

Girish Gandham

.NET Developer @ State Of California

Email: pia-3f6-ar2@mail.dice.com

Phone: 9178306259

Summary

Previous	.NET Developer @ Citi Bank
Preferred	Net Developer
Location	Lubbock, TX, US
Desired Work Settings	No Preference
Willing to Relocate	Yes
Work Authorization(s):	Now or in the future will require visa sponsorship for employment in the United States.
Employment Type	Full-time
Total Experience	6 years
Education	Masters @ Texas Tech University
Profile Source	Dice
Profile Downloaded	Monday, September 29, 2025

Girish Gandham

.NET Developer

Mobile: | Place: United States

SUMMARY

Experienced .NET Developer with **5+ years** of expertise in building scalable, high-performance software solutions using **C#, .NET Core, Angular, and cloud technologies**. Skilled in designing and developing secure **web applications, microservices, and APIs**, with a strong focus on automation, **DevOps**, and **CI/CD practices**. Proficient in **Azure cloud services, Docker, Kubernetes**, and secure authentication protocols like **OAuth2**. Adept at optimizing database performance using **SQL Server** and **Entity Framework**, and ensuring code quality through Test-Driven Development (TDD). Strong communicator with a proven track record of delivering robust solutions in **agile environments**, driving innovation, and collaborating effectively across teams.

TECHNICAL SKILLS

- **Programming Languages:** C#, Python, JavaScript, TypeScript, PowerShell, BASH, Java
 - **.Net Technologies:** ASP.NET MVC, ASP.NET Core, .NET Core, MS Bot Framework
 - **Web Technologies:** HTML5, CSS3, JSON, Angular 2+, React, REST APIs
 - **Database Management:** SQL Server, Entity Framework, LINQ
 - **Cloud Services:** Azure (FunctionApps, App Service), Azure DevOps
 - **Web Servers:** Azure App Service (Web Apps), IIS (implied with ASP.NET projects)
 - **Testing Frameworks:** Test-Driven Development (TDD), Code Reviews (manual testing practices)
 - **Web Services:** REST APIs, Microservices architecture
 - **Version Control Tools:** Git, Azure DevOps (Repos), TeamCity
 - **Methodologies:** Agile/Scrum, Test-Driven Development (TDD), CI/CD, DevOps
 - **Cloud Technologies:** Microsoft Azure (FunctionApps, App Service, Azure DevOps), Docker, Kubernetes
-

PROFESSIONAL EXPERIENCE

State of California

.NET Developer

Jul 2023 – Present

Technologies: C#, ASP.NET Core, Angular, Azure DevOps, Docker, Kubernetes, SQL Server, REST APIs, OAuth2

- Designed, developed, and implemented scalable .NET web applications using **C#**, **ASP.NET MVC**, and **Entity Framework**, ensuring high performance and user-friendly interfaces.
- Engineered robust APIs with **ASP.NET Web API** to facilitate seamless data integration across multiple platforms, enhancing overall system efficiency.
- Integrated **GraphQL** APIs with **Angular** applications to enable efficient data fetching, reducing over-fetching of data and improving application performance and responsiveness in dynamic UI components.
- Oversaw **SQL Server databases**, implementing effective schema design and query optimization strategies to enhance data retrieval and storage efficiency.
- Utilized **Azure DevOps** for **version control**, **CI/CD pipelines**, and **automated testing**, streamlining the deployment process and ensuring **code quality**.
- Worked closely with business analysts and QA testers to analyze requirements and provide solutions that effectively achieve project objectives.
- Implemented secure **authentication** and **authorization** mechanisms in **ASP.NET Core** applications using **OAuth2** and **OpenID Connect**, ensuring secure API access and enhancing application security for users and third-party integrations.
- Developed and maintained scalable and secure **RESTful APIs** using **ASP.NET Core**, enabling seamless integration between front-end applications and backend systems while ensuring high performance and code reusability.
- Developed and executed unit and integration tests using **NUnit** for .NET Core backend services and **Jasmine** for Angular components, ensuring code reliability, early bug detection, and maintaining high test coverage across applications.
- Promoted a collaborative and results-driven development environment, enhancing team cohesion and consistently achieving project milestones

Citi Bank

.NET Developer

Jan 2021 – Dec 2022

Technologies: ASP.NET MVC, React, SQL Server, Entity Framework, AWS, Agile, REST APIs, OAuth2

- Designed and developed scalable and secure **.NET** applications to Citi Bank's investment servicing capabilities, leveraging robust frameworks like **C#** and **ASP.NET**.

- Utilized **Entity Framework** and **LINQ** to implement efficient data access and manipulation strategies, ensuring optimal performance with complex financial datasets.
- Developed **dynamic** and **responsive user interfaces** using **React**, implementing **reusable components** and **state management** to enhance **user experience** and improve **front-end** performance of banking applications
- Coordinated smooth data exchange across platforms by integrating various internal and external APIs (**WCF**, **RESTful** APIs), improving data flow and system interoperability.
- Integrated **OAuth2** authentication and authorization mechanisms in **ASP.NET MVC** applications, enabling secure user access and safeguarding sensitive financial data across internal and external banking applications.
- Developed and maintained unit and integration tests using **NUnit** for **.NET** backend services and **Jest** for **React front-end** components, ensuring code reliability, improving test coverage, and enabling faster defect detection in critical banking applications.
- Conducted meaningful **code reviews** to enforce **best practices**, improve **code quality**, and promote continuous team development.
- Applied **Test-Driven Development (TDD)** principles rigorously to develop **maintainable** and **reliable code**, improving overall **software** quality and reducing bugs.
- Deployed applications to production environments efficiently by leveraging automated CI/CD pipelines like **AWS DevOps**, streamlining the deployment process.
- Maintained proactive **awareness** of advancements in **.NET** technologies and frameworks, integrating the latest tools and practices to drive ongoing innovation and improvement.

Target

.NET Developer

May 2019 – Dec 2020

Technologies: C#, ASP.NET, Oracle SQL, REST APIs, Entity Framework, Git

- Developed robust web applications using **ASP.NET MVC** and **Web API**, supporting Target's retail strategies for enhanced customer engagement.
- Created **robust APIs** to facilitate seamless integration between internal systems and external partners, enhancing data exchange efficiency and improving **inventory management** and order fulfillment.
- Developed and optimized complex **SQL queries**, **stored procedures**, and functions using **Oracle SQL** to support data-driven features, improve application performance, and ensure efficient data retrieval in enterprise applications.

- Implemented **Entity Framework Core** to build resilient data access layers, ensuring high data integrity and efficient interaction with databases.
- Executed comprehensive unit testing strategies using **NUnit** and **MSTest**, ensuring robust code quality and reliability across critical applications.
- Collaborated closely with business analysts, **UI/UX designers**, and QA testers to translate complex business requirements into technical solutions, following **Agile methodologies**.
- Stayed abreast of emerging trends and best practices in **.NET** technologies through continuous learning initiatives, integrating new solutions to optimize development workflows.
- Managed code changes effectively using **Git** for **version control**, ensuring transparency and facilitating seamless collaboration across projects.

EDUCATION

Master of Science in Computer Science

Texas Tech University

Jan 2023 – May 2024
