PROFESSIONAL SUMMARY

8+ years of hands-on experience in Software Quality Assurance and diversified experience in Automated, Manual, Functional, Performance testing of Web and Client/Server applications on UNIX /Windows environment. Self-motivated, organized, passionate and detailed oriented with extensive business acumen of governance, technology, problem-solving, design, and delivery in implementing the strategic quality assurance testing mechanisms.

SKILLS & TOOLS

- Test Plans
- Test Cases
- Requirement Gathering & Analysis
- SDLC
- Agile
- Waterfall
- Scrum
- Kanban
- Cross Functional
- MS Project, SharePoint, Excel, Visual Studio, Teams, Azure, PowerPoint, Outlook, Vlookup
- Selenium Webdriver
- IOS, Android, XCode, SDK, Simulator, Adobe in Design, iFunbox, Content Viewer.
- Load Runner
- Postman
- ALM Quality Center
- HP Load Runner
- Jira
- Salesforce
- GitHub
- Jenkins
- Selenium IDE
- Oracle
- SQL Server

WORK HISTORY

Criterion Systems - QA Engineer

New York • 01/2023 - 08/2025

Worked on FEMS (Fire Environment Mapping System), an application that supports wildland fire preparedness and decision-making with better access to fire environment datasets and online analysis tools.

- **Agile Ceremonies** - Attended kick off, daily standup, product backlog refinement, sprint planning, and sprint retrospective meetings.
- **Client Demos** - Demoed all updated bug fixes and features to the end clients.
- **Test Design** - Created test cases using requirements, acceptance criteria, & user stories.
- **Document Review** - Reviewed & provided input on the BRD, FRD, & DD.
- **Test Execution** - Conducted blackbox, white box, front end, back end, functional, non-functional, end-to-end, smoke, regression, and other testing methodologies.
- **Defect Triage** - Conducted defect triage meetings with developers.
- **Defect Tracking** - Created & tracked defect tickets via Jira & ZenHub.
- **Backend Testing** - Conducted backend testing via PgAdmin using SQL.
- **UAT Leadership** - Led and conducted User Acceptance Testing by creating scenarios, monitoring, and documenting results.
- **Load & Performance Testing** - Conducted load and performance testing using JMeter to evaluate stability under high demand.
- **Cloud Applications** - Utilized AWS to execute JMeter load tests with desired concurrency levels and task counts.
- **Automation Testing, IDE** - Created automated test scripts using Selenium IDE's record/playback to accelerate regression testing.
- **Automation Testing, Java** - Developed and executed automated test scripts in Java using Selenium.
- **API Testing** - Created and executed API test cases with Postman and GraphQL to validate request/response accuracy.
- **SDLC Participation** - Attended and gave input on all phases of the Software Development Lifecycle.
- **Accessibility Testing** - Conducted 508 Compliance, WCAG, ADA

- PG Admin
- MY SQL
- MS Access
- MS Project, Excel, Visual Studio, SharePoint, Teams, Azure, PowerPoint, Outlook, Vlookup
- IOS, Andriod, XCode, SDK, Simulator, Adobe in Design, I Funbox, Content Viewer
- Bug Reporting & Defect Tracking
- Load & Performance Testing
- Manual & Automated Testing
- User Acceptance Testing
- Regression Testing
- Security Testing
- System Integration testing
- Functional & Non-Functional Testing
- 508 Compliance, WCAG, ADA Testing
- Smoke testing
- Black Box Testing
- UI Testing
- Database Testing
- End To End Testing
- Browser Compatibility Testing.

EDUCATION

Western Governor University

Bachelor: I.T Management,
Bachelor's in Science

CREDENTIALS

Certifications

CSM (Certified Scum Master)
CSPO (Certified Scrum Product Owner)
PMP (Project Management Professional)

Clearance

Public Trust

Work Authorization

United States Citizen

testing using WAVE, AXE, & JAWS Screen Reader

MUFG Bank of Tokyo (Financial, Audit, Risk Management) - QA Engineer

New Jersey City • 06/2021 - 11/2022

Worked on MUFG Mortgage origination and servicing platforms that help process home loans from application to closing, with online forms, compliance checks, and automated closing tools.

- **Document Analysis** - Analyzed financial/technical docs (TDD, BRD) for mortgage apps.
- **SalesForce** - Tested workflows, custom objects, and integrations using Jira/ALM and UAT.
- **Agile Ceremonies** - Led kick-offs, planning, and daily stand-ups.
- **Test Management** - Used Jira & ALM to manage test cases, results, and defects.
- **Data Validation** - Queried Oracle DBs and built QA reports in Tableau.
- **Defect Triage** - Collaborated with developers to resolve issues.
- **Business Insight** - Assessed QA impact on financial, middleware, and deployment areas.

UnitedHealth Group - QA Engineer

New Jersey City • 01/2021 - 06/2021

Worked on "Precheck My Script", a real time prescription tool that shows exact drug costs, coverage, and alternatives.

- **QA Ownership** - Solely signed off on testing before production releases.
- **Requirement Review** - Worked with BAs/Devs to clarify workflows.
- **Automation Scripting** - Built VBScript/QTP-UFT automation for regression and smoke.
- **Object Repositories** - Created and managed repositories for test execution.
- **Cross-Browser** - Performed manual and automated testing across devices/OS.
- **Team Coordination** - Synced with onsite/offshore teams and updated QA Manager.
- **Status Reporting** - Delivered daily updates in stand-ups and via Jira/email.

HOBSONS - QA Engineer

Arlington, VA • 07/2017 - 12/2020

Worked on "Naviance", an educational platform that helps students from K-12 plan their academic journey, explore career options, and prepare for college.

- **Requirement Analysis** - Reviewed BRS, SRS, and URD docs.
- **Mobile Testing** - Tested iOS and Android applications.
- **Automation Development** - Built descriptive programming and Selenium scripts.
- **Performance Testing** - Designed LoadRunner scenarios (Vuser, Rendezvous, Monitors).
- **Risk Analysis** - Defined scope, gaps, risks, and dependencies in status meetings.
- **Traceability** - Prepared traceability matrix for full coverage review.
- **Tech Stack** - Hands-on with GitHub, Jenkins, SQL, SDKs, and multiple platforms.
