Summary

Strategic and results-driven Technical Product owner with deep expertise in Agile software development, product execution, and stakeholder collaboration. Proven ability to lead cross-functional teams and deliver impactful solutions across diverse domains including Life Sciences, Supply Chain, Retail Management, Investment Banking, Statistical Computing, Connected Medical Devices, ERP, CRM, Data Engineering, AI/ML, and data visualization. Skilled in prioritizing features, enhancing user experience, and maximizing product value. Recognized for launching scalable products and driving a culture of continuous innovation.

Expertise

- **Soft Skill:** Leadership and Vision, Cross-Functional Collaboration, Time Management and Prioritization, Conflict Resolution, Stakeholder Engagement, Product Demo, Requirement Gathering and Analysis, Release Management, Feature Planning, Acceptance Criteria
- **Technology:** T-SQL, MongoDB, PySpark, Snowflake, Python, C#.NET, SAS, Confluent Kafka, Azure Cloud, Power BI
- **Concept:** Data Architecture, Data Governance, Data Modeling, MDM, Microservices, RESTful APIs, UI/UX, AI/ML
- **Tools:** JIRA, Confluence, Azure DevOps, Azure Functions, Azure Logic App, Azure Durable Functions, Figma, Profisee, Alation, Swagger, Postman, ERWIN, Monte Carlo, Dataiku, Splunk, Microsoft Fabric, Azure Data Factory, Azure Databricks, Microsoft Purview, Salesforce

Professional Experience

IQVIA | Manager - Technical Product Owner | Feb - 2014 - Present

Project: Life Science Application including RTSM/IRT, Supply Chain Management, Payment and CGM Device

- Led the successful product management initiatives on Microsoft Azure for Life Sciences web applications, including **Supply Chain Management and Payment Platforms**. The solution is built using **C#.NET** and **Salesforce** for robust APIs and business logic, **Confluent Kafka** for high-throughput and low-latency message streaming, and **Azure Function Apps, Logic Apps, and Durable Functions** for serverless orchestration, event-driven workflows, and long-running processes.
- **Led the strategy, prioritization and delivery of master data management solutions using Microsoft purview, Profisee, Dataiku, Alation and Monte Carlo to ensure data consistency, data lineage, quality, and governance across the organization**
- **Led the successful integration and AI/ML product of Life Sciences Apps and CGM to streamline data ingestion and transformation; developed and updated machine learning and statistical models; managed model evaluation, deployment, and monitoring using Azure Databricks and delivered insightful Power BI dashboards to uncover trends, patterns, and anomalies.**
- **Increased customer retention by 15%** through user-focused enhancement and **minimized customer-reported issues by implementing UI/UX improvements** based on user feedback and analytics
- **Collaborated with leadership and stakeholders** to define, refine and enhance the **product strategy and vision**
- **Facilitated grooming sessions** to refine the product backlog and user stories, ensuring alignment with business goals and inclusion of detailed technical specifications.
- **Led Sprint / PI Planning sessions**, prioritizing backlog items based on business value, dependencies, and technical feasibility in collaboration with architects and development teams.
- **Hosted and participated in Agile readout sessions across agile teams** to conduct gap analysis, designed both functional and technical workflows, and translated technical constraints for non-technical stakeholders.
- **Managed deployment activities**, including release planning, change request logging, and securing necessary approvals for production releases.
- **Performed system validation and supported UAT**, verifying end-to-end functionality across integrated platforms
- **Conducted cost-benefit analyses, ROI assessments, and NPV calculations** to support data-driven decision

Project: Life Science App (RTSM, eCOA and eConsent), Integration and Migration | Role: Technical Manager

- Managed and developed multiple Life Science Applications

- Led integration and migration projects across Clinical Trial Data, Clinical Lab Data, and medication temperature monitoring systems, ensuring seamless bidirectional data flow using Azure Databricks and Data Factory
- Led a cross-functional team including Leads, Architects, Project Managers, Business Analysts, and Developers
- Developed various functionalities using C#.NET, Python, T-SQL, PySpark, MS Fabric, Power BI and Azure App
- Managed and developed functionalities for Site, User, Patient, Cohort, Capping and Medication dispensing
- Designed and managed medication supply chain solutions, including predictive resupply models for medication
- Defined and implemented enterprise-wide data governance policies, enhancing metadata quality and discoverability within the Data Catalog. Automated data quality checks, cleansing, and validation across data pipelines using custom scripts
- Designed and developed RESTful APIs to enable real-time integration and data mapping
- Developed advanced SQL queries utilizing stored procedures, functions, triggers and views. Optimized query performance by analysing execution plans and minimizing index scans
- Led the inspection/audit by regulatory authority like FDA/MHRA, good understanding of 21 CFR Part 11
- Led CAPA (Corrective Action and Preventive Action)/Root Cause Analysis for system/process error
- Managed conflicts among team members and cross-functional departments; supported client UAT and collaborated with the sales team for product demonstrations
- Led RfX responses, authored SOW and negotiated contracts to support strategic business initiatives
- Delivered quarterly KPI presentations to the leadership team using Power BI, providing data-driven insights into project performance and operational efficiency

Project: Customized JIRA to enhance project delivery by streamlining workflows for Change Requests, integrating with Incident Management and Billing Application

- Led multiple WIGs (Wildly Important Goals) to enhance quality and ensure timely delivery of projects, change requests, production issue investigations, and data change requests
- Defined FMEA (Failure Modes and Effects Analysis) for each process step, identifying potential failure modes, effects, severity, occurrence, and detectability. Calculated Risk Priority Numbers (RPN) based on severity, occurrence, and detectability scores to implement corrective actions
- Customized JIRA workflows, SOPs, and Work Instructions to align with optimized enhanced processes

Thomson Reuters (International) Private LTD | Senior Software Engineer | Mar 2010 to Feb 2014

- Advanced through several promotions, from Software Engineer to Senior Software Engineer.
- Handle 2 junior developer along with own daily assignment. Worked as developer with JAVA, SQL Server, Crystal Report, UNIX, and Shell Script.
- Worked on entitlement system where in Financial Products of Thomson Reuters are entitled to its customers
- Worked on web-based entitlement system built to support Thomson Reuters IB (Investment Banking) products.

Cenduit (India) Service Private LTD | Software Engineer | Sep 2008 to Mar 2010

- Worked as Software Engineer with .NET, SQL Server, Crystal Report and Business Object
- Worked on IRT (clinical Trial) on multiple functionalities like Enrolment, Randomization (mirror /crossover /minimization). subject dispensing, blinding and unblinding Worked on material management like MRM, DARM, Resupply (Forecasting). Develop multiple automation like Alcira Integration, Site and User management

Everest Management Software Private LTD | Software Engineer | Mar 2008 to Aug 2008

- Worked as Software Engineer with .NET, SQL Server, and Crystal Report technology.
- Worked on a Retail Management Application with Disconnected PO (Purchase order can be created Offline), Tax Customization and Report, Inventory Management Customization, Pull Sheet Customization and Report, Pick ticket Customization and Report, Sales Invoice, Order, Quote, Credit/Debit.

Blue Chip Computer Consultant Private LTD | Software Engineer | May 2006 to Mar 2008 Advanced through several promotions, from Project Trainee to Software Engineer.

- Worked on .NET, SQL Server, Crystal Report, ERP system (Syteline).
- Worked on multiple functionalities like Customer Purchase, Transfer and sell Order Module

Education: Master of Computer Application (MCA) || Bachelor Of Computer Application (BCA)

Training and Certifications: CSPO (Product Owner) || CSM (ScrumMaster) || Azure Databricks || Power BI
