SUMMARY

[REDACTED] is a seasoned Technical Program and Capture Manager with over 20 years of experience leading high-impact programs across defense, national security, and civilian sectors. As Founder of Jegnite Solutions, LLC, she has directed system integration efforts and delivered mission-aligned solutions for agencies including DHS, DISA, SEC, and the Department of Treasury. She brings a unique blend of strategic capture leadership, program execution excellence, and technical fluency — having led award-winning proposal efforts and managed complex delivery teams under dynamic federal constraints. Known for forging clarity in ambiguity, aligning cross-functional teams, and driving successful outcomes at scale, Ms. Yeshigeta is well-positioned to lead integrated autonomy programs and deliver results that matter.

- Google Workspace Professional Administrator – Issued 2024

PROFESSIONAL EXPERIENCEDEC 2019 – PRESENT **JEGNITE SOLUTIONS**

WASHINGTON, D.C.

Agency: Department of Homeland Security (DHS)

Technical Project Manager: Contracted as the Technical Project Manager for the Google Workspace/Google Cloud SaaS offering. Developed the Strategic Roadmap on a contract year basis to meet mission objectives. Managed the day-to-day operations of the platform while supporting tenant project onboarding and migrations. Developing project schedules for new functional and security implementations, tracking progress against baseline schedule. Elicited

business requirements and defined acceptance criteria. Lead tenant migrations between Google Workspace Enterprise platform with over 1,000 users. Conduct functional testing on technical implementations, prepared Change Requests for production release. Managing risks and issues, escalating recommended mitigation strategies to leadership for System Owner awareness and decision. Architecting solutions for multifactor authentication implementation, coordinating with cybersecurity teams. Updating security control responses to the System Security Plan and system documentations as necessary. Integral in resolving POAMs resulting in a healthy security scorecard.

Agency: Department of Homeland Security (DHS)

Program Manager: Contracted as the Program Manager for a DHS cloud hosting platform in AWS GovCloud. Contributed to the successful recompete proposal of a multi-million-dollar federal contract, resulting in contract award. Developed the annual Strategic Roadmap to achieve mission objectives and fostered direct relationships with key stakeholders across DHS components. Managed a 17-man team of engineers, cybersecurity analysts and business analysts. Developed direct relationships with COTR, and various system owners across DHS components and offices. Managed the day-to-day operations of the platform, facilitated tenant project migrations from Drupal 7 to Drupal 9. Developed MOAs, Budget Cost Estimates, tracked and renewed software license and AWS credit balances. Served as the PM for upgrading and migrating high-profile websites (such as DHS.gov, NIEM.gov, FLETA.gov, FLETC.gov and US Secret Service.gov) to Drupal 9 while adhering to the U.S. Web Design Standards. Additionally, ensured platform security compliance, collaborated with CGI on STIG hardening configurations resulting in a 100% system scorecard. Managed the cloud migration to AWS while supporting the ATO renewal. Played a key role in developing system documents and delivering technical presentations, conducting annual Contingency Plan Tests. Lastly, I developed and coached PMs and Business Analyst in the areas of project management, agile development, story point estimation, risks, and issues management.

➤ **Recognition and Awards:**

Awarded a U.S. Secret Service Certificate of Appreciation for leading program management efforts to modernize and enhance the Recruiting Office's careers page, supporting federal hiring objectives.

OCT 2018 – DEC 2019

JEGNITE SOLUTIONS

WASHINGTON, D.C.

Agency: Department of Homeland Security

Technical Project Manager: Contracted as the Technical Project Manager for a DHS MVP cloud infrastructure platform, concurrently served as the ScrumMaster, leading a 15-member agile engineering team. Employing Atlassian suites such as JIRA and Confluence. Adeptly managed sprints and system documentation. My responsibilities extended to developing technical presentations for decision-makers and creating new operational processes and policies for day-to-day operations and tenant onboarding. Played a crucial role in overseeing migration activities for the initial tenant onto the Cloud Factory Platform and actively contributed to the remediation of high-severity Plan of Action and Milestones (POAMs) resulting in an Authorization to Operate (ATO). Additionally, led initiatives for developing the System Training Plan for the platform.

APR 2018 – SEP 2018

JEGNITE SOLUTIONS

WASHINGTON, D.C.

Agency: Department of Education

IT Management Consultant: Served as an Independent Contractor for R3 Government Solutions for work under the Federal Student Aid's Next Generation Data Center Migration. Services include SDLC, Earned Value Management and cloud migration consultation.

AUG 2017 – MAR 2018

METROSTAR SYSTEMS

WASHINGTON, D.C.

Agency: U.S. Department of Treasury

Project Manager: Served as the Project Manager for several sub-task orders under the U.S. Treasury Community Cloud (FedRAMP) in AWS. Projects include system migration assessments to AWS GovCloud, system migrations to the Cloud, Mobile PIV Credentialing implementation, Tableau server-side implementation. Drupal site enhancements for the federal client. Additional duties included market research, RoM for cloud hosting and implementation cost estimations, and development of SOW. Developed several project management and system artifacts. Lead technical working sessions with key technical SMEs. Managed T&M and FFP contracts with associated risks and constraints.

JUNE 2014 – AUG 2017

STG, INC.

WASHINGTON, D.C.

