

EXECUTIVE SUMMARY

An accomplished professional with 9+ years of experience in the State/City government sector, financial services, and business process solutions. Expertise includes managing multiple projects, leading teams, building customer/vendor relationships, gathering requirements, and developing software applications. Motivated individual with a positive track record of managing projects from start to finish. Skilled at understanding customer requests and meeting their needs.

CAREER EXPERIENCE

Project Management/ Quality Assurance (PMQA) Consultant

NYC Department of Information Technology and Telecommunications (DoITT) 1/2021 – Present

Project: NYC COVID-19 Vaccine Hub/ Contact Tracing/ NYC Covid Safe/ NYC Cupid/EHV/Asylum Seeker

- Lead City Agencies: **Health + Hospitals, Department of Social Services, Department of Homeless Services, Public Engagement Unit, Department of Health and Mental Health, Asylum Seeker Application Help Center.**
- Manage the integration of secure solutions across different NYC agencies, overseeing business requirements, technical specifications, and technology solution development.
- Provide consistent and secure integration solutions, ensuring compliance with business requirements, requirements gathering, identification, and approval of technical specifications, and developing technology solutions.
- Collaborate with Solutions Managers, Engineers, Applied Engineers, Architects, and Project Managers to deliver desired functionality within the system of systems.
- Ensure and maintain a stable enterprise architecture, following best engineering practices.
- Led comprehensive end-to-end thread testing discussions and identified areas for automation and scripting, streamlining testing processes.
- Provide engineering expertise in creating, optimizing, and executing QA/Acceptance Test Plan (ATP) test plans across the enterprise.
- Standardize, simplify, rationalize, and organize project reporting to improve execution.
- Liaise with project sponsors, stakeholders, developers, and analysts; establish professional solid relations with external IT vendors.
- Identify improvement initiatives on the Salesforce platform for the Contact Tracing, COVID-19, COVID Safe, Cupid, EHV, and Asylum Seeker area(s) of responsibility, create action teams, and lead projects.
- Develop and support internal audits to ensure compliance with Federal vaccination, housing vouchers, and user permission standards and alignment with customer quality requirements.
- Subject matter expert in customer engagement, business, and technical solutions for Salesforce.

Senior Business Analyst

New York State Department of Motor Vehicles (DMV)

5/2020 – 11/2020

Project: Leading DMV Modernization Data Quality /System Integration project

- Managed projects using Agile project management and modernized and built a web-based enterprise-wide system (DMV-MOD).
- Liaised with business users and IT organizations throughout the application development life cycle to ensure the solutions satisfied the stakeholders' requirements.
- Responsible for analyzing data anomalies with existing Mainframe DB2 systems and worked with the development team to design future data models/ data quality framework.
- Worked extensively with data scrubbing, data transformation, and validations. Resolved data quality on legacy DB2 applications and performed data testing for future systems.
- Created data mapping documents and mapped sources and destination files.
- Prepared business process descriptions, requirement epics, user stories prototypes, and screen mock-ups for review with stakeholders.
- Managed Agile Sprints by updating Epics, User stories, and Tasks in JIRA and Confluence.
- Subject matter expert on QA system integrator testing.

Senior Business/ Data Analyst

Department of Education (DOE), Brooklyn, New York, NY

5/2018 – 5/2020

Project: Led multiple data-driven projects in the Office of Data Management (ODM)

- Led Data Quality and Operations that included maintaining SQL Central data repository, assessments processing, and Federal Civil Rights reporting compliance. Implemented standard protocols for SQL user access, auditing, and review.
- Responsible for organizing and coordinating with the Data Governance Council, business executives, and Senior Management, framing data quality issues for discussion and resolution, and facilitating business data agents in defining business entities, attributes, and data quality requirements.
- Liaised with business subject matter experts in analyzing business requirements, developing data flow diagrams and state diagrams, translating them into detailed conceptual data/logical/physical/process models, and schema development in the database.
- Tracked project metrics to measure progress while managing risks, project plans, and activities involving system users and IT development staff. Ensured DataMart requirements were identified, validated, and met stakeholders' specifications.
- Liaised with software developers and senior database administrators to establish standard operating procedures, SOA, and Design Briefs on database design and best designing practices and improve software applications.
- Managed legacy DB2 historical data migration into newly designed data marts by analyzing and improving the load strategy of the existing ETL developed using SSIS and T-SQL.
- Led the Stored Procedures, triggers, views, user-defined functions, sub-queries, and joins for complex queries involving multiple tables and exception handlers.
- Defined data strategy and acquisition methodology for moving data from multiple upstream systems and created the data validation and Control Frameworks.

