

Jasleen Batth
Sr. Business Analyst
(214) 619-1114
Jasbatthhh@gmail.com

Professional Summary:

- Business Analyst with around 10 years of experience in Healthcare and Banking domains; expertise in HIPAA and EDI Transactions (837, 834, 267,277), ERH, Medicare and Medicaid, ELF logs, Transaction traceability.
- **Certified SAFe Scrum Master 5.0, Digital Product Management, Foundations of Salesforce.**
- Knowledgeable in Client-server Architecture and Application Servers within the Healthcare context. Experienced in FACETS, ICD 9-ICD 10 conversion.
- Experience with Health Management Electronic Health Records (EHR) and experience with HL7 standards.
- Strong experience in conducting User Acceptance Testing (UAT) and documentation of Test Cases. Expertise in designing and developing Test Plans and Test Scripts.
- Excellent knowledge of HIPPA transaction codes such as 270/271(Inquire/Response Health Care Benefits), 276/277 (Claim Status), 835, 837 (HealthCare Claim), 834 (Benefit Enrollment)
- Very good knowledge on Electronic Data Interchange (EDI) files and application integration.
- Specialized in capital markets and treasury platforms, with deep expertise in Loan IQ, Murex, Calypso, Finastra Summit, Fidessa, Tradeweb, Bloomberg TOMS, Refinitiv Eikon, and Kondor, ensuring accurate trade capture, risk analytics, and regulatory compliance.
- Accomplished program leader in Private Equity transformations, directing carve-outs, digital modernization, and post-acquisition integrations through structured governance frameworks, cross-functional coordination, and risk-managed execution that ensures operational stability and investor confidence.
- Specialized in Payments Domain platforms spanning ACH, SWIFT MT/MX, ISO 20022 migration, Real-Time Payments (RTP), Card Processing, AML/Sanctions Screening, and Digital Wallets (Apple Pay, Google Pay). Adept at defining end-to-end payment workflows, orchestrating system integrations, and ensuring compliance with global standards including PCI DSS, NACHA, OFAC, and PSD2.
- Proven expertise in Fraud Crime Risk Management, AML/Sanctions, and Regulatory Compliance, leveraging platforms such as Actimize, SAS, Fircosoft, and Oracle FCCM to strengthen enterprise risk and control frameworks across capital markets, treasury, and payments functions
- Recognized for bridging business and technology teams, producing detailed BRDs, FSDs, and process models while leading Agile delivery across trade capture, liquidity management, settlement, reconciliation, and high-value payment processing.
- Partnered with cross-border teams to manage Private Equity global expansion projects, addressing regulatory compliance, supply chain redesign, and digital enablement, thereby positioning portfolio companies for new market penetration.
- Proven expertise in regulatory reporting (EMIR, Dodd-Frank, Basel III, SFTR, UMR) and ensuring compliance across Treasury, Risk, and Finance functions.
- Strong track record in defining and implementing workflows for margin calls, collateral optimization, and liquidity management, enhancing operational efficiency and regulatory adherence.
- Worked with various Guidewire provided accelerators named new product generation, Policy center Bulk Rating & Bulk Producer changes.
- Directed the implementation of an enterprise-wide Anti Money Laundering (AML) Transaction Monitoring System by configuring Actimize detection scenarios, aligning rules with regulatory obligations, and ensuring seamless integration with core banking platforms to strengthen the firm's ability to identify suspicious activity.
- Extensive experience driving UAT, regression testing, and production releases across collateral, cash, and settlement processes, ensuring seamless delivery of front-to-back capital markets initiatives.

- Background in performance engineering and service virtualization, applying tools such as Load Runner, HP Service Test, TIBCO, ITKO LISA (CA DevTest), and Pega to validate large-scale enterprise applications and improve reliability under high-volume scenarios.
- Creating and maintaining a requirement traceability matrix (RTM), and use case catalog.
- Performing GAP analysis and documenting the solution in the form of FRD, FSD, and SRS.
- Involved in discussions with stakeholders, SMEs, system architects, and technical teams through channeled/phased meetings and Joint Application Development (JAD) sessions.
- Functional experienced in Claim Life Cycle and Health Care Payer domain process along with various line of health Insurance system like PPO, HMO, POS.

