Coursera December 2021 - Present
Information Governance Manager

Define the scope and model for Coursera's Information Governance program, which includes records and information management, data governance, and litigation hold management. Provide expert guidance for policy development and configuration of systems such as Google Workspaces, Slack, Dropbox, Box and other top of class IT Systems.

Own the lifecycle of supporting policies and procedures, including Data Classification and Retention while providing thought leadership and expertise on records and information management.

Coordinate with the litigation team on legal hold related activities and policies.

Identify and mitigate enterprise risks impacting key records by partnering with business process owners to ensure compliance to records and information policies. Identified a key risk in acquisition of SAAS solutions and implemented approval risk and compliance review for all contracts.

Developed a business case to increase compliance and reduce risk on internal communications channels.

Oversee security Classification Policy, governance structure and training to ensure sensitive information is managed appropriately. Instrumental in achieving ISO 27001 certification for Coursera.

US Department of Energy, Office of Legacy Management August 2016 – December 2021
Federal Program Manager - Records, Information and Knowledge Management Program

Provide thorough direction and expertise for the Information Governance program. Provide oversight for teams in 6 locations throughout the US with a \$3.5 million annual budget and 26 full time records and governance staff.

- Implemented an enterprise-wide records and content management system, realigned the retention schedule to align with LM's sites and program requirements and increased the disposition and disposal of obsolete records and information by 3500%.
- Developed processes to increase the capture and management of records by 1500% annually.
- Implemented policies for Information Governance and Records Management, Legal Holds, Classification Review and Dissemination, and Correspondence Tracking and Management.
- Created and led a cross-functional team of Communications, Records, Cyber, IT and end users through the redesign of the public site page repository which provides over 100,000 CERCLA, FUSRAP and regulatory documents capturing decisions for the management of over 100 sites formerly utilized for the development of nuclear weapon and the environmental cleanup activities associated with each site.
- Improved LM's cyber posture and reduced threat risk by identifying unmapped PII repositories and aligning repositories and workflows to the content management system.
- Respond to approximately 2000 FOIA, Privacy Act and other requests for information annually.
- Reduced the research, review, and production costs of the EEOICPA program by 50%.

- Manage 150 TB of scientific research and data for the Yucca Mountain Nuclear Waste Repository Program in structured and unstructured databases and obsolete systems.
- Stood up and lead a Privacy Governance team that reviews all requests for software for PII issues. Identified PII capture in multiple obsolete forms across DOE and subsequently implemented forms and capture processes to reduce the collection of legacy PII across the DOE complex.
- Lead the Office of Legacy Management through an authorization audit by the National Archives for the storage of Permanent Federal Records, the only program office throughout the Federal government with this certification.

NorthWestern Energy: *September 2013 – March 2016*

Director, Records and Information Management

Directed the Records Management, Privacy, and eDiscovery programs.

- Implemented an electronic content system and an e-Discovery and Legal Hold solution that saw immediate reduction of financial and legal risks through improved records capture and targeted litigation responses. Migrated over 2.5 million records from legacy systems.
- Created a Corporate Retention Schedule aligned with business processes that contained over 18,000 legal citations.
- Revised organizational business policies and practices to ensure compliance with technology, legal, records management and information management requirements and led NWE successfully through a comprehensive FERC (Federal Energy Regulatory Commission) records audit and recertification.
- Reduced physical record storage by 50% and digitally captured 4 million microfiche and microfilm records. Partnered with Business Technology on its overall data management strategy to develop processes to responsibly delete terabytes of obsolete information.
- Developed a comprehensive Financial records portfolio to manage records and information subject to Sarbanes-Oxley (SOX).

Naval Special Warfare Command (NSW): *November 2011 – September 2013*

Task Lead and Enterprise Records Manager

Enterprise Command Records Manager and Task Lead for the Knowledge Management portal solutions team which created and implemented the NSW Generation 3 Information Architecture Gen3 IA data management system. Managed 9 direct reports in a SCIF (Sensitive Compartmented Information Facility).

- Wrote and had issued the first records management instruction specific to Naval Special Warfare Command in its 50-year history. Implemented policies and procedures to facilitate the proper handling, management, and retention of unclassified and classified records and information that document the global NSW mission.
- Project manager for the enterprise implementation of a 3500 user-licensed HP/TRIM Electronic Records Management solution and lead change management and a 2 million object records transfer from *Documentum* to HP/TRIM. Designed a program to train all users on access controls, security, placement and research of information.
- Developed a records capture and management solution for the N6 (Finance) department to increase SOX compliance and successfully designed a program to capture war records from returning deployment teams and combatant commands and saw the successful transition of these records to the National Archives and Records Administration (NARA).

McNeil Technologies (Contractor): *November 2008 – October 2011*

Senior Records Manager/Senior Electronic Content Management Policy Advisor

At US Department of Education: Responsible for transitioning the Department through the acquisition and implementation of an enterprise-wide electronic records management solution, combining current deployments of TRIM, OpenText and Documentum into a coherent Electronic Content Management (ECM) Enterprise which manages tens of millions of student records and billions of dollars in grant and research funds.

Created policy and procedures for managing electronic records within the Department and transitioned the Department from a print-and-file email records retention program to managing email records within their native system.

At Joint IED Defeat Organization, (JIEDDO): Managed the creation and implementation of a Records Management Program and developed a Records Management retention schedule and software solution for deployment on secure and unsecure networks. Developed workflows and tasking solutions that operated within the framework of DOD Directive 5015.2

Managed the Master Directives Case Files and maintained an electronic knowledge-based document repository and version control of key documents.

United States Navy (BearingPoint, Inc): *January 2006 – November 2008*

Records and Directives Manager

- Developed an online management solution for the Navy's Classified Directives project, reducing issuance time from 35 days to 24 hours and saving the Navy over \$3000 per instruction – an annual cost savings of \$435,000 for the Navy's Classified Issuances lifecycle.
- Instrumental in the planning, coordination and development of the Navy's public facing websites that publish Naval Instructions and manuals. Reinvigorated paper to electronic document transformation, designed new processes and tools that are now standards in the Navy. Process improvements for the issuance of Naval instructions transitioned the Navy from printing and mailing instructions to on-line issuance only.
- Assisted in the management of deployment teams that implemented the Electronic Record Management Solution (ERMS) (TRIM Context 6.1) across the Department of the Navy across 41 separate datasets and 400,000 user licenses. Today the Navy Risk Management system contains millions of records associated with the function, management and warfighting of the US Navy.
