

	Summary	
--	---------	--

Seasoned IBM i Programmer/Analyst with 20+ years of expertise in RPG Free, SQLRPGLE, and DB2 for i, delivering high-impact solutions for healthcare and manufacturing sectors.

- Architected DB2 data replication for 10+ systems, syncing 1M+ records daily with 99.9% uptime for retailer/distributor.
- Led Cerner MedSeries4 upgrades for 200-bed hospital, ensuring HIPAA compliance.
- Optimized sFTP workflows, automating vendor file exchanges, slashing manual processing time by 50%.
- Spearheaded IBM i modernizations, converting legacy RPG/IV to RPG Free, boosting code maintainability.

	Skills/Background	
--	-------------------	--

Languages: RPG (RPG IV, RPG Free), SQLRPGLE, SQL, CLLE

Platforms: IBM i (AS/400, iSeries, Power Systems 7.3+)

Databases: DB2 for i, Data Replication

Tools: RDI, iSeries Navigator, IBM i Access, GoAnywhere, Turnover, X-Analysis, Itera

Integrations: sFTP, Cerner MedSeries4, Infor CloudSuite, Kronos WorkForce Central

Migrations: Allscripts, Adonix

	Experience	
--	------------	--

Consulting Programmer/Analyst

Capstone IT | Remote | Feb 2023 – Dec 2024

- With client team, implemented multi-supplier inventory system, optimizing RPG Free/SQLRPGLE apps.
- Built configuration tables and service programs, reducing application setup time by 30% via streamlined CLLE commands.
- With client team, implemented data replication across 25+ IBM i systems, syncing 10K+ records/day with zero data loss, using RPG Free and SQL.
- Led modernization research with RDI/X-Analysis, identifying 200+ legacy tables for conversion, enabling 50% faster migration planning.
- Built synchronization verification tool, automating status checks across 25+ IBM i systems, for 10K+ replicated records, cutting error detection time by 50%.

VDart | Remote | Apr 2022 – Dec 2022

- Developed HL7 error reporting tool in RPG/IV and SQLRPGLE, processing 5K messages/day, reducing vendor escalations from 20/week to 2.
- Redesigned sFTP file extracts for external vendors, automating delivery and cutting errors and manual processing by 50% using GoAnywhere.

Programmer/Analyst, IS Coordinator, iSeries Administrator

Wise Health System | Decatur, TX | Jun 2006 – Feb 2022

- Orchestrated Cerner MedSeries4 upgrades for 200-bed network, completing 12 annual cycles.
- Built user profile utilities in RPG/IV, syncing 2,000+ iSeries accounts with Cerner, reducing admin overhead by 50%.

- Automated report distribution via email for 100+ daily reports, saving 50 hours/week in manual effort.
- Led IBM i upgrades (V5R3 to V7R3, iSeries 520 to Power 7), achieving 99.8% uptime across 3-month transitions.
- Developed sFTP data exchange processes, handling 500+ daily transactions, improving vendor sync reliability by 90%.
- Facilitated migration from Cerner to Allscripts/Infor, converting 500K+ records with zero data integrity issues.
- Acted as liaison for Infor and Kronos cloud apps, resolving 90% of vendor issues within 24 hours.

Consulting Programmer/Analyst

Accessories Manufacturer | Aug 2000 – Jun 2006

- Designed Vendor Managed Inventory app in RPG/IV, managing \$50M in stock, reducing stockouts by 40% across 5 distribution centers.
- Built conversion service program for decimal/hex/binary data, processing RFID tags, enabling 30% faster inventory tracking.

Lubricant Manufacturer | May 2001 – Feb 2006

- Enhanced JBA System 21 sales commission system, integrating with Accounts Payable, increasing bonus calculation accuracy by 95%.
- Developed bulk container tracking app in RPG/IV, interfacing with JBA System 21, reducing shipment errors by 60%.
- Optimized reporting for order entry, generating 50+ custom inquiries, saving 15 hours/week in manual data pulls.
