5113 Pamplona Dr., Pasco, WA 99301 | 509-378-0523 | dmoore@moore-it.cloud | <https://moore-it.cloud> | <https://www.linkedin.com/in/donald-moore/>

Professional Summary

Senior Cloud and DevOps Leader with proven expertise in Azure architecture, DevSecOps strategy, and Infrastructure as Code (IaC). Skilled in leading cross-functional teams, managing cloud budgets, and driving operational excellence. Key contributor to federal compliance efforts, including the ongoing Authority to Operate (ATO) process for NESTNet, where responsibilities include NIST 800-53 control validation, DISA STIG hardening, and security documentation development. Recently led initiatives that reduced maintenance and operations (M&O) costs by 50% through strategic use of IaC and automation.

Professional Experience

Senior Cloud Engineer / DevSecOps Lead

Pacific Northwest National Laboratory — February 2020 – Present

- Spearhead Azure Cloud strategy across three environments, driving secure and scalable architecture using Azure Bicep and IaC.
- Manage a small cloud operations team, overseeing budgeting and resource planning for cloud infrastructure and developer tools.
- Designed and implemented IaC pipelines for a developer platform (Forge), reducing maintenance and operations costs by 50%.
- Provide technical leadership in GitLab CI/CD, Kubernetes-based GitLab infrastructure, and cloud-native automation with Python and PowerShell.
- Support DevSecOps practices, mentoring developers in secure coding, cloud deployment, and tooling best practices.
- Collaborate with stakeholders to ensure the platform aligns with mission-critical software development and compliance goals.
- Supported cross-cloud deployments and automation in AWS, leveraging native services and IaC tools for hybrid solutions.
- ATO / Compliance (NESTNet): Serve as a key contributor to the ongoing Authority to Operate (ATO) process for NESTNet, preparing system security documentation (SSP, POA&M, assessment artifacts), validating NIST SP 800-53 control implementation, and applying DISA STIG hardening across endpoints and servers. Collaborate with ISSOs, auditors, and system owners to remediate findings and strengthen accreditation readiness.

IT Customer Service Tech I/II

City of Richland – Richland, WA — September 2016 – January 2020

- Ensured stable operation of all computer hardware and software, including peripherals.
- Created and implemented desktop security policies across city systems.
- Developed, deployed, and supported desktop images, applications, and software updates via SCCM.

Workstation Technician

Pasco School District – Pasco, WA — September 2014 – September 2016

Computer Tech Support Analyst

Lockheed Martin – Richland, WA — April 2009 – September 2014

Awards & Honors

[NNSA CIO Award, 2025](#) – Recognized for excellence in cloud strategy and leadership at PNNL.

Technical Competencies

- Cloud Platforms: Azure (primary), AWS (2 years), GCP (supporting)
- DevOps & IaC: GitLab, GitHub, Azure DevOps, Kubernetes, Azure Bicep, CI/CD pipelines
- Scripting & Automation: Python, PowerShell
- Security & Compliance: NIST SP 800-53, RMF familiarity, DISA STIGs, SSP & POA&M drafting, accreditation support
- Clearance: Active Security Clearance

Certifications

[Microsoft Certified: Azure Solutions Architect Expert](#)

[CompTIA Project+](#)

[Kubernetes and Cloud Native Associate](#)

Education

Master of Business Administration in Information Technology Management - 2017

Bachelor of Science in Information Technology - 2015

Western Governors University, Salt Lake City, UT
