Key Skills

- **Tools:** Grafana, Datadog, Jenkins, Rundeck, PagerDuty, Jira and Scalyr.
- **Cloud & Networking:** AWS (EC2, RDS, S3, Route 53, VPC, CloudWatch, CloudFormation), GCP (Compute Engine, Cloud Storage, GKE, Cloud Monitoring), VLAN and TCP/IP in cloud environments.
- **Programming:** Python, Go, SQL, C#, JavaScript, Batch Scripting GitHub.
- **Systems:** Linux, Windows Server, VMware ESXi, FedRAMP, Docker Desktop.

Highlights

- Drove 99.9% uptime for enterprise systems at SentinelOne
- Supported enterprise users at Symantec across many products.
- Deployed AWS/GCP infrastructure, automating with CI/CD pipelines via GitHub/Jenkins/Rundeck.
- Resolved incidents and authored technical docs, boosting team efficiency.

Professional Experience

- **Site Reliability Engineer (SRE)**
 - *SentinelOne – Eugene, OR (Remote)*, Aug 2022 – March 2025
 - Drove 99.9% uptime for AWS/GCP systems serving 500K+ users, using Grafana/Datadog for real-time monitoring.
 - Automated patch deployments via Jenkins/Rundeck, cutting vulnerability windows by 30%.
 - Configured VPC, RDS, and GKE for secure, scalable environments meeting FedRAMP compliance.
 - Led incident response, with PagerDuty workflows.
- **Network Operations Center Administrator (NOC)**
 - *SentinelOne – Eugene, OR (Promoted)*, Feb 2019 – Aug 2022
 - Monitored AWS systems with PagerDuty/Grafana/Datadog/Scalyr, resolving 200+ monthly alerts.
 - Ensured FedRAMP compliance while supporting secure cloud deployments.
 - Collaborated on CI/CD enhancements, assisting deployments to cloud environments.
- **Enterprise Technical Support Engineer**
 - *Symantec – Springfield, OR*, Nov 2012 – Sep 2018
 - Provided advanced support for Ghost Suite/ITMS, scripting custom batch solutions.
 - Authored knowledge base articles, improving team resolutions and cultured team work.
 - Built Linux lab environments and supported SAML/ADFS for enterprise clients.
- **Symantec Accreditations:**
 - Symantec Technical Specialist (STS)
 - Symantec Mobile Management Suite (for standalone or CMS/ITMS environments) (March 2013)
 - Symantec Sales Expert Plus (SSE+)
 - Symantec App Center (April 2013)
 - Symantec App Center (March 2014)
 - Symantec Endpoint Protection 12.1 (August 2014)

Early Career

- **Technical Support Trainer & Tier 1-3 Technician**
 - *First Call Resolution, LLC – Roseburg, OR*, Aug 2006 – Oct 2012
 - Trained agents, provided feedback and quality assurance for support calls.
 - Developed HTML/JavaScript ticket systems, streamlining support workflows
 - Authored knowledge base articles for the daily use of support agents.

About me

- With over 18 years of IT experience, I specialize in site reliability engineering, network operations, and technical support. My hobbies are programming and game development. I have learned many valuable skills from this hobby. I currently build and maintain websites for myself focusing on games that I am working on and occasionally others using Go lang on docker desktop. My sites use nginx and a custom Go app for the backend and connect to postgres and redis for the DB/Token management. Upon request I can share links to an example site.
