Professional Summary

- QA professional with **over 13 years of IT experience**, adept in manual testing and managed teams of all sizes between 5-6 members.
- Skilled in formulating test strategies, creating test plans, allocating resources, estimating testing efforts, and monitoring defects for teams of four to five testers. Collaborated closely with Business Analysts to understand and refine new requirements.
- knowledge and experience in **Waterfall** and **Agile Methodology**.
- Proficient in Functional, UI, Integration, Regression, and User Acceptance Testing, with experience using test management tools such as JIRA, HP ALM.
- Experience in creation and execution of **Automation scripts** using **Open Test Tool**.
- Have a complete knowledge and understanding of the different phases of the **SDLC** and **STLC**.
- Experience in Preparation of Test Cases using Functional Specifications, BRs, Use cases and User Stories of the AUT.
- Good exposure to Software testing techniques and methodologies and **Agile Methodology**.
- Proficient with tracking **defects** and **defect management tools**
- Knowledge of SQL.
- Good Technical, Analytical and Communication Skills

Skills Profile

Technical	
Testing Techniques	Functional Testing, System Integration Testing, Regression Testing, Sanity Testing.
Test Management Tool	HP ALM, Quality Center, Zephyr Test Management Tool,
Requirement Gathering Tool	JIRA
Bug Tracking Tool	HP ALM, Quality Center, JIRA, Team forge, JIRA, Qtrace, TFS.
SDLC Methodologies	Waterfall and Agile (Scrum)
Analysis & Project Management Tools	MS Project, MS Excel MS Word, Power Point,
Domain	Media and Entertainment, Tax, SharePoint

Professional Organizations:

Cap Gemini India Pvt Ltd	10-Feb-2010	31-July-2023	Mumbai, Maharashtra

Professional Experience

1. McDonald's:

McDonald's Corporation is an American fast food company, founded in 1940 as a restaurant operated by Richard and Maurice McDonald, in San Bernardino, California, United States. They rechristened their business as a hamburger stand, and later turned the company into a franchise, with the Golden Arches logo being introduced in 1953 at a location in Phoenix, Arizona. In 1955, Ray Kroc, a businessman, joined the company as a franchise agent and proceeded to purchase the chain from the McDonald brothers. McDonald's had its previous headquarters in Oak Brook, Illinois, but moved its global headquarters to Chicago in June 2018.

a. Drive Thru (OT-CS)

DT Order Taker/Cashier Initiative

This initiative was required by McDonald to validate the DT OT/CS combined role. DT (OT/CS) was out of scope for the US market. Now the US market is planning to have this (OT/CS) combined option.

Project Duration: Jan 2023 to july2023

Roles and Responsibilities:

- Served as QA Lead, responsible for developing comprehensive test strategies, creating detailed test plans, managing resource allocation, and leading QA teams in agile sprint environments. Additionally, contributed to effort estimation for project deliverables.
- Mentored team members, providing guidance on QA processes, best practices, and skill development to ensure high-quality outcomes
- Studying and analyzing requirements from User stories and acceptance criteria.
- Monitor the analysis, design, implementation and execution of the test cases

- Automate test cases using **Open Test Automation Tool**.
- Supervised test execution and approval processes.
- Involved in Sprint Planning Meeting, daily stand-up Meeting and Retrospective Meeting.
- Giving Demo of user stories to Client
- Preparing demo video for client with subtitle and voiceover with highlighting mouse pointer.

b. McDonalds Restaurant System:

This application is used in McDonald's restaurants to take customer orders, tendering orders, routing orders to different monitors and serving orders.

Project Duration: Jan 2022 to Jan 2023

Roles and Responsibilities:

- Coordinating as a team leader in a test team of three DevQEs.
- Studying and analyzing requirements from User stories and acceptance criteria.
- Monitor the analysis, design, implementation and execution of the test cases
- Test Case Creation based on User stories and acceptance criteria.
- Test Case Execution
- Logging of defects in JIRA
- Automate test cases using **Open Test Automation Tool**.
- Supervised test execution and approval processes.
- Involved in Sprint Planning Meeting, daily stand-up Meeting and Retrospective Meeting.
- Retesting of defects
- Giving Demo of user stories to Client
- Preparing demo video for client with subtitle and voiceover with highlighting mouse pointer.

c. API Migration:

The main goal of K# Transformation is to decouple the K# from the NP6.1. Today, in order to K# to run, it depends on a NP# Framework, an instance of NP# POS plugin and an NP6.1 instance with a C++ driver. The C++ driver is responsible for communicating with the legacy code and to execute business logic that are located only in the legacy code.

The goal of this task is to migrate every code that K# uses that is located in the legacy code. But this is hard, very hard. Therefore, we can migrate pieces of the code. This will aggregate value to our product at the same time that we'd be moving code from the legacy architecture (NP6.1) to the new architecture (NP#).

Project Duration: Jun 2020 to Jan2021.

