Experience

Alkami Technology

05/2022 – Present

Enterprise Applications Engineer

Plano, TX

- Manage 100+ SaaS integrations (Jira, Salesforce, Workday, Google Cloud, AWS, Slack) within a custom microservice-based iPaaS architecture—enabling secure, scalable, and compliant data flows across the enterprise.
- Architect event-driven ETL pipelines using cloud-native, serverless infrastructure—built for scalability, fault tolerance, and SOX compliance.
- Led a company-wide security and data compliance initiative to update calendar configurations and event visibility; developed a serverless pipeline that programmatically modified 750K+ events across 1,200+ calendars with 100% automation and zero manual effort.
- Built a live, real-time Grafana dashboard to monitor execution and compliance in-flight, enabling dynamic insights for security and business stakeholders.
- Leverage Workato (Level I–III certified) for cross-functional automation, including IT, HR, and Finance workflows.
- Developed and maintained Workday integrations—resolving reporting issues and building new connectors to meet business objectives.
- Collaborate with TPMs, product, and security teams to align integration strategy with compliance goals, define SLAs, and ensure observability using CloudWatch and Grafana.
- Refactor and modularize legacy automations to improve maintainability, cutting runtime by 40% and reducing cloud spend by 25%.
- Skilled in Python and REST APIs for resilient, scalable integrations across modern SaaS ecosystems.

Corporate Cloud (AWS) Infrastructure Developer

Plano, TX

- Engineered a cutting-edge Jira financial modeling tool, leveraging dynamic SQL generation and custom endpoint delivery to improve the finance team's operational efficiency by reducing querying time by 75% while expanding queuing scope by 20x.
- Integrated AWS Chatbot with Slack, establishing a mobile-centric platform for seamless management of over 25 EC2 servers, fostering collaboration amongst 3 teams and ensuring real-time responsiveness in the dynamic cloud environment.
- Conducted financial analysis and developed valuation metrics using AWS data for actionable insights, directly contributing to enhanced business performance analysis and reducing Mean-Time-To-Close by 40%.
- Architected dynamic infrastructure solutions using CloudFormation and IaC methodologies, ensuring automated, scalable, and resilient deployments aligned with cloud industry best practices and tight deadlines.
- Executed robust Access Key lifecycle management strategies for over 20 access keys through Python scripts regularly deployed via Lambda using EventBridge, fortifying IAM security protocols and handling sensitive, confidential data.
- Developed a dynamic valuation metric dashboard on New Relic for 12 services, leveraging AWS data for enhanced financial insights, contributing to improved decision-making and optimized cloud resource management.

Woodvale

06/2023 – 08/2023

Real Estate Private Equity Analyst, Private Equity

Atlanta, GA

- Conducted in-depth market research and analyzed over 100 distressed assets across various property types to identify lucrative investment opportunities, directly contributing to the strategic deployment of \$100 million.
- Developed comprehensive real estate financial models for over 30 assets, assessing feasibility, forecasting cash flows, evaluating risks, and calculating investment returns to support due diligence efforts.
- Synthesized findings into compelling presentations that played a pivotal role in securing investment funds from external investors, contributing to portfolio company optimization and capital raising efforts.
- Conducted financial analysis of company financial statements and operational processes, identifying potential areas for cost savings and enhanced financial health.
- Collaborated with cross-functional teams, including legal counsel, operations, and portfolio management, to support deal execution and ensure compliance with applicable laws and industry standards.
- Contributed to data-driven investment decisions using platforms like CoStar, Trepp, and MSCI, creating effective marketing materials to present complex financial data clearly and concisely.

- Monitored portfolio company performance by assessing financial reports, conducting variance analysis, and identifying potential risks and opportunities for improved financial planning and reporting.

NextSteps Ventures

08/2021 – 08/2023

Technology Developer & Analyst

Dallas, TX

- Conducted underwriting assessments for over 20 MFA acquisitions, optimizing financial opportunities in a dynamic market and contributing to due diligence efforts.
- Developed an investor management portal/CRM, leveraging advanced analytics to consolidate and analyze investor data, contributing to strategic decision-making and reducing clerical errors by 95%.
- Achieved a 50% reduction in process time and successfully utilized the streamlined process in 18 capital syndication deals, raising over \$20 million in capital.
- Raised capital and conducted comprehensive assessments for various deal types, including land acquisitions and MFA deals, providing key insights for investment decisions.
- Collaborated with cross-functional teams to support deal execution, ensuring compliance with applicable regulations and working closely with legal counsel.
- Developed robust models for Cash Flow Analysis, Commercial Real Estate Valuations, Investment Acquisition Analysis, and Asset Management using ARGUS Enterprise, supporting data-driven investment strategies.

Ninety9 Capital

12/2022 – 06/2023

Private Equity, Financial Analyst

Dallas, TX

- Led the development of Proforma underwriting for a \$30M Single Family Rental Fund in the DFW Metroplex, analyzing cash flow projections and supporting the deal's financial feasibility.
- Developed automated buy box parameters to feed housing data into underwriting models, enhancing accuracy and reducing analysis time under tight deadlines.
- Worked closely with the CEO to structure LP and GP returns and secure funding from lenders, contributing to a successful capital raise.
- Conducted financial analysis and forecasting, including determining future cash flows and annualized returns for various capital stack structures.
- Collaborated with cross-functional teams, including legal and operations, to support deal execution and ensure regulatory compliance.
- Monitored portfolio company performance by assessing financial reports, conducting variance analysis, and identifying potential risks and opportunities for improved financial outcomes.
