An experienced and dedicated IT pro living and working in DFW. I have 20+ years working in software engineering, web app development and documentation, project and department management, and database and server administration on both Windows and UNIX. I am looking for an opportunity in the DFW area or (remotely) anywhere in the US. I am willing to travel and always looking to work with new platforms, technologies, and colleagues. Call/E-Mail anytime for work samples and/or references.

Education

I was fortunate enough to be accepted into UNT's Meadows program in my final year. Took a semester of accelerated courses to prepare for student teaching in the Spring and student-taught in the Fall while also taking classes on-site and collaborating on projects, culminating in a group presentation of our findings and observations at an educational teacher conference in San Antonio, Texas.

Teaching/Training

I parlayed teaching into adult IT training at Houghton Mifflin, Citizens Telecom, and Excel Communications. At Houghton Mifflin, I wrote their first customer service manual that was distributed organization-wide, and trained employees on it and MS Office. At Citizens Telecom, I helped design a curriculum and presentation series on a telecom company migration from mainframe to client/server. I then travelled the US in training employees on the curriculum, and providing support at rollout. At Excel, I set up the company's first intranet and wrote numerous applications for the IT Support/Infrastructure group and wrote all documentation published to the site, until we automated employee submissions for review and publication.

Programming Language Experience

- HTML/CSS/Javascript (JS, 20+ yrs.)
- Coldfusion (CFML, 20+ yrs.)
- PHP (Versions 7 to 8.4, 7 yrs.)
- XML (10 yrs.)
- SQL (20+ yrs.)
- ASP / .NET / Java / C# (10 yrs.)

Web / Database Platform / Tools Experience

- JSON, Dojo, jQuery, Ajax (15 yrs.)
- Coldfusion Server Admin, IIS Admin. (20+ yrs.)
- Fusebox / Wordpress / Liferay / Django (5 yrs.)
- MS Power Platform, MS Teams (7 yrs.)
- Plumtree / Oracle Web Center (OWC) (3 yrs.)
- Interwoven TeamSite (5 yrs.)
- Drupal / Sitecore / AWS / Angular (3 yrs.)
- MS SQL / Ent. Mgr. / Vis, Studio/ IIS (20+ yrs)
- Git/PVCS/Jira (15 yrs.)
- Verity Search (10 yrs.)
- Adobe CS (Dreamweaver, Photoshop, Flash/Animate, Premier, etc. 20+ yrs.)
- SOAP / REST / VB (5 yrs.)
- Crystal Reports / Oracle / Blender 3D
- PostgreSQL, MySQL, DB2 (5 yrs.)
- SharePoint (SPO)/ Alfresco (15 yrs.)
- FirstUp CMS / MS Stream (5 yrs.)
- Metastorm Workflow Builder (3 yrs.)

Work Experience **Sr. Manager, Software Engineering, Charles Schwab & Co., Westlake TX.** *October 2018 – Present*

Managed projects for Corp. Comm, Corp. Affairs division. Developed web-based applications for all internal clients on SPO, CF, Oracle, PowerApps, XML, FirstUp, and MS Stream. Used Adobe Cloud applications including Flash, Acrobat, Illustrator, Photoshop and Dreamweaver to author apps, workflows (WF) video and graphics. Authored a survey builder and disseminator platform with CF and Oracle. Built forms and data tables using the MS Power Platform. Shot and edited video using Adobe Premier. Created anime video with Flash and Animate. Created a site for retail clients' sales awards using Power Apps. Created a site for DEI event requesting and scheduling using Coldfusion and Oracle.

Lead Analyst, HR Technology, AT&T, Dallas TX. *May 2016 – October 2018*

Used CF, PHP, JQuery, JS, HTML5, .NET/.ASP, Angular, AWS, Oracle and MS SQL to build, maintain, and administer apps for internal HR clients. Built web-based replacement for internal HR retention app. Developed on Adobe CS and Visual Studio, and SQL Enterprise Manager for data administration and development. Developed a salary calculation application for use by HR hiring executives. Converted sites from CF to PHP and Java. Built and administered a PHP internet site for an international subsidiary. Left AT&T for the opportunity at Schwab. Wrote applications on the AWS platform and maintained/developed on internal Sharepoint sites.

