Data Engineer

Bentonville, AR | +1 (682) 300 1250 | ghinaiyadivyaben92@gmail.com | [LinkedIn](#)

SUMMARY

Data Engineer with 5+ years of experience designing, developing, and managing large-scale data platforms and pipelines across cloud and on-premise environments. Expertise in big data frameworks including Apache Spark, Hadoop, Hive, PySpark, and Snowflake, enabling efficient processing of multi-terabyte datasets. Skilled in ETL orchestration using Apache NiFi, Kafka, Airflow, SSIS, Talend, and Informatica to build robust, fault-tolerant data workflows. Proficient in Python, R, SQL, Scala, and Java for data transformation, analytics, and machine learning applications, leveraging libraries such as NumPy, Pandas, TensorFlow, and Scikit-learn. Experienced in cloud platforms including AWS, Azure, and GCP, optimizing storage, compute, and serverless solutions for scalable data processing. Well-versed in database management, data visualization, and DevOps practices. Adept at building data-driven solutions that enhance operational efficiency, support AI/ML initiatives, and deliver actionable business insights.

SKILLS

Methodologies: SDLC, Agile, Waterfall

Programming & Scripting: Python, R, SQL, SAS, Scala, Java, Golang

Big Data & Distributed Systems: Apache Spark, Hadoop, HDFS, Spark, Hive, Pig, MapReduce, PySpark, Snowflake, Sqoop, Bash Shell Scripting Language, Cassandra, Filezilla, pig

ETL & Data Orchestration: Apache NiFi, Apache Kafka, Apache Airflow, SSIS, Talend, Informatica

Cloud Platforms: AWS (S3, Redshift, Glue, EC2, Lambda), Azure (Data Factory, Databricks, Blob Storage), GCP (BigQuery, Cloud Storage), Dataproc, DataFlow, Composer, CloudFormation, GCS, Big Table, Cloud Function

Databases: MySQL, SQL Server, PostgreSQL, Oracle, MongoDB, DynamoDB

Data Visualization & BI: Tableau, Power BI, SSRS

Data Science & ML Libraries: NumPy, Pandas, Matplotlib, SciPy, Scikit-learn, TensorFlow, Seaborn

Machine Learning Algorithms: Regression, Random Forest, Logistic Regression, k -Means, Clustering, SVM, Classification, KNN, Deep Learning, Artificial Intelligence, Collaborative Filtering, Neural Networks, HuggingFace

Version Control & DevOps Tooling & Other: Git, GitHub, GitLab, CI/CD for Data Pipelines, Jenkins, Docker, Kubernetes, Ansible, Maven, Confluence

Operating Systems: Linux, Ubuntu

EXPERIENCE

Walmart Global Tech

Dallas, Texas

May 2023 - Current

Data Engineer III

- Designed and implemented end-to-end ETL pipelines using Apache Spark (Scala and PySpark), enabling efficient data flow from GCS to BigQuery through Dataproc clusters while ensuring scalability and reliability.
- Automated critical Point of Sale data workflows and orchestration using Apache Airflow, including environment setup, migration from atomic jobs, and integration of Pub/Sub notifications for real-time updates.
- Conducted modelling techniques based on business requirements and optimized cluster spin-up processes to align with varying data load and resource needs.
- Designed and implemented end-to-end ETL pipelines using Apache NiFi, Apache Airflow, and Talend, processing over 2TB of structured and unstructured data daily for analytics and reporting platforms.
- Improved data retrieval performance by 25% through optimization of complex cost-effective SQL queries for data manipulation and Spark job tuning, enhancing pipeline efficiency and reducing processing times.
- Developed and implemented Data Quality (DQ) rulesets with automated data quality checks, validations and performance reports to ensure 99% data accuracy across production and development environments.
- Built and optimized CI/CD pipelines using tools like Jenkins and Concord, enabling single-click deployments and ensuring seamless production releases.
- Conducted comprehensive E2E testing, including regression, functional testing, unit testing in Ensure testing frameworks and UAT sign-off, addressing issues and implementing fixes to ensure production stability.
- Led the migration of workflows from atomic systems to Airflow, resolving Looper build issues, ensuring environment consistency, and improving job orchestration.
- Provided ongoing support and onboarding for new team members, ensuring knowledge transfer and day-to-day operational efficiency while collaborating with Data Stewards for business solutions.
- Maintained version control, CI/CD pipelines, and DevOps practices using Git, Jenkins, Docker, Kubernetes, Maven, and Ansible, reducing deployment time by 40% and improving reproducibility of data workflows.
- Implemented cost optimization strategies for large-scale data platforms by leveraging efficient storage formats, compute resource tuning, query optimization, and data lifecycle running to reduce operational expenses and improve performance.