Technical Tool

Project Management	JIRA Agile, Confluence, SharePoint, MS Project, Azure DevOps
Project Design Architecture	MS Visio, Balsamiq, Invision
Documentation	Keynote, MS Office Suite, Rational Requisite Pro
Cloud service	Microsoft Azure cloud
Reporting Tools	Power BI, Micro Strategy, Informatica, Tableau
Operating Systems	Windows7, Windows 8 & 10, Mac OS x, Linux
Certifications	Certified Scrum Master in SAFe 5.0, Scrum Foundation Professional Certificate, Salesforce Foundation, Digital Product Management: Modern Fundamentals, Google Project Management

SAFe Scrum master 5.0

Scrum Foundation Professional Certificate

Professional Experience:

American Express, Phoenix, AZ
Senior Business Analyst

Dec 2024 – Present

Responsibilities:

- Defined and implemented workflows for Loan IQ integration with Treasury operations, collaborating with risk and operations teams to configure covenant monitoring and interest logic, which established reliable compliance reporting.
- Managed front-to-back delivery of Murex upgrades for Fixed Income trading, producing functional specifications for pricing and valuation models while engaging quant and traders to validate sensitivities, ensuring accurate risk visibility.
- Partnered with deal teams and investment leads in Private Equity due diligence, analyzing IT systems, vendor contracts, and process scalability using data visualization platforms, which provided leadership with actionable insights into integration risks and synergies.

- End-to-end modernization of a real-time payments platform, orchestrating cross-functional teams using SAFe Agile and integrating with ISO 20022 messaging standards, which improved interoperability across domestic and international clearing systems.
- Spearheaded the end-to-end Enterprise Logical Framework (ELF) migration project, migrating legacy platforms to modern architecture across multiple banking functions (risk, payments, and lending).
- Coordinated with Developers to understand the API flow and gathered requirements for logging the end-to-end traceability for their API.
- Customized tags, alerts, and Dashboards as per the API interaction with Back-end and front-end services for logging purposes.
- Support and plan confidential separation program for DevOps, LabOps, DNS, SMTP, ICMP, SaaS and other cloud infrastructure to split confidential into two entities.
- Managed the deployment of an AML Sanctions Screening solution by integrating Fircosoft into payment channels, refining fuzzy logic matching parameters, and collaborating with business users to eliminate false positives without compromising regulatory coverage.
- Integrated mortgage servicing systems with P&C insurance providers.
- Led Agile teams to extend Loan IQ reporting with Power BI and SSRS, building dashboards that aligned credit decision workflows with enterprise-wide data governance.
- Coordinated UAT and regression testing for new back-office modules in Capital Markets, creating test scripts in HP ALM and executing validations across collateral, cash, and settlement processes, ensuring smooth production releases.

Environment: MS Project, MS Visio, Windows 10, MS Office Suite, Enterprise JIRA, Confluence, Scrum, SharePoint, ELF, Power BI, Tableau, Splunk, Hydra Console, Loan IQ, Guidewire

Health Care Service Corporation, Chicago, IL
Senior Business Analyst

May 2021- Oct 2024

Responsibilities:

- Assisted project throughout the Software development life cycle phases from initiation to project close out. Most projects have followed Agile (HSAM) methodology and assisted with Waterfall-based projects
- Gathered requirements for CMS ruling for meeting the compliance criteria for up-to-date health coverage and benefits
- Worked with business, Legal, IT, and Developers to create requirements for new API to support the CMS request for new IDs for members/providers for NSA
- Articulated UML through Use Case Document by specifying Actors, Normal flow, Sub flow, and Alternative flows.
- Performed Data mapping, logical data modeling, created class diagrams and ER diagrams and used SQL queries to filter data within the Oracle database.
- Interacted with business heads to finalize the product backlog for the Guidewire application.
- Involving in business requirement specification (BRS) analysis and system requirement specification (SRS) analysis.
- Worked on the EDI 834-file load to Facets through MMS (Membership maintenance sub-system)
- Worked with FACETS edits and EDI HIPAA Claims (837/835/834) processing.
- ICD 9 – ICD 10 Conversion Project – Worked in the analysis of the ICD 9 – 10 codes conversion Project.
- Documented the Requirement Traceability Matrix (RTM) for tracing the Test Cases and requirements in Blueprint.
- Responsible for Medicaid Claims Resolution/Reimbursement for peach state health plan using MMIS.
- Modified and created vendor specific maps for the 850, 820, 834, 855 and 856 transactions (EDI to XML, XML to EDI and delimited to XML). Worked on XSLT, XML schemas and xpath.
- Used MS Visio to carry out the Business Modeling, Data Modeling, and Object modeling efforts to develop the business architecture for rapid and controlled application development.
- Used the Mule soft integration platform to help the data consistency between the organizations (provider, external vendors) and improve their connectivity and streamlined data flow

- Worked with developers to create the RPA bots by gathering the automation process opportunities, requirements, Test and Validation(UAT, SIT)
- Worked extensively with developing business rules engine enabling the business rules such as referral, prior authorization, eligibility and billing essential.
- Experience in facilitating Joint Application Development (JAD) sessions for project definition that involved analyzing the requirements and creating prototypes.
- Create and maintain product backlog items, bugs, features, etc. in JIRA and Azure DevOps for story tracking and documentation.
- Worked as a liaison between the business and technical team, collaborating with PO for solution design & writing user stories.

