

Summary

Driven Junior Cybersecurity Engineer with **1 year and 9 months of hands-on internship experience** and dual Master's degrees in **Operational Cybersecurity** and **Open Source Software Engineering**. Strong foundation in both academic research and practical defense, reinforced by industry certifications including **CEH**, **Cisco CyberOps Associate**, and **HCIA Security**.

Proven ability to perform *threat detection*, *vulnerability assessment*, and *penetration testing* using industry-standard tools such as *BurpSuite*, *Nessus*, *Nmap*, *Metasploit*, *Autopsy*, *SIFT*, *Splunk*, *Wireshark*, *Suricata*, *OpenVAS*. Skilled in threat intelligence platforms like *MISP*, *Taranis*, and the *ELK Stack*. Experienced in monitoring and analyzing large-scale data with *Power BI*, *SQL Server*, and *SIEM* systems, and deploying secure infrastructure using *Linux*, *pfSense*, *Fortigate*, and identity management technologies including *LDAP*, *Active Directory*, *Kerberos*, *SAML*, *Shibboleth*.

Combining documented knowledge with hands-on expertise, I've simulated attacks in controlled environments, dissected intrusion patterns, and delivered actionable insights that strengthened security postures. My mission is clear: to keep enterprises one step ahead—protected, resilient, and ready for what's next.

Skills

Cybersecurity

- **Tools:** BurpSuite, Nessus, Nmap, Metasploit, Autopsy, SIFT, Splunk, Wireshark, Suricata
- **Threat Intelligence:** MISP, Taranis, ELK Stack
- **Vulnerability Management:** OpenVAS

Programming & Databases Python, JavaScript, TypeScript, SQL Server, MySQL, MongoDB

Languages Arabic, French, English

Certifications Certified Ethical Hacker (CEH), Cisco CyberOps Associate, HCIA Security, AWS Cloud Foundations

Experience

El-Khawarizmi Computing Center (CCK)

Mar 2025 – Sep 2025 (6 Months)

Security Operations Center (SOC) Analyst Intern

Manouba University Campus

- Designed Power BI dashboards to analyze Fortigate logs, ensuring reliable monitoring of network activity and system resources.
- Built and benchmarked an ETL pipeline using **SQL Server** and **DuckDB**, significantly improving dashboard load times and overall data visualization responsiveness.
- Delivered weekly threat intelligence reports that informed proactive firewall rule updates and improved incident prevention efforts across the academic network.

El-Khawarizmi Computing Center (CCK)

Jul 2024 - Aug 2024 (1 Month)

Penetration Tester Intern

Manouba University Campus

- Simulated real-world cyberattacks on a confidential application to uncover vulnerabilities and weaknesses in its security posture.
- Utilized tools such as **BurpSuite**, **Nessus**, and **WPScan** to identify potential security gaps.
- Strengthened organizational defenses by providing actionable recommendations to mitigate risks from malicious actors.

Smart Tunisian Technopark (S2T)

Mar 2022 – Jun 2022 (4 Months)

Web3 Systems Engineer Intern

El Ghazala Technology Park

- Developed a blockchain-based identity management system for investigative teams using **Solidity**, deployed on the **Ethereum testnet** to enable secure identity verification.
- Utilized **MetaMask**, **Remix IDE**, **Ganache**, and **Truffle Suite** to streamline smart contract development, testing, and deployment.
- Integrated **Infura** and **IPFS** for decentralized data access and storage, reducing reliance on centralized infrastructure.
- Contributed to infrastructure security design with **OpenZeppelin**, improving resilience through smart contract auditing and threat modeling.

El-Khawarizmi Computing Center (CCK)

Feb 2021 – Jun 2021 (4 Months)

Software Engineer, Internship

Manouba University Campus

- Designed, developed, and implemented a web application for managing the National University Network (RNU).
- Ensured secure deployment and maintenance to support network security operations across multiple institutions.

El-Khawarizmi Computing Center (CCK)

Mar 2019 – Jun 2019 (4 Months)

Identity Systems Engineer Intern

Manouba University Campus

- Engineered an **eduGAIN federation** for the National Academic Network with **SAML, Shibboleth, and LDAP**, enabling secure identity federation across more than 100 academic institutions.
- Designed and deployed secure infrastructure using **OpenSSL, Linux, and FirewallD**, supporting high system uptime and compliance with national cybersecurity regulations.

Tunisian Civil Aviation and Airports Authority (OACA)	Jul 2018 – Aug 2018 (1 Month)
<i>Network Security Intern</i>	<i>Tunis-Carthage International Airport</i>
- Deployed and configured centralized identity management for Windows-based systems using LDAP, Active Directory, and Kerberos, streamlining access control for airport personnel. - Engineered secure network infrastructure for switches and routers with Cisco IOS, pfSense, and Wireshark, improving traffic monitoring and reducing downtime risks.	

Tunisian Civil Aviation and Airports Authority (OACA)	Jan 2018 – Feb 2018 (1 Month)
<i>Network Security Intern</i>	<i>Tunis-Carthage International Airport</i>
- Facilitated workstation integration into the OACA domain using Active Directory, ensuring secure access and streamlined management for new staff. - Deployed and configured network printers, which rationalized printing services and improved accessibility for all personnel. - Configured and optimized the messaging system for staff, ensuring seamless and reliable internal and external communication. - Managed network support requests and diagnosed system failures using traffic analysis tools like Wireshark, effectively reducing service downtime. - Activated and provisioned new network ports on switches with Cisco IOS, expanding network connectivity for new equipment.	

Education

Private International Polytechnic School of Tunis (Polytech INTL.)	2023-2025
<i>Master’s Level Engineering Degree in Computer Science, Networks and Multimedia (EUR-ACE accredited)</i>	
Tunis Higher School of Communications (SUP’COM)	2021-2022
<i>Professional Master’s Degree in Operational Cybersecurity</i>	
Higher Institute of Computer Science (ISI)	2020-2022
<i>Professional Master’s Degree in Open Source Software Engineering</i>	
Higher Institute of Technological Studies in Communications of Tunis (ISET’COM)	2016-2019
<i>Applied Bachelor’s Degree in Information and Communication Sciences and Technologies (STIC): Specialization in Security</i>	

Projects

Windows 7 Forensics Analysis with Autopsy	2024-2025
- Conducted forensic analysis on a Windows 7 virtual machine to recover deleted files and artifacts. - Tools & Technologies: Autopsy, SIFT Workstation	
Intrusion Detection System Setup with ELK and Suricata	2024-2025
- Configured an IDS using ELK Stack and Suricata on a CentOS lab to monitor network traffic. - Analyzed logs to detect and respond to potential intrusions.
