

Skanda Shreekar Sira Prabhakar

Mail: - skanda0416@gmail.com | Ph.: (557) 201-1236 | [LinkedIn](#)

PROFESSIONAL SUMMARY:

Cloud Engineer with 5+ years of experience designing, automating, and administering Microsoft Azure environments. Skilled in Infrastructure as Code (Terraform, Bicep, ARM Templates) and CI/CD automation with Azure DevOps, Jenkins, and GitHub Actions. Strong expertise in Kubernetes/AKS, Docker, and Helm for scalable deployments, alongside Azure administration (VMs, AAD, RBAC, Conditional Access, Backup, Site Recovery). Adept at implementing security controls, monitoring, and cost optimization while ensuring compliance with HIPAA, PCI DSS, and ISO 27001. Proven track record in reducing infrastructure costs, accelerating deployments, and enabling high-availability cloud solutions across healthcare and financial domains.

TECHNICAL SKILLS:

Cloud Platforms:	Microsoft Azure, AWS (basic exposure), GCP (basic exposure)
Infrastructure as Code (IaC):	Terraform, Bicep, ARM Templates, Ansible, Azure CLI, PowerShell
CI/CD & DevOps:	Azure DevOps (Repos, Pipelines, Artifacts, Branch Policies, Service Connections), Jenkins, GitLab CI/CD, GitHub Actions
Containerization & Orchestration:	Docker, Kubernetes, AKS, GKE, ECS, ECR, Helm, Kustomize
Security & Compliance:	Azure Active Directory, Conditional Access, MFA, RBAC, Managed Identities, NSG, Azure Firewall, Bastion, Defender for Cloud, Key Vault
Monitoring & Logging:	Azure Monitor, Log Analytics, Application Insights, Prometheus, Grafana, ELK (Elasticsearch, Logstash, Kibana)
Networking:	VNets, VPN Gateway, ExpressRoute, App Gateway, DNS, Load Balancer, Firewall Rules
Database & Storage:	Azure SQL, Azure Storage Accounts, Blob, Backup Vault, Site Recovery, PostgreSQL on Azure
Serverless & Automation:	Azure Functions, AWS Lambda, Python Scripting
Data Engineering & Analytics:	Azure Synapse Link, Power BI Embedded, Cloud Composer (Apache Airflow), Pub/Sub, ETL Pipelines, Vertex AI, BigQuery ML
Healthcare & Compliance Standards:	FHIR, HL7, PHI, HIPAA, ICD, HITECH, Dodd-Frank, SOX, GLBA, CFPB, FFIEC, RBI
Version Control & Collaboration:	Git, GitHub
Scripting & Programming Languages:	Python, YAML, Bash
Business Intelligence & Visualization:	Power BI, Grafana
Backup & Disaster Recovery:	EBS Snapshots, S3 Glacier, Multi-AZ Deployments

PROFESSIONAL EXPERIENCE:

Centene Corporation – MO | Cloud Engineer

May 2024 - Present

- Containerized healthcare applications using Docker, secured container images with Trivy, and deployed workloads to ACR-integrated AKS clusters via Helm and Kustomize.
- Implemented centralized observability with Azure Monitor, Log Analytics, and Application Insights, leading to a 38% faster resolution of production incidents.
- Established CI/CD pipelines in Azure DevOps with YAML automation for microservices, incorporating SonarQube and Aqua Trivy scans to ensure robust code quality and security.
- Introduced Prometheus and Grafana integration with AKS, enabling proactive anomaly detection and real-time alerting on mission-critical clinical workloads.
- Developed and applied modular Terraform and Bicep templates for automated Azure resource provisioning, decreasing deployment lead times by 43%.
- Deployed Azure Bastion, NSGs, and Azure Firewall to strengthen layered perimeter defense across VNets, ensuring zero unauthorized access events.
- Configured Power BI Embedded dashboards connected via Synapse Link, empowering 300+ clinicians with secure self-service analytics.
- Executed migration of legacy on-premises healthcare workloads to Azure App Services and VMs using Azure Migrate, reducing infrastructure costs by 22% and boosting performance by 35%.
- Designed and enforced RBAC policies, Managed Identities, and Private Endpoints to safeguard PHI data, achieving full HIPAA compliance.

- Integrated Azure FHIRServer with IoMT Connector for continuous patient vitals ingestion, delivering 99.9% uptime and seamless HL7/FHIR interoperability.

Cognizant- India | Cloud Engineer

June 2019 – July 2023

- Designed and deployed a secure, scalable Azure cloud infrastructure for a financial services platform by configuring multi-region VNets, encrypted managed disks, Blob Storage with versioning and lifecycle policies, Azure SQL Database with high availability, and granular RBAC roles, ensuring compliance with RBI standards.
- Automated Azure environment provisioning and configuration using ARM Templates and Ansible, reducing deployment time by 40% and ensuring consistent setups across Development, Test, and Production.
- Led the migration of a 50-server on-premises data center to Azure, lowering infrastructure costs by 25% through right-sizing VMs and leveraging Reserved Instances for predictable workloads.
- Implemented CI/CD pipelines in Azure DevOps with automated builds, testing, and releases, enabling microservices delivery with rollback capabilities and continuous integration.
- Improved application performance by 15% through optimization of Azure Virtual Machines, tuning workload configurations, and applying autoscaling policies with Virtual Machine Scale Sets to handle traffic peaks.
- Tuned performance of Azure SQL Database and PostgreSQL on Azure via query optimization, indexing strategies, and the use of read replicas, delivering a 20% boost in query execution.
- Built reliable backup and disaster recovery strategies using Azure Backup Vaults and Site Recovery, with archival storage on Blob Archive tier, ensuring continuity and validated DR drills.
- Created Python automation scripts for NSG rule adjustments, VM lifecycle operations, and cost optimization; also leveraged Azure Functions for serverless automation, improving efficiency by 30%.
- Deployed containerized workloads with Azure Kubernetes Service (AKS) and Azure Container Registry (ACR), ensuring scalable, high-availability clusters integrated into CI/CD workflows.
- Enforced continuous compliance by configuring Azure Policy, Microsoft Defender for Cloud, and Compliance Manager, automating monitoring and remediation aligned with RBI, PCI DSS, and ISO 27001.
- Utilized Azure Management Groups and Landing Zones to enforce governance, security guardrails, and centralized billing across Development, UAT, and Production subscriptions.
- Implemented end-to-end monitoring and logging with Azure Monitor, Log Analytics, Application Insights, and ELK Stack, enabling proactive system tuning, security detection, and audit reporting.

CERTIFICATIONS:

Azure 900: Azure Fundamentals

DP 900: Azure Data Fundamentals

AI 900: Azure AI Fundamentals

AZ 104: Azure Administrator Associate

EDUCATION:

Master of Science in Computer Science

Northwest Missouri State University — Maryville, MO | *Aug 2023 – Dec 2024*

Bachelor of Technology in Computer Science

Jawaharlal Nehru Technological University — Hyderabad, India | *Aug 2015 – Jun 2019*
