
PROFESSIONAL SUMMARY

Detail-oriented and analytical Business Analyst with hands-on experience in gathering requirements, supporting cross-functional teams, and streamlining business processes. Completed a Master's in Cybersecurity with certifications in Workday HCM, SQL for Data Science, and Network Fundamentals. Adept at translating stakeholder needs into functional requirements, conducting data-driven analysis, and assisting in ERP/Workday implementations. Seeking Business Analyst opportunities where strong documentation, research, and system skills are valued.

PROFESSIONAL EXPERIENCE**Business Analyst Intern – Healthcare Compliance Systems****Cigna Health, USA**

Jan 2025 – Present

- Collaborated with cross-functional teams and product managers to gather and document business and technical requirements for a healthcare onboarding and compliance automation project.
- Conducted stakeholder interviews across HR, IT Security, and Compliance teams to define user stories, workflows, and system rules related to employee credential verification and HIPAA alignment.
- Used MS Visio to create process flow diagrams, and Confluence to maintain documentation for auditing and version control.
- Supported data mapping between Workday HCM and internal compliance tracking systems to streamline employee role-based access.
- Assisted QA and implementation teams in validating Workday report outputs against business logic and healthcare compliance needs.
- Identified manual onboarding and training bottlenecks; proposed automation workflows that improved compliance tracking accuracy and reduced administrative errors by 30%.
- Helped enhance onboarding visibility by creating real-time dashboards and reporting KPIs for HR and Compliance stakeholders.

Junior Business Analyst – ERP Projects**HCL Technologies**

Jun 2022 – Jul 2023

- Worked on an ERP implementation project focused on enhancing the SAP MM (Materials Management) module for HCL Technologies.
- Collected and analyzed business requirements from procurement and finance teams to align with ERP system functionalities.
- Prepared detailed documentation including Business Requirements Documents (BRD), Software Requirements Specifications (SRS), and process flow diagrams.
- Mapped end-to-end procurement processes and identified opportunities to automate workflows within the ERP system.
- Supported the QA team in validating ERP configurations and data migration between legacy systems and SAP.
- Facilitated user acceptance testing (UAT) and trained end-users on updated SAP MM processes, leading to smoother ERP adoption.
- Helped reduce manual procurement errors by 30% and improved vendor onboarding timelines.

EDUCATION**Masters in Cybersecurity** | Webster University, MO USA

Sep 2023 – Mar 2025

Bachelors in Information Technology | Andhra University

Mar 2019 – Mar 2023

CERTIFICATIONS & COURSES**Workday HCM** – Core HCM overview and HR process fundamentals**Databases and SQL for Data Science with Python** – Queries, joins, data extraction and reporting**Network Fundamentals** – OSI model, TCP/IP, firewalls, and network troubleshooting

TECHNICAL SKILLS**BA Tools:** JIRA, Confluence, MS Excel, PowerPoint, MS Visio**ERP & HR Systems:** Workday (Core HCM), SAP (Basic knowledge)**Data & Analysis:** SQL, Python (Beginner), Reporting**Soft Skills:** Communication, Problem-Solving, Documentation, Process Mapping
