EDUCATION

Bachelors of Science in Psychology – American Military University

2019 – Present

Cyber Security Specialist Certification – ICOHS College

Online / On-campus, 12-month program designed to equip students with industry certifications, practical expertise, and career-ready cyber defense skills.

- *Career development focus: includes training in information assurance, digital crime investigation, resume/interview prep, job search support and portfolio building to help graduates step into roles like cybersecurity specialist or analyst.*

EXPERIENCE

Administrative Assistant – Talen Energy

January 2024 – July 2024

- Supported executive assistants and leadership with scheduling, office access coordination, and onboarding tasks, ensuring compliance with security protocols.
- Assisted with event coordination, meeting preparation, and conference room setup, including use of digital tools to manage calendars and communications.
- Maintained logs, office configuration records, and access systems to support secure workplace operations.

Executive Administrative Coordinator – Kleanning Krew Co.

March 2019 – August 2023

- Managed executive schedules, meetings, and travel logistics using Microsoft Office and Google Suite applications.
- Drafted, edited, and maintained confidential documents and reports, ensuring secure handling of sensitive business information.
- Supported process improvement initiatives and cross-functional coordination, applying organizational and IT tools to streamline workflows.

Yeoman (Administrative Assistant) – United States Navy

November 2015 – March 2019

- Managed classified and sensitive documents, personnel records, and legal administrative functions.
- Operated and maintained secure communication systems while supporting personnel administration and correspondence routing.
- Coordinated with departments on operations, including aviation fuels and ordnance handling, ensuring safety and adherence to technical procedures.

PROJECTS

Cyber Defense Lab Training: Conducted simulated penetration testing and vulnerability assessments in a lab environment, applying techniques learned in the Cyber Security Specialist Certification program.

Secure Onboarding Process Development: Assisted HR and leadership in designing secure onboarding and offboarding workflows, integrating access control, system permissions, and documentation handling at Talen Energy.

Confidential Records Management System: Streamlined Navy administrative recordkeeping by implementing secure document control practices, ensuring proper handling of sensitive personnel and legal files.
