

PROFESSIONAL SUMMARY

Cybersecurity Engineer with 10+ years of experience protecting enterprise IT environments across federal, and commercial sectors. Specialized in endpoint and network security, incident response, and regulatory compliance (FISMA, NIST, HIPAA, etc.). Proficient in tools such as CrowdStrike Falcon, Trellix ePO, and SIEM solutions. Proven ability to lead the deployment and administration of scalable security solutions across 40,000+ endpoints, reducing risk and ensuring continuous compliance. Strong communicator and trusted advisor to cross-functional teams and stakeholders.

TECHNICAL SKILLS

- Security Tools: CrowdStrike Falcon, Splunk 9.1, McAfee / Trellix ePO, Solidcore, and Tenable.
 - Platforms: Windows, Linux, Mac OS, Hyper-V
 - Ticketing: ServiceNow and Remedy.
 - Experience with SIEM, SOAR, and incident response Networking: TCP/IP, Active Directory, GPO, DNS.
-

PROFESSIONAL EXPERIENCE

Convergenz Corporation / U.S. Food and Drug Administration

CrowdStrike Cybersecurity Engineer

02/2020 – 05/30/2025

- Acted as primary point of contact for incident response and threat investigations, ensuring timely containment and resolution.
- Led deployment and administration of CrowdStrike Falcon sensors across 45K+ Windows, Linux, and Mac systems.
- Configured and optimized Falcon modules including Endpoint Security, Device Control (DLP), Identity Protection, Cloud Security Posture Management, and Firewall.
- Performed threat hunting and incident triage using SIEM, SOAR, Splunk and EDR platforms.
- Developed detection queries in Falcon LogScale to proactively identify and mitigate threats.
- Developed over 15 Splunk dashboards to monitor network traffic and detect commonalties and false positive detections to reduce the incident response.
- Created SPL quires for proactive threat detection and log correlation.
- Designed and implemented cloud security strategies, integrating security controls into the software development lifecycle.
- Produced detailed security reports and executive-level presentations on threat posture and strategic recommendations.

- Maintained and supported cybersecurity infrastructure, including firewalls, IDS/IPS, and other security appliances.
- Led post-incident reviews, delivering root cause analyses and recommending process improvements to strengthen response capabilities.
- Collaborated with cross-functional teams to define requirements, evaluate architecture, and propose secure solutions.

Trefil Consulting Inc. / Telpformance, Inc.

Systems Engineer / IT Consultant

05/2007 – 12/2019

- Managed McAfee ePO infrastructure for 15K+ systems, deployed VSE, HIPS, Drive Encryption.
- Vulnerability management and remediation utilizing Tenable scanner.
- Built and migrated VMs and physical servers (Windows 2003/2008/2012),
- Oversaw Active Directory administration, GPO creation.
- Led semi-annual business continuity planning (BCP) exercises.

Electronic Data Systems Inc. / BMO Financial Group

Systems Administrator

01/2000 – 04/2007

- Managed network operations for 12 locations in the Midwest region.
- Supported Windows OS rollouts and mainframe emulation software.
- Performed remote monitoring and troubleshooting of Novell servers using Insight Manager.
- Led setup and configuration of new branch sites.

EDUCATION & CERTIFICATIONS

- MBA, Information Technology Management – Jones International University, 2006
- VMware Certified Professional (VCP), 2013
- Citrix Server Administrator Certification, 2008
- McAfee Solidcore / Application Control, 2021
- CrowdStrike Falcon Admin 200-level Courses, 2023
- Palo Alto – PCNSE in progress, 2025
- CISSP (Certified Information Systems Security Professional), 2024

SECURITY CLEARANCE

- U.S. Government Secret Clearance (Granted January 2000)
