

William Dolatowski

dolatow165@gmail.com (615) 686-1844 (Location: Nashville, TN)

Professional Profile

- Results-driven IS management professional with 19 years as a business analyst and proven track record in increasing productivity, quality, and customer satisfaction.
- Creative thinker and analytical problem-solver with demonstrated Project Manager experience to design and manage projects from planning through execution/completion under the pressure of fast-paced, time-sensitive environments
- Exceptional communicator who effectively interacts with clients and all levels of management.
- Extensive knowledge in all phases of the Software Development Life Cycle (SDLC) including Requirements Gathering, Analysis & design, Development, Testing, and Deployment using Software Engineering Methodologies like Scrum, Safe Agile, and Waterfall.
- Experienced in developing various types of deliverables such as Business Requirements (BRD), User Stories, Functional Requirement Document (FRD), and Functional Mapping as well as for creating Use Case diagrams, Activity diagrams, and Sequence diagram based on UML Methodology (using MS Visio/Enterprise Architect Tools).
- Excellent Organizational and multi-tasking skills.

Work Experience

WWC Federal for Sandia Laboratories (US Dept of Energy), Albuquerque, NM July 2023 – Current **Senior Business Analyst**

- Developing a new Records Management File Plan System. (RMFPS)
- Working on several documents and schedule for RMFPS Application Training and Deployment process.
- Developing requirements, process flow diagrams, and test scripts for the new application.
- Completed a new Change Management process flow and narrative.
- Developing requirements for upgrades to a new Devonway package system for Assessment, Issues, Risk, and Lessons Learned applications (ICAS – Consumer Assurance System). Additional requirements for CUI (Controlled Unclassified Information), Corporate Workbox integration, EIMS integration. (241 Reqs.)
- Completed report mockups using Balsamiq Mockup 3.
- Working in a modified agile environment. User Stories are created in ADO, Rally, Gitlab, and Jira.
- Developed Customer Questionnaire, Process Flows, Use Cases, Metrics Request List, and Requirements to evaluate several replacement email and web published communication applications for Sandia.

TPI for Edward Jones, St. Louis, MI **Senior Business Analyst**

Jan. 2023 – June 2023

- Converting the monthly client statements from a mainframe to a Cloud based solution.
- Working in an agile environment with two-week sprints.
- Most of the infrastructure is in place in development and we are working to secure the source data to upload into the Mongo database, which supports all the data used in building client monthly statements. The data upload processes are triggered by Kafka messaging.
- The user stories I am currently working on are for web-based reconciliation control information and AQA (Automated Quality Assurance) validation rules that will be embedded into the monthly process.
- I have completed over 100 User Stories, in Jira, for this project.

APEX for Deloitte, Hermitage, TN **Business Systems Analyst/Product Owner**

Aug. 2022 – Dec. 2022

- DigiPrint – New Web application housing a knowledgebase of deep industry experience and world-class technology depth around a storefront of capabilities tailored to individual industry and underlying sectors.

- Working in a Safe Agile environment with nine, two weeks, sprints. The project was completed on time and on budget while exceeding the original scope/requirements for the project.
- Completed requirements, planning, design, development, User Acceptance Testing, Quality Assurance testing, business sign-off approval, and implementation.
- Gather project and backlog requirements from business customers and stake holders to develop project User Stories in ADO (Azure DevOps).
- Daily Scrum (defect), Requirements, and Design sessions with the Application Architects, off-shore Web Designers, and off-shore development team members to answer questions, resolve defects/impediments, and drive the project requirements to completion.
- Completed iteration demonstrations and project status presentations to the business customers and stake holders to secure approval for the work completed per sprint.

