**Career Summary:** Results-oriented Business Analyst and Product Development professional with over 10 years of experience across industries such as medical devices, hospitality, and retail. Expertise in translating complex business needs into actionable strategies and product solutions, driving operational efficiency, innovation, and customer satisfaction. Proven track record in managing cross-functional teams, gathering and refining requirements, prioritizing product backlogs, and leading feature development across multiple platforms. Skilled in leveraging technology and business insights to deliver impactful results that enhance both user experience and business performance.

### KEY ACHIEVEMENTS

- Led a project to launch a sound-level measuring application within a tight deadline of 45 days. Defined requirements, facilitated standup meetings and proactively resolved roadblocks.
- Achieved successful completion of nearly a dozen feature implementations, consistently meeting project deadlines.
- Successfully led feature overview meetings to showcase approved product requirements, providing clarity to stakeholders and assuming the role of an Associate Product Owner. Expanded responsibilities beyond core requirement gathering, encompassing testing technology proof of concepts, managing scrum boards, and playing a key role in software issue triaging. Proactively resolved requirement conflicts, ensuring continuous alignment with product expectations throughout the Agile development lifecycle.
- Automated reordering system that analyzes historical consumption patterns and triggers purchase orders when inventory levels fall below predefined thresholds, reducing stockouts and overstock situations.
- Enhanced software quality by standardizing requirements elevating project clarity & expediting decision-making processes.  
Achievement: Notable reduction in software bugs and improved testing timeline.
- Defined a cost-effective approach leveraging digital capabilities including the implementation of:
  - An app that launches a mobile-responsive web interface (Short-cut app) for approval workflows.
  - Recommended integrating marketplace software with the mobile application to enable mobile based scanning for warehouse.

### PROFESSIONAL SUMMARY

**Starkey Laboratories**  
India - Remote

(Sep 2021 – Present)

**Role: Business Analyst:** Responsible for gathering and executing requirements for the mobile app for a medical device product development. Stakeholder management and ownership of new technology introduction have been my key responsibilities in this role. Involved in the development of more than 12 feature technologies for both, the primary patient mobile app and the caregiver mobile app for both iOS and Android platforms.

- Ideated & created use cases for patient & caregiver mobile app (iOS & Android)
- Took ownership and proactively drove feature development after initial discussions with Product Management.
- Played a liaison between technical and business teams, and touched cross functional domains like the cloud, systems and firmware to clarify any queries and ensure alignment with product vision.
- Demonstrated expertise in requirement gathering and documentation resulting in increased project clarity and streamlined decision-making processes.
- Assist in managing requirements and prioritization within the product backlog through business value ROI, alignment with product strategy, and resource capacity.

**Jazz Lounge**  
Dubai - UAE

(Dec 2015 – Feb 2021)

**Role: Business Solutions Owner (1 year, 2 months):** Led an agile team for continuous improvement and user experience optimizations. In charge of supervising end to end procurement and logistics processes. Oversaw supplier fulfilment and resolved performance issues.

- Identified business benefits for mobile capabilities (approval management, scanning capability, snapshot reports)
- Built business benefit case showcasing long term ROI with labor reduction benefits.
- Validated & approved test cases and provided sign off on UAT

**Role: Systems Business Lead (2 years):** Took on the role of defining business requirements and overseeing the implementation of new inventory management software.

- Documented detail requirements for effective purchase and inventory management.
- Defined use cases for distribution planning and automated messaging for product reorder.
- Set up MOQs and reorder points for SKUs

**Purchase & Inventory Officer (2 years):** Managed inventory across warehouses and responsible for distribution planning and direct procurement. Responsible for smooth flow of inventoried and non-inventory stock across the warehouse and all branches.

- Issued purchase orders, managed shortages, and forecasted requirements based on consumption.
- Developed action plans to optimize pricing, increase sales, reduce excess stock, and maintain healthy profit margins.
- Led the RFQ process from start to finish, offering supplier recommendations.
- Ensured accurate inventory levels, coordinated requisitions, and minimized stock outs through branch and supplier collaboration.

**West Zone Group of Supermarkets  
Dubai – UAE**

**(Oct 2012 – Nov 2015)**

**Purchase Assistant:** Assisted the head purchaser in managing sourcing and distribution of central purchase products for all branches, drafting and carrying out promotional activities.

- Monitored product documentation and codes to identify and address discrepancies in stock quantities.
- Interacted with Oracle ERP and occasionally conducted system testing for new enhancements
- Part of the digital initiative:
  - online ordering (mobile and web) – documented requirements
  - conducted basic system testing
- Complete ownership and responsibility for assigned product family: managing inventory turns, submitting purchase requisitions, simulating stockouts.
