SUMMARY

Software engineer with extensive experience in C# .NET Core, Angular 8, and SQL Server. Skilled in developing comprehensive full stack applications, enhancing user experience, and operational efficiency. Proficient in UI/UX implementation, Bootstrap, and HTML5. Certified advanced developer with Mendix. Experienced in Azure DevOps and cloud-native solutions.

EXPERIENCE

DEFCON AI, Senior Software Engineer

Jan 2024 - Jul 2025

- Developed comprehensive full stack simulation software for travel and transport logistics, and enhancing operational efficiency
- Utilized C#, Blazor, and .NET Framework to create user-friendly interfaces and robust backend systems, improving user experience
- Collaborated with cross-functional teams to facilitate a comprehensive tech stack, ensuring seamless integration and deployment using Azure DevOps.

EPI-USE America, Inc, Rapid Application Developer

Jun 2021 - Sep 2023

- Delivered quick solutions for clients looking for web application development and consultation
- Worked for multiple clients in the logistics and electronics fields, improving user experience through integrated solutions.
- Advocated for and implemented integrated solutions for business needs

2nd Ave Stores, Software Developer

Jan 2020 - Mar 2020

- Initiated development on a new web application to handle truck driver tracking and payment
- Developed components and databases to be used across multiple projects and developers with Azure DevOps deployment, improving collaboration and deployment speed
- Integrated legacy paperwork into cloud-based microservices, reducing manual processing time

Prodigy Solutions Inc, Software Developer

Aug 2019 - Dec 2019

- Developed and maintained full stack web applications using .NET Core, React/Redux, ASP.NET, and Entity Framework
- Adapted design modifications and suggested improvements in a small team agile environment
- Managed updates to legacy software using ASP.NET Web Forms and SignalR

Airline Hydraulics, Software Developer

Dec 2017 - Jul 2019

- Developed full stack applications using .NET Core and Angular, replacing legacy technologies and streamlining work processes
- Integrated modern technologies with legacy applications and databases, enhancing system performance and reducing manual processing time
- Collaborated with purchasing and inventory management staff to personalize applications

Synechron, Software Development Consultant

Dec 2014 - Nov 2017

- Developed financial and medical applications using C#, Angular, Javascript, CSS, HTML, and AEM
- Ensured smooth content publication for Bank of America and USTrust sites
- Led internal R&D projects, including IoT insurance devices, HoloLens financial investment applications, and Blockchain applications

SKILLS

15 years total experience in information technology field • 11 years software development experience • Ability to quickly and efficiently learn new technologies in a short amount of time and be able to implement that knowledge immediately •

Experience in developing desktop applications, web applications, and mobile applications • Certified as an advanced developer with Mendix • C++, C# (including .Net Core, Blazor, SignalR, and Entity Framework), Python, Javascript, Java, SQL Server, HTML, CSS, Xamarin, Git, Azure, DevOps, Blueprint, and NoSQL databases • Windows (XP, 7, 10), Windows Server (2012, 2016), Linux, Raspbian • Javascript frameworks such as AngularJS, Angular 2/4/5/7/8, React, Vue, Ionic, and Electron • Augmented Reality and Virtual Reality using Unity and Unreal • Other web technologies, including NodeJS, jQuery, LESS, SASS, Web Sockets, NPM, and Bower