Roles and Responsibilities:

- Co-ordinating as a team leader in a test team of four QA engineering professionals.
- Studying and analyzing requirement from User stories and acceptance criteria.
- Monitor the analysis, design, implementation and execution of the test cases
- Test Case Creation based on User stories and acceptance criteria.
- Test Case Execution
- Logging of defects in JIRA
- Automate test cases using **Open Test Automation Tool**.
- Supervised test execution and approval processes.
- Involved in Sprint Planning Meeting, daily stand-up Meeting and Retrospective Meeting.
- Retesting of defects
- Giving Demo of user stories to Client
- Client interaction (Backlog refinement meeting)

d. K# PWA (progressive Web Application):

The purpose of K# PWA (Progressive Web Application) is to enable accessibility of Kiosk application on tablet devices (Android/iOS/Windows). It ensures K# is accessible even in offline mode on tablet devices wherein the user can interact with the application based on pre-cached responses. So even if K# application faces temporary network connectivity issues, user will still be able to interact with the application till the network connectivity is restored.

Project Duration: Jan 2020 to till June 2020.

Roles and Responsibilities:

- Coordinating as a team leader in a test team of three QA engineering professionals.
- Studying and analyzing requirement from User stories and acceptance criteria.
- Monitor the analysis, design, implementation and execution of the test cases
- Test Case Creation based on User stories and acceptance criteria.
- Test Case Execution
- Logging of defects in JIRA
- Automate test cases using Open Test Automation Tool.
- Supervised test execution and approval processes.
- Involved in Sprint Planning Meeting, Daily stand up Meeting and Retrospective Meeting.
- Retesting of defects
- Giving Demo of user stories to Client
- Client interaction (Backlog refinement meeting)

2. Ernst & Young (EY)

Ernst & Young (known as EY) is a multinational professional services firm headquartered in London, United Kingdom. It provides assurance (including financial audit), tax, consulting and advisory services to companies. Working in partnership with Cap Gemini, EY propose to commission the large-scale migration for a subset of the total Lotus Notes content including development of required SharePoint applications.

EY share:

It is content management system catering to all business verticals in EY

EY is a large organization spread across 150+ countries and having around 2 lacs + employees. They provide advisory and consultancy services for Taxation, Transaction Advisory, Assurance, Audit etc.

Whoever wants to publish any content which can be stored safely and can be consumed by anybody in EY will come to EY share Application.

It serves as Central Repository within EY for all the published content.

Domain: SharePoint

Project Duration: Aug 2016 to Dec 2019.

Roles and Responsibilities:

- Co-ordinating as a team leader in a test team of three QA engineering professionals.
- Studying and analyzing requirement from User stories and acceptance criteria.
- Monitor the analysis, design, implementation and execution of the test cases
- Test Case Creation on the basis of User stories and acceptance criteria.
- Test Case Execution
- Logging of defects in TFS
- Supervised test execution and approval processes.
- Involved in Sprint Planning Meeting, Daily stand up Meeting and Retrospective Meeting.
- Retesting of defects
- Giving Demo of user stories to Client
- Client interaction (Backlog refinement meeting)

3. Retain Web Enterprise

Retain Web provides a web-based interface for Retain Resource Planning System. This flexible and efficient resource management tool allows your employees to access and share information online

Project Duration: 3 months

Roles and Responsibilities:

- Analyzing Requirement
- Test Planning
- Test Case Designing
- Test case execution
- Regression Testing using the test cases designed.
- Logging of defects in Team Forge.
- Referring to FRD and getting better understanding of scenarios to execute the same.
- Retesting of defects.
- Peer Review, FRD analysis and review.

4. Europol-ECM -SharePoint Collaborative platform

Europol are in the process of implementing a new ECM system in order to replace the Administrative DMS, ELMO and Europol. To this purpose the Europol ECM system is being developed. This portal is developed using SharePoint 2010 with customization to implement different functionalities. It also involves data migration from EDOC to SharePoint 2010.

Domain: SharePoint

Project Duration: 6 Months

Roles and Responsibilities:

- Test Case Designing
- Test case execution
- Collecting Requirements and analyzing the same.
- Regression Testing using the test cases provided.
- Logging of defects in Team forge.
- Referring to Use cases and existing application and getting better understanding of scenarios to execute the same.
- Retesting of defects.
- Preparing System Test Plan.
- Peer Review, Use case analysis and review.

5. You See (Denmark)

TDC is the leading Danish provider of communications solutions with market leadership across all segments in the domestic market. In the other Nordic countries, TDC is the main challenger in the Business market. TDC is mainly a Danish provider of telephony, Internet, TV, data communications, integration and hosting solutions, as well as

related content and services. TDC Cable TV is a Danish provider of cable television and broadband access. Changed its name to You See A/S the 1st October 2007. Today, TDC has more than 15.5 million customer relations in Denmark and abroad. You See is one of the major project under TDC Program.

Domain: Media and Entertainment

Project Duration: 4 Years

Roles and Responsibilities:

- Back Up Lead
- Test Case Designing
- Test case execution
- Collecting Requirements and analyzing the same.
- Regression Testing using the test cases provided.
- Logging of defects in Team forge.
- Referring to Use cases and existing application and getting better understanding of scenarios to execute the same.
- Retesting of defects.
- Preparing System Test Plan.
- Peer Review, Use case analysis and review.

Certifications

- SAFe Practitioner Certification.

Education

- **BE (Electronics & Telecommunication)** from G.H. Rasoni College of engineering, Nagpur University in 2007 (Secured 69%)
- **H.S.C (Science)** from Jupiter College, Nagpur in 2003(Secured 79%)
- **S.S.C** from St Jupiter School, Nagpur, Maharashtra State Board in 2003 (Secured 81%)
