MTS Domain Architect

With over 13 years of experience, I am a Senior Solutions Architect skilled in Hybrid and AWS Cloud System and Infrastructure Design, migration, K8s APIs, and Microservices.

WORK EXPERIENCE

T-Mobile • Denver, CO, USA • 08/2024 - Present

QA Engineer and Analyst • Contractor

- Designed Testing Cases and System analysis of T-Life Mobile Applications utilizing in Depth Knowledge of over a decade of experience in the Telecommunication Industry to ensure the top quality of the application, HSI and success of the platform.
- Tests and ensure the T Life and HSI Products are launched during all releases securely and efficiently and are of the best quality available to our customers and meet the highest standards for Gateway Software and Firmware Integration.
- Leverage Deep Architectural knowledge of Core Cable/Broadband/Mobile to ensure T Life/Flagship Applications Releases were successful and any Edge Case Scenarios were found or addressed within a timely manner.

Charter Communications • Greenwood Village, CO, USA • 04/2014 - 07/2023

Lead Architect and Principal II Engineer • Full-time

- Led the Architecture and Design of the Spectrum Mobile Native Application Greenfield for Launch of Mobile Line of Business leading to successful on Target Launch and Integration of Core Cable Broadband Systems.
- Designed our AWS Cloud based Infra Backend with K8s APIs and Micro services, resulting in a 44% increase in system performance and nearly 30% cost reduction post-migration.
- Led the design and implementation of the Identity Management Systems for Core Cable and Mobile Lines of Business for our Self Service Apps and Portals.
- Led the design and API implementation of Self Service Spectrum Mobile Portal resulting in modernized cloud-based architecture, reducing costs by 20% in 6 months.
- In a Scaled Agile Environment, leveraged TOGAF and C4 Architectural Best Practices to design cloud based infrastructure as Code including ETL Jobs for Data Ingestion and data extraction.
- Crafted vision documents and other artefacts to effectively communicate and champion the architecture, facilitating the widespread adoption of the architectural strategy. This streamlined decision-making and accelerated project timelines.

Cgi Federal • Lebanon, VA, USA • 07/2012 – 04/2014

Automation Qa Engineer

- As a test script creator on the Momentum Automation Team, I worked to develop new automated testing scripts to provide quality test scenarios within the Momentum project. This work included the use of the following tools and skill sets : regression testing, defect testing, Java scripting, Access DB, IBM Rational, IDEs, Selenium and Xstudio
- Selenium, we created a framework that invokes the ability to kick off large regression suites testing most scenarios in the momentum software upwards of ive thousands test scripts. This included the use of SQL test; all being kicked off utilizing

EDUCATION

Bachelor's Degree In Business Administration Focus In Information Systems/Computer Science

Radford University • Radford, VA, USA • 05/2012

SKILLS

Agile Software Development, Amazon Web Services, Android, Angular Web Framework, Apache Hadoop, Apache Tomcat, API Design, Application Programming Interface, Application Service Provider, Articulate, Automation Testing, Best Practice, Big Data, Black Box Testing, Build Automation, Business Development, Business Goals, C#, Career Development, Communication, Computer Technology, Conferences and Events Representative for Spectrum Mobile – Mobile World Congress – Americas, Content Management System, Coordination, Corporate Real Estate, Cost Management, Data Manipulation Language, Design Scripts, DevOps Operations, Docker Software, Emerging Technologies, Engineering Design Process, Enterprise Architecture Framework, Entrepreneurial Spirit, Environmental Testing, Gradle, GraphQL, Groovy Language, IBM Rational Suite, Identity Management, Inclusive, Innovation, Interpersonal Skills, Java, Java Platform Enterprise Edition, JavaScript, Jenkins, JIRA, Kanban, Kotlin, Kubernetes, Leadership, Lead Others, Linux, Logstash Software, Lucid Chart Web Services Design, Macintosh Operating Systems, Manual Testing, Microsoft Access, Microsoft Excel, Mobile Application, Motivation, Node.JS, Object Oriented Programming, Operating System, Operations Support System, Organization Development, Precise, Project Leadership, Python, Quality Control, Rational, Regression Testing, Release Testing, Representational State Transfer, Requirements Elicitation, Scenario Testing, Scrum Methodology, Selenium, Service Development, Simple Object Access Protocol, SoapUI, Software Architecture, Software Development Life Cycle, Software Engineering, Solution Development, Solutions Architecture, Sprint Planning, SQL, System Design, Teamwork, Technical Documentation, Technical Writing, Terraform, Test Environment Management, TestRail, Test Script, Test Suite, The Open Group Architecture Framework, Thought Leadership, User Interface Design, Visual Basic, Web Service, Web Services Testing, 2 Sided Marketplaces , AIOps and Monitoring Technology, Software Architecture