Software Engineer, Lockheed Martin, Fort Worth TX. *October 2015 - June 2016*

Used CF, Flash, Flex, ASP.NET, JQuery, NodeJS and MS SQL to author apps and sites for multiple business units. Developed apps within several homegrown frameworks interfacing global shared components to access personnel and product backend systems. Wrote SQL stored procedures for queries and SQL functions. Completed contract and accepted an offer from AT&T.

Supervisor, Application Development, Haynes and Boone LLP, Dallas TX. *May 2012- October 2015*

Performed bus. analysis with attorneys/admins. Planned/managed projects, designed frameworks. Tasked out dev, subprojects to developers/DBAs. Admin'ed/supported large intl. intranet on Plumtree/OWC, and publ. site on Sitecore. Designed/implemented WF framework and application for Litigation Support. Designed and implemented workflow apps on Metastorm. Developed, implemented, supported applications in .NET, .ASP, PHP and CF all gatewayed onto Plumtree platform. Left for opportunity at Lockheed Martin.

Engineer II, McKesson Specialty Health, Dallas TX. / The Woodlands, TX. *September 2010 – May 2012*

Provided full IT support for publishing division. Maintained/developed on curemagazine.com / curetoday.com e-commerce sites on Fusebox platform with PostgreSQL backend. Developed applications in .ASP, CF, Flash. Designed, developed and deployed division's intranet site, CMS, and external site Ad Server. Designed and maintained multiple mini-sites on CF, Flash, Drupal and Liferay platforms. Left McKesson for an opportunity at a law firm in Dallas, as travel interfered with home-life.

Manager, Programmer/Engineering- NEC USA, Irving TX. *March 1999 – September 2010*

Oversaw intl., enterprise-wide purchase, implementation, and deployment of Interwoven (now Autonomy) TeamSite CMS. Managed an in-house group of 5 contractors and an offshore group of 7 programmers and DBAs. Introduced Alfresco platform to the company and acted as sales engineer and SME for external consulting group offering Alfresco services to outside customers. Authored and delivered implementation proposals. Implemented first NEC corporate intranet using .ASP and CF with an SQL backend. Developed, hosted, and administered nec.com, necusa.com, NEC Electronics, NEC Public Networks Group and other public sites. Left NEC of my own volition during economic downturn, as company was downsizing.

Work Experience
(cont'd.)

Systems Analyst, Excel Communications, IT Department, Addison TX.

April 1997 – March 1999

Implemented Excel's first corporate IT Intranet using .ASP, CF, Access and Flash. Created an IT Management reporting center within the site to generate and export data center, server, outage, and help desk stat reporting using CF, Insight Manager, Access and Crystal Reports. Left for a programmer position at NEC.

Analyst / Technical Writer / Trainer, Citizens Telecom, Dallas TX.

August 1997 – May 1998

Analyzed mainframe and client-server versions of a telecom ticket system and documented both systems for the creation of a training curriculum. Presented the curriculum onsite at New York and Texas locations and provided post-rollout support for this mid-sized telecom service provider.

Trainer, IT Support, Houghton Mifflin & Co. Publishing, Dallas TX.

June 1995 – August 1997

Provided research, documentation, and training on business processes and the company's employee software suite. Wrote the location's first customer service systems and process documentation. Trained and supervised Summer interns in customer service.

Educator, Dallas Independent School District

Taught American and English AP Literature, grammar, journalism, photography, and digital publishing at Sunset High School in Oak Cliff, Texas (Where I did my student teaching under the Meadows Program). Oversaw the publication of the monthly newsletter and yearbook using Macintosh computers and a local publishing company's software and support.
