ABOUT ME

Senior Full Stack Engineer with **10+ years** of experience in software development, specializing in **C#, .NET, Python, Java, JavaScript** and **TypeScript**. Experienced in cloud services such as **Azure** and **AWS**, with **hands-on experience** in cloud-hosted applications. Proven ability to work in **fast-paced environment** and collaborate with **cross-functional teams**. Delivered **7+ enterprise-level applications** that met both **business objectives** and **customer-orientation principle**.

SKILLS

- **Languages:** C#, Java, JavaScript, TypeScript, Python
- **Frameworks:** ASP.NET Core, Spring, Django, Node.js
- **Frontend:** Angular, Blazor, WPF, React, Next.js, Vue.js
- **ORM:** ADO.NET, Entity Framework, NHibernate
- **Database:** MS SQL, MySQL, PostgreSQL, MongoDB, DynamoDB, CosmosDB, Oracle
- **Unit Testing:** NUnit, MSTest, Moq, Apache JMeter, Cypress
- **DevOps:** Jenkins, TeamCity, Azure DevOps
- **Cloud:** Azure, AWS
- **Other:** Jira, Confluence, Kanban, Agile/Scrum/SAFe

EXPERIENCE

Greenway Health, Remote

09/2021 - 06/2025

Senior Full Stack Engineer | .NET Lead

- Developed **ASP.NET Core Microservices** with **Angular 13** for Medical diagnosis software, ensuring compliance with HL7, FHIR, and HIPAA for secure data exchange.
- Established **Azure infrastructure** setup with **App Services, Active Directory, Logic Apps, Service Bus** and **Kubernetes Services** for the **Hybrid** architecture.
- Engineered a **serverless architecture** using **Azure Functions** on **Azure cloud service**, achieving a significant 10% decrease in infrastructure costs while concurrently enhancing flexibility and scalability.
- Implemented **OAuth, SSO, and SAML** solutions, enhancing user authentication efficiency by 15%.
- Introduced **KQL** to analyze over 1TB of healthcare data logs, optimizing system performance and troubleshooting.
- Optimized **stored procedures** in **SQL Server** and **T-SQL queries**, improving database performance by 20%.
- Introduced **Datadog** for resource usage and log monitoring, reducing system downtime by 10% and saving \$520,000 annually.

- Managed unit and functional testing using **NUnit** and **Cypress**, leading to a 40% reduction in critical bugs through regular code reviews.
- Conducted performance testing and optimization using **Apache JMeter**, improving application response times by 20% and supporting 10,000 concurrent users.
- Constructed the **MVVM** architecture of **Angular 13** to develop robust apps, ensuring precise application requirements through tailored controllers and directives.
- Migrated **CI/CD pipelines** from **TeamCity** to **Azure DevOps**, upgrading with **Terraform** to automate **Azure API Management deployment**.
- Led an **Agile** team of 8 developers, providing technical guidance and mentoring to ensure high-quality software delivery using **Scrum** practices.

ConnectWise, Tampa, FL

03/2019 - 09/2021

Senior Software Engineer

- Converted a legacy **monolithic** platform into **microservices**, using **C#/ASP.NET Core** and **Java/Spring**.
- Applied **AWS services** including **API Gateway** and **Application Load Balancer** to manage and secure APIs, ensuring compliance with industry standards and regulations, leading to a 35% increase in API reliability and security.
- Enhanced **AWS ETL pipeline** using **Lambda triggers** and **Kinesis Firehose** to sync data from **DynamoDB** to **MySQL**.
- Implemented **Amazon EKS** to orchestrate containerized applications, enhancing deployment scalability and reliability across multiple environments.
- Operated **AWS CloudFront**, **CloudFormation**, **CloudWatch**, and **DynamoDB** to decrease latency by 30% and enhance monitoring.
- Executed data migration using **MS SQL Server Integration Services(SSIS)**, achieving 99% accuracy and saving 10+ hours per week for transferring data between databases.
- Applied **SOLID** principles with **MVC** design pattern and built **RESTful APIs** using **Java/Spring**, improving code maintainability by 40%.
- Updated a SaaS platform using **Angular 6**, **SCSS**, **Material UI**, and **Tailwind**, improving user engagement by 25%.
- Conducted unit tests and functional testing using **MSTest** and **Cypress**, conducted weekly reviews with a **professional QA** engineering team.
- Demonstrated expertise in **SDLC** processes and development methodologies like **Agile SCRUM** and **TDD**.

BayCare Health System, Clearwater, FL

09/2014 - 03/2019

Software Engineer

- Built several medical test web applications from the scratch for ordering tests, checking statuses, and reporting data using **ASP.NET Web API**, **Java/Spring**, **Jenkins**, **Angular 2** and **React**.
- Implemented a **microservices** architecture using **ASP.NET Web API** and **Spring**, resulting in a significant reduction in loading times and 15% boost in revenue.
- Designed software solutions using **Java**, **Spring** and **NHibernate**, contributing to 10% application performance improvement.
- Debugged and resolved complex software issues, reducing critical bugs by 35% through expertise in **NUnit** and **Moq**.
- Optimized **CI/CD pipelines**, automating the software delivery process, leveraging expertise in **Jenkins**, **GitHub** and **Terraform**, reducing deployment time by 30%.
- Collaborated with **cross-functional teams** to design **UI/UX** with **Angular 2** and **React**, boosting customer satisfaction by 45%.

EDUCATION

University of Florida

07/2010 – 12/2014

Bachelor's degree (BS), Computer Science