PathGroup, Nashville, TN

Aug. 2020 – July 2022

Business Analyst

- Responsible for Pathsys/FastTrack/Pathconnect/Client Services Module system modifications whose purpose is the receiving and processing of specimens through several in-house laboratories. In the two years I have been with PathGroup, I have completed 321 User Stories, in ADO, to upgrade these applications. 122 User Stories have been developed and implemented into production. (Agile environment, 3-week sprints).
- Responsible for the Lewis Gale Hospital and Medical Center, 80 total accounts/businesses, transition to a mixed technical/professional split process. This was a 7 week must complete project with little to no requirements. My responsibility was to bring in the business, technical, and BI team experts to determine what system changes were necessary, write the User Stories for system development work, and coordinate the team's efforts to complete the work in the given timeframe. The work included business set up processes, 20 BI reports, and 15 User Stories. I built a project plan in Smartsheet, coordinated the work, and held status meetings twice a week. The project completed on time and within budget.
- Responsible for transitioning the client billing for a new laboratory, purchased by PathGroup, into the existing PathGroup systems. Held requirement and status meetings and coordinated the work with multiple business and development teams, from both PathGroup and the new laboratory. Also, coordinated the work with the billing department personnel. The project completed successfully.
- Developed project User Stories in ADO (Azure DevOps).

NTTData for Deloitte, Hermitage, TN

June 2019 – May 2020

Business Systems Analyst

- DAS/Aspire/MyDesk project incorporating five Deloitte applications information into a "one stop shop" Web site for administrative assistants supporting the highest-level partners/management. Additional functionality has also been added to aid in supporting team management processing and remote work requests. In addition, we have implemented all our backlog items before opening up the functionality to thousands of users, exceeding business expectations.
- Working in an Agile environment on two projects with nine and six sprints/iterations and 1.1 and .7 million dollars respectfully. Each iteration is two weeks in length. Both projects were completed on time and on budget while exceeding the original scope/requirements for the project. The business customers are raving about the results.
- Completed requirements, planning, design, development, User Acceptance Testing, Quality Assurance testing, business sign-off approval, and implementation in January and May 2020.
- Gather project and backlog requirements from business customers and stake holders to develop project User Stories in ADO (Azure DevOps).
- Working with the business customers/stake holders and the off-shore development team to decide which User Stories to process in each iteration to maximize back-end, front-end, and QA resources.
- Daily Scrum (defect), Requirements, and Design sessions with the Application Architects, Web Designers, and off-shore development team members to answer questions, resolve defects/impediments, and drive the project requirements and work flow.

- Completed iteration demonstrations and Project status presentations to the business customers and stake holders to secure approval for the work completed per iteration (sprint).
- Achieved Scaled Agile certification as we transition to a Safe Agile environment.

Nissan North America, Franklin, TN

March 2006 – June 2019

Business Analyst/Project Manager

- Transitioned 21 Service Warranty applications to an on-shore/off-shore vendor, while moving national headquarters from California to Tennessee, where we proceeded to reduce production support issues by 99% with 42% less IS staff within 20 months.
- Gather requirements from stake holders in a Mix Agile and Waterfall environment.
- Prepared Agile User Stories, Detailed level Project Specifications, Process Flow (MS Visio – BPM Tool for Business Process Improvement), and Functional Specification for various projects.
- Created various technical specifications, designed and documented functional specifications using detailed Source-to-Target Data mapping, Data Transformation rules, and Enterprise Service and Data models.
- Eliminated all production support issues on five applications systems while reducing maintenance costs by 50%. Support Tickets are housed in ServiceNow.
- Completed work on a Global Export project incorporating Japanese, Mexican, and American vehicle plant systems to ship vehicles to 112 new countries.
- Leading a team of 15 programmers and analysts, completed seven major enhancement projects and 4100 hours of minor enhancements/year while supporting four application systems in under two years.
- Supported a two-year major enhancement project launching a new vehicle manufacturing plant in Aguascalientes, Mexico.

Ford Motor Company, Dearborn, MI

Jan. 2003 – Mar. 2006

Project Manager – Ford Motor Credit

- Selected by department manager to spearhead a cross-functional, multi-level team focused on improving company-wide USDM Methodology process to make it more customer/user friendly.
- Identified, developed, and implemented solutions to improve fourteen areas of the USDM process, achieving Six Sigma Green Belt certification.
- Strategically enhanced the Peoplesoft error code warehouse and developed an accounting transaction error storage and reporting process around it. Reduced errors by 98.2% and completed the project six weeks ahead of schedule.