Environment: MS Project, MS Visio, Windows 10, Azure Cloud, MS Office Suite, Enterprise JIRA, Confluence, SharePoint, Azure cloud.

BCBS, Jacksonville, FL
Senior Business Analyst

Aug 2020 – April 2021

Responsibilities:

- Gathering business and functional requirements through JAD sessions, workshops, and user interviews with the business stakeholders, business process owners, and subject matter experts (SME's).
- Worked on .Net web based and Enterprise applications using visual studio frame work and sql server.
- Worked with the complete SDLC in the context of healthcare, eliciting, analyzing, and defining healthcare-specific requirements.
- Worked on the improvement of the Claims Reimbursement User Interface in the healthcare domain, incorporating changes as per HIPAA 4010/5010 guidelines using gap analysis.
- Prepared EASP plans and Integration plan for integration FACETS application with EDS applications hosted on cloud using Azure integration services.

Environment: MS Project, MS Visio, Windows 10, MS Office Suite, Oracle 12c, Angular 6.0, Enterprise JIRA, Confluence, SharePoint, Azure cloud, QTest.

LabCorp, Houston, TX
Business Analyst

Oct 2018 – July 2020

Responsibilities:

- Performed the requirement analysis for the gathered requirements, conducted impact analysis, and documented the functional specification document.
- Develop and document use cases, functional requirement documents, test and training plans, and other design artifacts as needed
- Defines and documents business and IT system processes and workflows. Models AS-IS and TO-BE processes
- Involved in the full HIPAA compliance lifecycle from GAP analysis, mapping, implementation, and testing for processing of Medicaid Claims.
- Hands-on experience in Manual and Automated testing tools including planning, design, and implementation of tests and test cases, integration, system and regression testing, and test efforts documentation management.

- Extensive experience as a validation analyst involved in all phases of SDLC. Conversant with all aspects of computer systems validation from Requirements to System and User Acceptance Testing and change control.
- Evaluated and documented business requirements and technical specifications for Epic apps.
- Maintained documentation of existing data flows for system interfaces
- Involved in order to understand and implement Processing ICD-9 ICD-10 Worked on EDI transactions: X12, 835, and 837 P. To identify key data set elements for designated record set.
- Interacted with Claims, Payments, and Enrolment hence analyzing and documenting related business processes.
- Participated in Scrum ceremonies including sprint-planning sessions, backlog-grooming sessions, daily scrums product demos, sprint reviews, and sprint retrospectives.
- Prepared Business Requirement Documents BRD's after the collection of Functional Requirements from System Users that provided appropriate scope of work for the technical team to develop prototype and overall system.

Environment: ER systems, SQL, MS Office, MS excel, Congo's, Oracle 12C MS Visio, Jira, Balsamiq, SharePoint, Azure DevOps, Azure cloud, QTest.

Capgemini, India

June 2015 – Aug 2018

Role: Business Analyst

Responsibilities:

- Gathered Analyzed, Validated, and Managed, and documented the stated Requirements. Interacted with users for verifying requirements, managing the change control process, updating existing documentation.
- Involved in converting the user requirements into business requirements, logical specifications, technical requirements and created business process models from the requirement specs
- Performed Gap Analysis of the "As-Is" and "To-Be" processes within the organization to analyze and fill the existing gaps in the business processes and participated in business processes.
- Worked with the design team to implement UML methodologies to create use case diagrams, data flow diagrams.
- Assisted the development teams by reviewing their test cases and clarifying the requirements to ensure their complete coverage.
- Participated in Scrum ceremonies including sprint-planning sessions, backlog-grooming sessions, daily scrum product demos, sprint reviews, and sprint retrospectives.
- Involved in conducting UAT sessions to gain the confidence and approval of the end-users.
- Developed UI design (Wireframes & UI Mockup's) and solution design documents.

Environment: Windows 2008 Server, MS-Office 2013, MS Visio 2013, MS SharePoint 2013, Agile, Finacle, MS SQL Server.

Education:

- Bachelor of Business Administration, Ahmadabad University, India
- Master of Business Administration, University of New Haven, USA
