Business Analyst

July 2021-Oct 2022

Upaya City Cargo Pvt. Ltd.| Application Based Logistics Organization

Project:

The project aimed to enhance and maintain the Human Resources Information System (HRIS) to escalate the contribution of an increasing number of employees with expansion of its product line.

- Collaborated with management team, stakeholders to identify HR strategy/objectives, business needs, functional requirements and evaluate solutions that meet business requirements
- Worked in sprint environment defining Business Requirements in terms of user stories and acceptance criteria
- Involved in prioritization of user stories from product backlog to sprint backlog
- Participated in process design sessions to construct mock-ups for enhanced application
- Maintained a thorough understanding of employment regulations, industry trends, current practices, new developments, applicable laws, and employment legislation pertaining to all personnel matters, and various applicable laws for the business rules
- Assisted in the review of test cases for UAT and HRIS system upgrades
- Developed accurate documentation of process manuals for the user's reference after usability training
- Provided technical assistance to HR and Payroll employees to ensure data integrity including identification and correction of data errors

Project:

The purpose of the project was to create a mobile application for the Upaya City Cargo Driver partners to improve the navigation and user experience. Around 42% of the users pointed that they could perform better because of this application in place than before.

- Reviewed and analyzed the effectiveness and efficiency of existing systems 'as is' and developed strategies for further leveraging system into 'to be' business process
- Effectively used various elicitation techniques (JAD sessions, surveys) to ensure that the true business need and intent is understood and well documented
- Created requirement traceability matrix (RTM) to track the forward and backward requirements
- Collaborated with UX team to create the design for user friendly interface defining business rules
- Mapped BPMN using use case diagram to understand the functional workflow
- Assisted for designing test scenarios, test cases and execution of User Acceptance Testing (UAT) and reported the bugs to the development team
- Facilitated the usability training session and documented the user manual

Associate Business Analyst

Apr 2019- May 2021

UB Incorporation Pvt. Ltd. | Software Development Company

- Gathered user and business requirements through interviews, surveys and prototyping and focus group
- Mapped 'as-is' and 'to-be' business processes, conducted requirements analysis, management discussion and communication sessions
- Participated in discussions with subject matter experts (SMEs) to extract and elucidate business requirements

- Worked closely with the company and its clients to identify and analyze core business processes and workflows
- Developed clear and detailed process maps and business requirements using UMLs like use cases and activity flow diagram
- Assisted in preparing test cases, test scenarios and test execution for UAT
- Led meetings to deliver the business solution and update the progress of the project
- Provided inputs in product development as per competitor analysis
- Contributed in documenting BRD, use case diagrams, RTM and prototyping of the product
- Effectively communicated the insights and plans to cross-functional team members and management
- Gathered critical information from meetings with various stakeholders and produced it into useful reports
