EDUCATION

Master in Analytics and Systems

University of Bridgeport, Connecticut, USA

B.Sc. in Computer Science

Mahatma Gandhi Kashi Vidhyapathi

University, Varanasi, India

CORE COMPETENCIES

- Business Analysis
- Stakeholder Engagement
- Process Optimization
- Root Cause Analysis
- Process Documentation
- KPI & Performance Metrics
- Cross-functional Coordination

SKILLS

Methodologies:

SDLC, Agile, Waterfall

Documentation:

FRD, BRD, SRS, Test Plan, User Guide

Project Management Tools:

MS Project, MS Excel, MS SharePoint, Asana, Trello, Jira, Rally

Visualization Tools:

Tableau, Power BI

Cloud Technologies:

Amazon Web Services, Google Cloud Platform

CRM:

Salesforce, HubSpot

Analysis Skills:

Cost/benefit analysis, Impact analysis, GAP analysis, Risk analysis, SWOT analysis.

Tracking / Other Skills:

Microsoft Visio, RTM, UAT, KPI, Requirement gathering, Google Analytics, Data Analysis, MS Visio, MS Office, Software development & testing, PowerPoint

Soft Skills:

Communication Skills, Time Management, Leadership, Adaptability, Decision Making and Risk Management

Operating Systems:

Windows, Linux, Mac iOS

SUMMARY

- **Business Analyst** with 3+ years of experience across finance and healthcare domains, skilled in requirement elicitation, gap analysis, process mapping, and regulatory compliance, with a strong foundation in both Agile and Waterfall methodologies.
- **Proficient in using Microsoft Visio for workflow mapping**, JIRA and Confluence for Agile project management, SQL for data analysis, and Power BI and Tableau for dashboard development and reporting.
- **Showcased success in facilitating JAD sessions, conducting UAT, and authoring key artifacts** like BRDs, FRDs, test plans, and stakeholder analyses—enhancing documentation quality, stakeholder alignment, and delivery outcomes.
- **Skilled at identifying automation and cost-saving opportunities** through deep-dive analysis of financial transactions and healthcare databases, supporting fraud detection, Medicaid compliance, and real-time operational decision-making.

EXPERIENCE

Wells Fargo | Aug'23- Present

Business Analyst

- Mapped 12 financial data exchange processes using Microsoft Visio, supporting compliance initiatives and reducing manual reconciliation efforts across three business units.
- Facilitated 5 JAD sessions through Microsoft Teams, aligning fraud detection objectives among cross-functional teams, including IT, compliance, and vendor stakeholders.
- Defined and validated 15 anti-fraud business requirements and 8 use cases in Microsoft Word, ensuring alignment with regulatory and internal audit expectations.
- Analyzed over 100,000 transactions using SQL, identifying anomalous patterns and recommending 3 automation opportunities to improve fraud detection accuracy and processing speed.
- Built a centralized fraud risk inventory in Microsoft Excel, categorizing risk levels and enabling faster resolution of high-priority financial anomalies.
- Documented 2 legacy fraud systems and 10 workflows in Confluence, creating a searchable repository for audits, process improvements, and staff onboarding.
- Developed and executed 10 test cases using JIRA, validating business logic, fraud alert rules, and functional specifications across UAT and production environments.
- Performed data quality checks using Power BI, resolving 8 data inconsistencies and ensuring SLA adherence across transaction monitoring and compliance reporting systems.

NextGen Healthcare, India | Jul'19- Jun'22

Business Analyst

- Initiated 6 requirement workshops and 10 stakeholder interviews to define healthcare needs, creating 4 BRDs and scope documents that reduced project rework by 30%.
- Outlined 10 process workflows during a gap analysis for a health system, gathering 25 requirements through 8 interviews and 5 JAD sessions, producing 35 user stories.
- Captured requirements for a Utilization Management module by leading 3 JAD sessions with clinical, technical, and compliance teams to document claims, eligibility, and approval workflows.
- Coordinated 2 healthcare integration projects using JIRA and Confluence to manage sprints and documentation, improving cross-team collaboration and reducing delivery delays by 20%.
- Explored data from 3 healthcare databases using SQL, identifying \$40K in potential cost savings and improving Medicaid reporting accuracy and compliance by 10%.
- Designed 3 Tableau dashboards to visualize patient utilization and outcomes data, enhancing accessibility and increasing real-time decision-making capabilities by 20% for healthcare managers.
- Worked on 8 UAT sessions, validating features against business needs. Authored 100 test cases and 80 conditions, achieving 90% test coverage and successful stakeholder signoff.
- Compiled 3 stakeholder analyses, 4 BRDs, 5 FRDs, and 3 test plans, enhancing documentation standards and supporting compliance, audit readiness, and knowledge sharing across teams.
