

Ethan Harris

Senior .NET Engineer | Full Stack Developer

📍 Burnsville, NC | 📞 (678) 912 9909 | ✉️ ethanwsharris@gmail.com | 🌐 [LinkedIn](#)

Summary

Senior .NET Engineer with 10+ years of experience designing and building scalable enterprise applications using **ASP.NET Core, C#, and .NET 6/7**. Skilled in developing RESTful and GraphQL APIs, integrating **Python and Node.js microservices**, and delivering responsive web solutions with **React and Angular**. Proficient in **SQL Server, PostgreSQL, MongoDB, and Redis**, with hands-on expertise deploying to **Azure and AWS cloud environments**. Strong background in **CI/CD automation, Docker, Kubernetes, and automated testing (JUnit, xUnit, Jest, Cypress)**. Proven track record of modernizing legacy systems, improving performance, and leading full-stack development initiatives from design through deployment.

Technical Skills

- **Languages & Frameworks:** C#, ASP.NET Core, .NET 6/7, Python, Node.js, JavaScript/TypeScript, React, Angular
- **Databases:** SQL Server, PostgreSQL, MySQL, MongoDB, Redis
- **Cloud Platforms:** Azure (App Services, Functions, SQL Database, Blob Storage), AWS (EC2, S3, Lambda)
- **Testing & Tools:** NUnit, xUnit, Jest, Mocha, Cypress, Postman, Swagger
- **Other Tools:** Git, Docker, Kubernetes, CI/CD (Azure DevOps, GitHub Actions, Jenkins), REST APIs, GraphQL

Professional Experience

Senior .NET Engineer

WTI Wireless | Apr 2023 – Present

- Designed and implemented scalable **ASP.NET Core microservices** for telecom applications with RESTful APIs.
- Optimized system performance by integrating **Redis caching** and **asynchronous programming patterns**.
- Built CI/CD pipelines in **Azure DevOps** to streamline deployments and reduce downtime.
- Migrated legacy .NET Framework applications to **.NET 6**, improving stability and performance.
- Integrated **Python services** for data analysis and reporting pipelines.
- Collaborated with front-end teams using **React and Angular** to deliver responsive UIs.
- Implemented **unit and integration testing** strategies using NUnit and xUnit to improve code reliability.

.NET Developer

RideYellow (NTS) | Apr 2020 – Mar 2023

- Developed ride-hailing platform features using **ASP.NET Core Web APIs** with real-time notifications.
- Implemented payment processing and geolocation services with **Node.js microservices**.
- Created **React.js dashboards** for drivers and administrators.
- Leveraged **SQL Server and PostgreSQL** to manage transactional and analytical data.

- Deployed services on **AWS (EC2, RDS, S3, Lambda)** ensuring high availability.
- Applied **Jest and Cypress** to validate front-end functionality and automated workflows.
- Optimized query performance with indexes and stored procedures, reducing response time by 40%.

Full Stack Developer

Lasa Health | *Sep 2018 – Apr 2020*

- Built **full-stack healthcare applications** with ASP.NET Core backends and **Angular frontends**.
- Integrated third-party APIs for patient data, payments, and scheduling.
- Developed **GraphQL endpoints** for efficient mobile and web app data retrieval.
- Designed and optimized **NoSQL databases (MongoDB)** for patient record storage.
- Containerized services with **Docker** and orchestrated deployments using **Kubernetes**.
- Implemented **automated testing pipelines** with Mocha and NUnit, ensuring HIPAA compliance.
- Supported real-time chat and notifications with **SignalR**.

Software Developer

Coco & Jay | *Jan 2015 – Sep 2018*

- Created e-commerce solutions using **ASP.NET MVC** and **Entity Framework**.
- Designed REST APIs consumed by **AngularJS frontends**.
- Enhanced reporting features with **Python scripts** for analytics and business insights.
- Developed scalable **SQL Server schemas** with stored procedures and triggers.
- Automated deployment pipelines with **Jenkins** for consistent releases.
- Built unit and UI test suites with **xUnit and Selenium**.
- Collaborated closely with clients to gather requirements and implement features iteratively.

Education

East Carolina University – Greenville, NC

Bachelor's Degree in Computer Science (2010 – 2014)
