

SATWANTH VARDHINEEDI

+1-203-606-7186 • satwanthnaidu.v@gmail.com

Data Engineer

- Data Engineer with around 6 years of experience designing and building scalable data solutions across banking, healthcare, and e-commerce domains.
- Skilled in building **ETL/ELT pipelines** using Python, SQL, and Apache Spark for batch and Kafka for streaming data.
- Extensive experience using **multiple cloud platforms** including **Azure, GCP and AWS** and data warehousing solutions such as **Snowflake, Redshift, Synapse Analytics and BigQuery**.
- Strong background in **data modeling (star/snowflake schema)**, query optimization, and data governance (HIPAA/GDPR).
- Experienced with **Kafka-based real-time streaming** and large-scale distributed data processing.
- Deep knowledge of data governance and security, implementing best practices for data quality, compliance, encryption, and access control to protect sensitive information.
- Practical experience in MLOps and real-time data processing, enabling seamless deployment, monitoring, and management of machine learning models and streaming data pipelines.

WORK EXPERIENCE

PNC Bank - New York, United States

Data Engineer | July 2025 - Present

- Automated workflows and data pipelines with Python and SQL, reducing manual reporting by **35%**.
- Built streaming pipelines with Kafka, improving transaction data consistency and cutting latency by **20%**.
- Designed and optimized data warehouses in Redshift and Snowflake, boosting query performance by **40%**.
- Partnered with analysts and compliance teams to deliver regulatory dashboards in Power BI/Tableau.
- Ensured data security and governance aligned with U.S. banking compliance standards.

Tenet Healthcare - Hyderabad, Telangana

Data Engineer | Dec 2022 – Dec 2023

- Developed PySpark/SparkSQL ETL pipelines, reducing reporting turnaround by **30%**.
- Built scalable data solutions on **Google Cloud (BigQuery, Dataflow, Cloud Storage)**.
- Designed healthcare data models (EHRs, billing, patient histories) using star schemas.
- Implemented HIPAA-compliant role-based access, encryption, and automated auditing.
- Delivered real-time clinical dashboards in Power BI/Tableau, enhancing patient care visibility.

Wayfair - Hyderabad, Telangana

Data Engineer | Mar 2020 – Nov 2022

- Designed Python/SQL ETL pipelines, reducing data latency by **25%** and enabling near real-time reporting.
- Leveraged Azure Data Factory, Synapse, and Databricks to build scalable e-commerce data infrastructure.
- Implemented Kafka streaming to track supply chain and user activity in near real-time.
- Optimized Spark jobs and Databricks clusters, supporting **millions of daily events** cost-effectively.
- Built CI/CD pipelines with Jenkins and Docker, improving deployment speed by **30%**.

EDUCATION

Master of Science (M.S.) in Business Analytics

University of New Haven • West Haven, CT, United States

CERTIFICATIONS

Google Cloud Certified Associate Cloud Engineer

07/23 -07/26

SKILLS

Programming Languages: JavaScript, Python, SQL

Databases: Cassandra, MongoDB, MySQL, PostgreSQL

Big Data Technologies: Hadoop, Kafka, Spark

Cloud Platforms: AWS (S3, Glue, Lambda), Azure (Data Factory, Databricks, Synapse, ADLS), Google Cloud Platform

Data Warehousing: Azure Synapse Analytics, BigQuery, Redshift, Snowflake

ETL Tools & Processes: AWS Glue, Custom ETL scripting, Dataflow

Data Modeling & Architecture: normalized/denormalized data models, Snowflake schema, Star schema

Data Visualization: Power BI, Tableau

Data Governance & Security: access control, Data quality frameworks, encryption, HIPAA/GDPR compliance

DevOps & CI/CD: Docker, Jenkins, Terraform

Methodologies: Agile, Scrum, SDLC

Soft Skills: Adaptability, Analytical skills, Attention to detail, Communication, Critical thinking, Decision-making, Problem-solving, Project management, Teamwork, Time management
