Summary

Hello! I have decades of experience creating human-centric strategies, innovative solutions and effective communications. I led clients into remote work during the pandemic, to keep a multi-billion program on schedule.

I have 10 years of experience in OCM. I have 15 years of experience in corporate communications.

My creative work as an individual has had global impact, and made positive social change. My work has been globally endorsed by the United Nations. It has been the banner on Google for a day (and I wasn't working for Google at the time).

I'm skilled at creating communication and OCM strategies/ plans. I implement programs to boost employee engagement.

I'm fascinated by the human brain. I study neuroplasticity in my free time. I've been around the globe, including the Arctic Tundra (in December). **Willing to relocate.