Business Analyst Lead

Department of Youth & Community Development (DYCD) NY, NY

11/2016 – 5/2018

Project: DYCD Online and DYCD Connect.

- Built a web-based enterprise-wise (PTS) system that automated the DYCD application process, tracking, and overall case management.
- Spearheaded scope and communication through periodic reviews with Associate Commissioners, CIO, Deputy CIO, and IT/Business Directors for requirement analysis across nine (9) program areas and 30 program types offered by the agency through contracted providers across all NYC boroughs.
- Responsible for eliciting functional requirements analysis, design review, test plan/cases review, developing prototypes and screen mock-ups for UAT completion, and Train-The-Trainer sessions.
- Conducted Risk Mitigation meetings with stakeholders and defined mitigation strategies.
- Developed security permission matrix by delineating functionalities by User roles and privileges.
- Led data migration efforts for contracts and participants' registration data from the legacy system to MS Dynamics.
- Supervised and guided the data dictionary development, review, and approval of Contracts and Participant Registration Data.

Technical Business Analyst

Department of Health and Mental Hygiene, Long Island City, NY

7/2015 – 9/2016

Project: Leading multiple data-driven projects on Public Health Partner Connect - PHPC

- Collaborated with business partners, SMEs, and core technology team to gather technical requirements and data sources and created a data mart to manage data.
- Coordinated and directed all Scrum Ceremonies, including Sprint Planning, Daily Standups, Sprint retrospectives, Sprint Demos, Story Grooming, and Release Planning.
- Designed data model concept to include logical and physical data models for data warehousing, reporting, and near real-time systems.

- Delivered the completeness and accuracy of the counterparty data. Performed GAP analysis and recommended subsequent processes. Authored and Reviewed 100+ pages of Business Requirement Document (BRD) and Functional Data Dictionary outlining requirements and implementation.
- Built relationships to cultivate and maintain effective working relationships at all levels of the organization to meet global objectives in a large, dynamic, and cross-functional organization.
- Employed Business Model development using different functionalities like Dimensional Hierarchies, Level Based Measures, Aggregation Rules, and Time Series Functions using Expression Builder.
- Used OBIEE Admin Tool to develop three layers of repository and analyzed current business intelligence and trend data to support recommendations for execution.

EDUCATION

- MSc in Computer Science from Long Island University, NY
- MBA from the Cardiff Metropolitan University, Cardiff, UK
- BBA from Sardar Patel University, Gujarat, India
- Certifications: CIMA, London School of Accountancy and Management, London, UK

TECHNICAL SKILLS

- **Methodologies:** Agile, Waterfall, RUP
- **Project Management:** Azure DevOps, JIRA, TFS MS Project, HP-ALM, Confluence
- **Databases:** MS SQL, Oracle, Access, Teradata, DB2
- **Modeling Tools:** MS Visio, ERWIN, Balsamiq
- **BI Tools:** Tableau, Power BI, Crystal Report, XSL-FO, MS Excel, VBA, SSMS, TOAD
- **Languages:** C, VBA, C++, Unix/Linux, Shell Scripting, R, SQL
- **Applications:** Salesforce, R-studio, Microsoft Dynamics CRM 2016, Wireshark, X2go, C, C++, TCP, UDP, Shell Scripting, MS Visio, MinGw, Github, Gitlab, Subversion, Jenkins, Linux, MS 365, SQL.