TekInvaderz LLC (Client- Walmart Global Tech)**Dallas, Texas****Jun 2022 - May 2023****Data Engineer**

- Designed and implemented end-to-end scalable data integration pipelines using Python, Apache Airflow, and Google Cloud Platform (GCP) services (BigQuery, Cloud Storage) to ensure reliable metadata, data ingestion, and orchestration.
- Migrated on-premises systems to GCP using BigQuery Transfer Service and Dataflow, with comprehensive end-to-end data validation post-migration using dbt and PyTest, ensuring zero data loss and 30% improvement in data quality.
- Enhanced pipeline performance using Spark Scala, optimizing ETL workflows for large, high-scale applications and improving data processing systems efficiency through partitioning, clustering, and execution plan tuning.
- Built automated CI/CD deployment pipelines using Jenkins, Concord, and Terraform, enabling seamless production deployments and infrastructure-as-code practices.
- Constructed and optimized big data processing workflows on Apache Spark, PySpark, and Hadoop, reducing batch job execution time by 35% while handling multi-terabyte datasets.
- Optimized real-time data retrieval by caching BigQuery query compilers result in Redis, enabling near-instantaneous access to analytics data for REST APIs and data visualization tools like Tableau and looker for business intelligence data.
- Resolved critical pipeline failures, including Looper build issues, and orchestrated workflows using Atomic Automation to improve scheduling efficiency and reduce pipeline downtime.
- Authored and optimized BigQuery SQL queries using advanced techniques such as window functions, CTEs, and execution plan tuning, reducing query latency and operational costs by 30%.
- Applied best practices in data governance for access control, differential privacy techniques for data security to anonymize sensitive and retail finance data, reducing compliance risks by 30% while maintaining analytical utility.

Tech Holding Pvt. Ltd.**India****Nov 2018 - Oct 2020****Data Engineer**

- Automated data ingestion workflows to load data from UNIX file systems into on-premises Hadoop clusters using Sqoop, PySpark, and Hive for seamless data transformation.
- Understood design patterns and developed scalable ETL pipelines leveraging the Hadoop ecosystem for reliable data cleaning and transformation and distributed data storage.
- Created PySpark scripts to process and transform large datasets in formats such as CSV, JSON, Parquet, ORC, and Text, utilizing Spark libraries for efficient parsing and data handling.
- Engineered real-time streaming data pipelines using Apache Kafka, achieving 99.9% data reliability and enabling near real-time analytics for business operations.
- Used managed and external Hive tables to optimize data storage and querying while performing advanced transformations with Hive and MapReduce.
- Scheduled and automated data ingestion workflows using cron jobs in UNIX environments, improving operational efficiency and reducing manual intervention.
- Identified and resolved critical issues in existing data ingestion pipelines, collaborating with external teams to manage firewall requests and ensure secure data traffic from source systems.
- Experience designing and building distributed data infrastructure at scale, ensuring high availability, scalability, and performance across large, complex data ecosystems.
- Optimized databases and warehouses including MySQL, PostgreSQL, and Oracle, enhancing query performance by 40% and ensuring high availability for business-critical applications.
- Effectively communicated complex concepts through strong written and verbal communication skills, collaborating with cross-functional teams and executive leadership to align solutions with business objectives.
- Created detailed technical documentation, including data flow diagrams, user guides, and technical specifications for complex ETL processes, pipeline configurations, and workflows, ensuring clarity and ease of understanding.

EDUCATION**Master in Computer Science****Dec 2022**

University of North Texas (UNT)

Denton, TX, USA

Master in Computer Application (MCA)**Jun 2016**

Uka Tarsadia University (UTU)

Bardoli, Gujarat, India

Bachelor in Computer Application (BCA)**Jun 2014**

Veer Narmad South Gujarat University

Gujarat, India

CERTIFICATIONS

- Astronomer Certification for Apache Airflow Fundamentals
- Distributed Computing with Spark SQL
- Social Media Data Analysis
- DevOps, Cloud and Agile Foundations Specialization
- Programming for everyone - Python
