

Breanna Adams

CYBER SECURITY ANALYST/ENGINEER

WASHINGTON, DC | 240-375-5044 | Breannaadams2017@yahoo.com

PROFILE SUMMARY

Former law enforcement officer turned cybersecurity professional with a strong foundation in investigations, evidence handling, and incident response. Skilled in leveraging Splunk, Azure Sentinel, Microsoft Defender, Cisco ASA, Palo Alto firewalls, Corelight IDS, and Rapid7 InsightVM to detect, investigate, and remediate threats. Adept at developing runbooks, tuning detections, and collaborating across teams to improve security posture. Recognized for investigative rigor, organizational skills, and a proven ability to translate law enforcement discipline into effective cyber defense operations.

AREAS OF EXPERTISE

Tools: Splunk, Azure Sentinel, Microsoft Defender XDR, CrowdStrike Falcon, Cisco ASA, Palo Alto NGFW, Corelight IDS, Zeek, Suricata, Wireshark,

Vulnerability Management: Rapid7 InsightVM, Tenable Nessus

Threat Intelligence: MISP, OTX, AbuseIPDB

Scripting & Automation: Python, PowerShell, Bash

Email Security: PhishER, Microsoft 365 Security

EXPERIENCE

Metropolitan Police Department
Jr Cyber Security Engineer

March 2019 – Present
Washington, DC

- Investigated incidents across Splunk and Azure Sentinel, correlating EDR, firewall, and IDS data to identify credential theft, lateral movement, and exfiltration attempts.
- Leveraged Corelight IDS and firewall logs to trace abnormal DNS traffic, uncovering an attempted data exfiltration campaign and coordinating containment with the networking team.
- Used Microsoft Defender for Endpoint to isolate compromised machines, trace attacker movement, and assist with endpoint recovery.
- Tuned rules on Cisco ASA and Palo Alto firewalls, reducing false positives and strengthening perimeter defenses.
- Conducted vulnerability scans using Rapid7 InsightVM, validated findings, and partnered with IT to remediate exploitable CVEs.
- Authored SOC runbooks for phishing, malware, and brute force investigations, enabling Tier I analysts to handle cases independently and improving consistency across the SOC.
- Produced daily SOC turnover reports, ensuring continuity of investigations across shifts.
- Automated repetitive investigative tasks (IOC lookups, enrichment) using Python and PowerShell, reducing analyst workload.
- Assisted detection engineering team in migrating key use cases and dashboards; validated alert fidelity in Sentinel against Splunk to ensure no coverage gaps. Authored new KQL detections for brute force (T1110) and phishing attempts (T1566).
- Partnered with network engineers to deploy Corelight sensors; mapped Zeek logs into Splunk indexes, created parsing rules, and tested IDS alerts against known attack traffic to validate coverage.
- Participated in endpoint migration from legacy antivirus to Defender; verified sensor deployment across endpoints, tuned initial policies, and created dashboards in Sentinel for endpoint health monitoring.
- Helped standardize credentialed scan rollout; worked with system owners to provide credentials, validated results
- Microsoft OS for Workstations/Servers, UNIX, firewall multi-layer design and implementation, WANs, LANs, internet, intranets, and network protocols

- Comprehensive knowledge of network architectures, equipment, and designs.

Metropolitan Police Department
Police Officer

May 2016 – March 2019
Washington, DC

- Protected life and property through enforcement of laws and proactive patrols of assigned areas.
- Responded to urgent calls for service and critical incidents, coordinating with multiple agencies under pressure.
- Conducted preliminary and follow-up criminal investigations, including fraud and digital evidence cases, applying forensic methodology and chain-of-custody principles.
- Interviewed witnesses and suspects to gather intelligence and corroborate investigative findings.
- Authored detailed investigative reports and field notes to ensure accuracy, accountability, and compliance with legal standards.
- Executed arrests and processed suspects in accordance with established procedures and policies.
- Testified in court proceedings, presenting investigative findings to diverse audiences.
- Commanded emergency personnel during accidents, disasters, and crisis events requiring rapid incident response.
- Exercised judgment in high-stakes situations, determining the appropriate use of force and risk-based decision-making.
- Operated law enforcement vehicles under emergency conditions, day and night.
- Interpreted and executed legal documents, including citations, affidavits, and warrants.
- Took an active role in Community Oriented Policing initiatives, fostering collaboration and safety awareness.
- Self-initiated traffic and criminal investigations to proactively identify and mitigate risks.

The Tatitlek Corporation, SA-20
IT Service Desk Analyst

Sept 2017 – Dec 2017
Arlington, VA

- Resolved escalated ServiceNow and Remedy tickets from Tier 1 involving Windows 10/11, Microsoft Office 365 apps (Outlook, Excel, Teams, SharePoint), and network access issues.
- Managed Active Directory accounts: password resets, group membership, OU placement, and group policy troubleshooting.
- Configured and supported Cisco AnyConnect VPN and Remote Desktop Services (RDS) for remote employees; troubleshoot MFA integration with Duo Security and Microsoft Authenticator.
- Utilized Microsoft SCCM for remote troubleshooting, software deployment, and workstation imaging.
- Supported email migrations to Exchange Online, mailbox permissions, and Outlook client configuration.
- Maintained and updated Symantec Endpoint Protection and Microsoft Defender Antivirus across enterprise endpoints.
- Provided desk-side support for hardware, including Dell laptops/desktops, HP printers, iPhones, and Android devices.
- Documented solutions in ServiceNow knowledge base, improving Tier 1 resolution rates and reducing escalations.
- Collaborated with Tier 3, network, and security teams on escalations involving Cisco ASA firewalls, Citrix, and VPN connectivity.
- Assisted with patch and software update cycles using WSUS and SCCM.

EDUCATION

Bachelor of Science (B.S.) Criminal Justice Tennessee State University	Fall 2015
CompTIA Security+ Certification	08/27/2021
Department of Criminal Justice Services CPR/AED Certification	08/01/2021

CERTIFICATIONS

CompTIA Security+
CompTIA CySA+
Tenable Certificate of Proficiency