Agency: U.S. Securities and Exchange Commission

Project Manager: Provided the U.S. Securities and Exchange Commission (SEC) Office of Information Technology (OIT) with Project Management support and activities. Responsible for the project inception development activities through system implementation and retirement. Contributed to the development of acquisitions strategies and participated in Technical Evaluation Panel Reviews. Implemented and modernized various complex IT projects to include Cloud based solutions, enterprise-wide infrastructure solutions, client-side software, and Windows 2012 Server upgrades. Executed projects according to the SEC's Waterfall Development and Scrum Development methodologies. Project Management responsibilities include:

- Lead the system development activities for the Salesforce Service GovCloud (FedRAMP)
- Participating in Scrum Meetings, Sprint Reviews, Release Reviews and Technical Working Sessions for Salesforce Service Cloud project.
- Managing an Integrated Project Team (IPT) of 13 members for the IBM Aspera Managed File Transfer project
- Led and presented at Design-Technical Review Boards and Project Review Boards.
- Implemented and successfully closed CIO Priority Project Initiatives and presented to CIO and SEC Senior Level Managers on project status.
- Coordinated with OIT Functional Managers for Windows Team, DBA resource allocation, testing efforts, server builds/ configurations, deployments, and production environments.
- Utilized CA Clarity Project and Portfolio Management (PPM) and eCPIC software to manage and develop monthly reports/presentations to C level executives and Branch Chiefs.
- Assisted with the development of SOWs and System Security Plans
- Developed project schedules via MS Project 2010 capturing resources, milestones, leads and lags.
- Produced project artifacts to include Lessons Learned, Risk Log, Issues Log, SOP, and Acceptance Criteria.

- Additional duties include coordinating efforts to close Plan of Action & Milestones (POA&M) addressing security vulnerabilities, and configuration management best practices.
- Contributed to Pink Team and Red Team Reviews for re-compete bid.
- Championed new Standard Change to CCB and CIO Governance Staff for routine low risk/impact SharePoint enhancements, changes improved turnaround time for business customers.
- Recognition and Awards:
 - ❖ *Received a Certificate of Appreciation for Excellence in providing exceptional Project Management Services; Awarded February 2015*
 - ❖ *Received a Certificate of Appreciation for Excellence in providing exceptional Project Management Services; Awarded July 2015*
 - ❖ *Received Certificate of Appreciation for Significant Contribution to the SEC PMO IDIQ Contract Proposal Effort; Awarded July 2015*

APRIL 2013 – JUNE 2014

GENERAL DYNAMICS IT

FAIRFAX, VA

Agency: State of Pennsylvania

Deputy Project Manager: Responsible for developing the Project Management Plan for the implementation of a modernized enterprise retirement system for the State of Pennsylvania.

- Developed the Software Development Management Plan by following industry SDLC standards.
- Developed a comprehensive Project Management Plan to include a Cost Management, Time Management, Risk Management Plan, and other project artifacts.
- Created a detailed 1,000-line project schedule with resources, duration, dependencies, and predecessors.
- Closely aligned the Scope Management Plan, Requirements Management Plan, Work Breakdown Structure, and the Risk Management Plan with respect to the Software Development Plan.
- Organized project artifacts and communication by developing an external SharePoint site for active collaboration.
- Other activities include coordinating project status meetings and leading discussions, managing the project log to track action items, risks, schedule, and deliverables.

Capture Manager: Provided capture management support for the Health and Human Services Business Area. The goals of this role were to assess potential strategic business opportunities and shepherd them onto post submittal of a proposal. Capture activities include the following:

- Conduct competitive market analysis, internal review of SWOT analysis, and prioritize opportunities.
- Further efforts require the development of a Capture Management Plan to include teaming partners, gathering customer intelligence, identifying risks and acquiring technical resources to begin solution approaches.
- Reviewed Requests for Proposals (RFPs), Request for Information (RFI), and Sources Sought for purposes of assessing the business need, identifying requirements, and conducting a capabilities matrix.

- Developed capture and proposal schedules to ensure key personnel are available and prepared to meet senior management decision milestones and responses are submitted on time.
- Documented statement of work (SOWs) in conjunction with Teaming Agreements between corporations.
- Developed matrixes and templates to ensure compliance of corporate proposals with government requirements and contracts.

DEC 2008 - AUG 2013

GENERAL DYNAMICS IT

FALLS CHURCH, VA

Agencies: U.S. Food and Drug Administration, Defense Information Systems Agency, and U.S. Secret Service

Project Coordinator: Simultaneously supported 14 multi-million-dollar IT task orders (ranging from \$1M-\$30M) of varying contract types for federal customers including FDA ITC21, FDA eMail, and the Defense Information Systems Agency (DISA) while also supporting the development of GDIT's Cloud Computing (Email as a Service) business offering. Support activities included the following:

- Managed the Day-to-Day Task Order operations, serving as the liaison between the project manager, project team, clients, and senior management.
- Coordinated with internal functional departments including Finance, Human Resources, Contracts, and Purchasing for project support.
- Developed project expenditure plans, forecasting, monitoring, and analyzing project performance and budget.
- Drafted Work Packages issued Purchase Orders and verified invoices from subcontractors.
- Contributed to systems engineering meetings, identifying items for BoMs, and requesting quotes from vendors.
- Prepared briefings for senior executives and key stakeholders utilizing Earned Value Management (EVM) methodologies.
- Frequently engaged in Face-to-Face meetings with clients, team members and senior level executives to resolve issues and present information.
- Performed editorial reviews and prepared technical status reports highlighting efforts, achievements, and goals for customer awareness.
 - ❖ *Managed and closed 12 projects (combined value of \$10M) within budget and labor category restrictions as mandated by the DISA contract.*
 - ❖ *Identified and mitigated personnel and funding risks for the DISA Global Command and Control System- Joint (GCCS-J) project valued at \$1.4M.*
