 – July 2014**
Managed IT/IS personnel for a music licensing and royalties accounting firm serving digital music customers including satellite, streaming, download, consumer experience, television and radio stations, record labels and publishers.

- Provided business development support in BPO transition plan authoring, systems, interfaces, EDI and process analysis, RFP responses, and on-boarding management for customers including Microsoft, Apple, SiriusXM and Cirque du Soleil.
- Authored critical paths, GANTT charts, diagrams, SLA/SLM, and process documentation.
- Managed SSAE16 audits and testing. Authored org chart, job descriptions, policies and procedures, information security policy, change control and business continuity documents.
- Lead OPS-COM cross-department team to define and author systems, processes and personnel documentation.
- Outsourced back-office operations including transactional printing and mailing, imaging and archiving, and royalty distributions via EFT/ACH, check, wire and international payments.
- Developed, deployed and administrated web documentation system using Plone CMS and Nginx on FreeBSD and OpenSuse systems.
- Authored Perl and Bash administration and data transformation scripts on FreeBSD and OpenSuse.
- Administrated Zimbra Collaboration Server (Postfix MTA, Tomcat, OpenLDAP), Samba, Active Directory, NFS exports, FTP/SFTP services and thin internal Java applications via Xming for Windows customers.

Director of Information Technology – AGI/MailMax Direct (now Integ) – Waco, TX **March 2003 – May 2009**
Managed IT staff in development, data processing, and digital imaging operations for a printing and mailing service bureau with facilities in the Austin, Temple, Waco, Tyler and Dallas/Fort Worth areas.

- Developed transactional and variable data print applications using Objectif Lune PlanetPress, Postscript, PCL, PDF, raster OCR automation (Tesseract OCR) and UNIX printing technologies (LPD/LPR, Xerox DocUSP/SunOS/Solaris, FreeBSD).
- Designed "TrackMax" real-time parcel tracking application, including web interface, mobile barcode scanning and signature capture devices using FLPR stack (FreeBSD/Lighttpd/PostgreSQL/Ruby on Rails). Deployed and remotely administrated multiple TrackMax installations (FreeBSD/Solaris/Sun Ray) in customer facilities across Texas including the Texas Department of Human Health Services, the Texas Department of Transportation, the University of Texas at Austin, Baylor University, and St Edwards University.
- Managed SAS 70 audits, vulnerability assessments and penetration tests. Authored information security policy, change control and business continuity documents.
- Authored RFP bids and responses to state and federal government, higher education, health, banking and financial industries including custom data transformation development and/or mail facilities management.
- Administrated Zimbra Collaboration Server, Postfix MTA, PostgreSQL, MySQL, Microsoft SQL, FTP/SFTP, Apache, IIS, Samba, NFS, Active Directory and ZoneMinder on Windows 2000/2003 Server, FreeBSD and Ubuntu servers.
- Authored document image transformation system using open source OCR, Postscript, PCL and image conversion toolkits.

Web Developer / Co-Owner – Amerisale, Inc. – Austin, TX **August 1996 – February 2003**
Co-founded web services start-up for real estate and automotive industries.

- Designed and developed web database application including integration with television affiliates KEYE 42 CBS/Austin, KJTV 34 FOX/Lubbock and KHOU 11 CBS/Houston.
- Lead 5 developers on subsequent releases, maintenance and deployments.
- Lead development for patented real-time automotive inventorying system "DynaPic", including image capture and VIN decoding using Borland C, Watcom/TCP and video frame-grabber libraries.
- Developed Perl and ASP web applications on the Microsoft NT, SQL Server, MTC and IIS platform. Authored Visual Basic COM objects, TSQL stored procedures and transaction balancing architecture.
- Administrated BIND, Apache, IIS, FTP, Sendmail, Qpopper, Exchange, Microsoft SQL, Microsoft Access, Windows NT Server and Red Hat Linux systems.

Systems Administrator / Technical Support Manager – Reallink, Inc. – Austin, TX **December 1995 – August 1996**
Performed systems administration and technical support for ISP start-up for the real estate industry.

- Performed system administration for servers, networking, modem banks, ISDN and T1 lines, and routers.
- Managed and performed connectivity, browser, email and web site technical support.
- Authored end-user connectivity distributions, setup and troubleshooting manuals.
