Experience

NEXTGEN HEALTHCARE, AUSTIN, TX
EXPERIS | NEXTGEN HEALTHCARE

JUNE 2022 – CURRENT

MARCH 2022 – JUNE 2022 CONTRACT TO HIRE

Consultant II – Professional Services, August 2023 – Current

- At NextGen Healthcare, my focus lies in specialty consulting and implementation, where attention to detail and process improvement is paramount.
- Deliver solutions that optimize workflows, enhance patient care, and achieve goals for medical practices.
- Lead and support new and established customer implementations, providing consultative advice and recommendations, creating client-facing deliverables, and training client and internal resources.
- Facilitate the discovery phase to help identify client goals/objectives and determine the proposed scope of consulting engagements and new customer implementations.
- Serve as the leadership-level contact between the vendor and internal customers consuming vendor services and solutions.

Applications Advisor – Upgrades Center of Excellence, March 2022 – August 2023

- Community Upgrade Program Leader - responsible for assigning projects and serving as an escalation point for application team members and project managers. Developed Velocity employee soft skills and product knowledge.
- Develop client-facing artifacts to ensure consistent implementation delivery.
- Identify and mitigate risks, communicate project status, and negotiate project changes with key stakeholders, including project stakeholders, senior leadership, and members.
- Partner with clients in meeting their organizational goals and objectives, providing subject matter expertise to the upgrade process, workflow enhancement recommendations/best practices, template design/development, and documentation for future upgrade activity.
- Analyze complex issues surrounding the systems of a client's organization that will intersect with NextGen solutions.
- Design and conduct training and development programs to improve individual and organizational performance.

Project Manager

- Facilitate rolling out of NextGen EHR and EPM projects which includes project management, training, support for system implementation, project coordination, application configuration, workflow re-engineering, change management, and go-live support.
- Document current and proposed workflow; analyze, evaluate, and make recommendations.
- Effectively educate and guide end-users and IT team members in software functionality and configurations.
- Facilitate management of user expectations.
- Identify and mitigate risks, communicate project status, and negotiate project changes with key stakeholders, including project stakeholders, senior leadership, and members.

Vendor Management Operations, Nov. 2019 – July 2020

- Create and set the strategic direction, mission, and vision of the Vendor Management Operations in alignment with the strategic and operational objectives of the technology organization and the business.
- Develop organizational design and functional roles and responsibilities for technology vendor management.
- Collaborate with internal stakeholders (IT, Business Resources, Sourcing, and Procurement) to develop criteria and best practices for vendor selection.
- Establish and approve internal and external policies, standards, and processes for vendor interaction.
- Serve as the leadership-level contact between the vendor and internal customers consuming vendor services and solutions.

Project Manager, Feb. 2019 – Nov. 2019

- Facilitate Technology Sourcing projects to drive overall technology partnerships.
- Software Product Management - implement, train, and manage Smartsheet application.
- Own and monitor all aspects of a project, including discovery, documenting requirements/user stories, planning, communication, development, testing, and implementation.
- Partner with internal and external business partners to keep work aligned, foster collaboration and learning, and prevent silos, duplicate work, and dead-end solutions.

Senior Systems Analyst

- Develop and implement strategic planning actions and policy decisions related to the business systems. Make recommendations concerning the direction of the business computer and management information systems.
- Facilitate obtaining all functional aspects of requirements, storyboards, mockup creation, business process details, and analysis for projects and customer requests.
- Execute configuration and administrative functions in healthcare applications (NextGen EHR, Practice Management, and EDR).
- Coordinate development and execution of enterprise-level strategies and technical direction and establish processes and procedures for executing and maintaining technology road maps.
- Oversee projects that cross-functional areas of corporate systems and other business entities that require coordinating, planning, and scheduling during project development and implementation stages.
- Provide advanced support for Enterprise applications, coordinating efforts with User Support, network administrators, developers, network engineers, and other staff as needed.
- Serve as a mentor and department leader.

Manager of Technical Training, Sept. 2014 – Feb. 2017

- Manage and maintain all aspects of a Training department and healthcare application training for a large Federally Qualified Health Center with a primary focus on NextGen Healthcare applications.
- Recruit and train new personnel.
- Conduct staff meetings, provide counseling/coaching, evaluate staff, and work together as a cohesive team.
- Collaborate with Human Resources and other leadership with onboarding processes and practices.

- Create and maintain training curricula and content for multiple specialties and service lines.
- Led the organization in transitioning to an e-learning platform (LMS aka learning management system), NetLearning™.
- Board Member of LSCC Staff Development Committee: The Staff Development Committee creates and identifies existing professional development training opportunities and recommends changes or enhancements for the best procedures and practices based on staff feedback and experience.

Implementation & Training Specialist, May 2011 – June 2014

- System implementation, optimization, upgrades, and support of NextGen Healthcare applications for multiple specialties (Pediatrics, Family Practice, OBGYN and Optometry, and Behavior Health).
- EHR system design: provide functional expertise to optimize the design and development of software applications both pre- and post-go-live.
- Conduct new employee and ongoing training via classroom, video, and individual.
- Create and maintain content for training curricula and materials for multi-specialties, system upgrades, and implementations.
- Quality Assurance: thoroughly test and ensure all changes and updates are functioning as designed before placing them on the live database.
- Collaborate with leadership, peers, clients, and end-users to identify and document requirements, workflow and software functionality, and best practices.
- Identify and document issues relating to system integration between the core application and other applications/interfaces.
- Facilitate workflow analysis, and issue management, and escalate accordingly.

Clinic Site Manager, Sept. 2007 – May 2011

- Manage staff and daily operations for two successful Pediatric Clinics.
- Conduct staff meetings, provide counseling/coaching, evaluate staff, and work together as a cohesive team.
- Manage ADP: staff schedules, time-off requests, and maintain employee evaluations and goals.
- Referral Submissions: obtain authorizations, provide clinical documentation, and verify insurance.
- Report Generating; produce and complete pending charges, non-qualifying encounters, tasks, authorizations, and referrals.
- Site Reviews: ensure standards, guidelines, and certifications are current under OSHA, CLIA, Joint Commission, HIPAA, and PCHM.
- Manage and maintain office and medical supplies, purchase orders, and receipts.
- Board Member of LSCC Education Counsel: This is a team of select individuals who collaborate to better serve our clients/patients, educate staff, and improve all aspects of the organization.
