

Sai Nikhitha Jinkala

AS400 Developer

+1 (984)3816056 | sainikhithajinkala@gmail.com | United States | [LinkedIn](#)

SUMMARY

AS/400 Developer with over 5 years of experience in designing, developing, and optimizing IBM i applications. Highly skilled in managing complex, integrated systems, providing end-to-end incident ticket support, and ensuring application availability, reliability, and performance. Proficient in SQL, batch scripting, server administration, and database management, with a strong track record of improving operational efficiency and system stability. Experienced in leveraging data analysis techniques to extract actionable insights, optimize processes, and support business decisions. Skilled in data engineering tasks, including designing ETL workflows, data integration, and ensuring high-quality, accurate datasets for reporting and analytics. Recognized for technical excellence, a detail-oriented approach, and the ability to bridge AS/400 application development with modern data-driven solutions.

EXPERIENCE

As400 Developer, IBM, Hyderabad, India

May 2019 — Apr 2024

Client: Honda Europe

- Developed and maintained custom AS400 applications for Honda using RPG IV, CL, and SQL to enhance the system efficiency and meet business needs.
- Provided incident ticket support across severity levels 1-5, ensuring timely resolution of internal and client-facing application issues on AS400 systems.
- Developed automated weekly KPI reports using Python, improving reporting efficiency and data accuracy.
- Managed and administered iSeries Navigator for system monitoring, performance tuning, and job management.
- Conducted root cause analysis for operational inefficiencies, delivering actionable recommendations to improve process performance.
- Supported data migration projects, ensuring data quality and integrity during AS400-to-modern database transitions.
- Worked extensively with the Integrated File System (IFS) to manage files, directories, and data transfers between AS400 and external systems.
- Supported application patching efforts, coordinated with cross-functional teams to ensure smooth implementation and compliance with security standards.
- Demonstrated strong client interaction skills, effectively gathering requirements and translating business needs into AS400 application solutions to meet client objectives.
- Supported end-users by troubleshooting issues and creating documentation for business operations.
- Created and maintained technical documentation for all projects, ensuring knowledge transfer and system transparency.
- Designed and developed applications using WinDev and WebDev technologies, delivering efficient, user-friendly solutions tailored to client needs.
- Supported monthly and yearly AS400 system activities, including system backups, monitoring, and comprehensive documentation to ensure data integrity and operational continuity.
- Mentored team members to enhance skill development and project efficiency, and regularly communicated project status updates to management and clients to ensure alignment and transparency.
- Designed and implemented automated solutions using batch files, CL, and PowerShell, enhancing system efficiency and reducing manual workload.
- Participated in server migration projects, performing application testing and ensuring system integrity post-migration.
- Learned about AWS Cloud Solutions, including designing and deploying cloud-based applications using AWS services like EC2, S3, Lambda, and RDS to optimize performance and scalability.
- Explored cloud infrastructure management by configuring IAM roles, VPCs, and security groups to ensure secure and efficient cloud operations, following AWS best practices.
- Studied Big Data Processing concepts, gaining theoretical knowledge of Apache Spark for distributed data processing, including RDDs, DataFrames, and Spark SQL.
- Recognized for technical excellence, a detail-oriented approach, and bridging AS/400 development with modern data-driven solutions.
- Understood scalable data workflows by exploring how Spark on AWS (EMR, Glue) is used for ETL, batch processing, and real-time analytics in cloud environments.
- Gained hands-on expertise in cloud architecture, cost optimization, high availability, and fault-tolerant designs through AWS Solutions Architect – Associate certification and practical labs.
- Participated in the IBM WatsonX Challenge organized by IBM in India, showcasing innovative problem-solving and AI skills.
- Optimized SQL queries and data pipelines to improve data retrieval speed by 30%, enhancing analytics performance.
- Participated in a Java project server migration, contributing to seamless transition, configuration, and performance optimization.
- Demonstrated ability to design and implement scalable, cost-optimized, and secure data pipelines in AWS cloud environments

- Skilled in query optimization and performance tuning in Redshift and Athena to handle large-scale datasets

EDUCATION

Anurag Engineering College, Kodada, India - *Bachelor of Technology, Computer Science and Engineering* - **2015 — 2019**
(GPA: 9.3/10)

KLN Junior College, Miryalaguda, India - *Intermediate, Mathematics, Physics, Chemistry* - (GPA: 90.7%) **2015 — 2013**

Word&Deed High School, Miryalaguda, India - *Class X* - (GPA: 9.5/10) **2013 — 2012**

CERTIFICATIONS

AWS Certified Data Engineer Associate, Amazon

AWS Certified Solution Architect Associate, Amazon

Microsoft Azure AI900, Microsoft

Data Science Foundations- Level 1, IBM

Python for Data Science, IBM

Watson Discovery Foundations, IBM

AWARDS

Best Graduate Hire, IBM Organization

Awarded for outstanding performance.

PROJECTS

1.Exploratory Data Analysis (EDA):

Conducted exploratory data analysis to identify trends in genres, release patterns, and ratings.

Tech Stack: Python (Pandas, Seaborn, Matplotlib), SQL, Jupyter Notebook

Outcome: Provided actionable insights for strategic content planning.

2.Aerofit Fitness Equipment Sales Analysis :

Performed customer segmentation and product trend analysis using descriptive statistics and probability.

Tech Stack: Python(Pandas, Seaborn, Matplotlib), SQL, Jupyter Notebook

Outcome: Improved product targeting and inventory optimization.

3.Employee Attrition Prediction

Performed data cleaning, feature engineering, and EDA to identify factors influencing employee attrition.

Tech Stack: Python (Pandas, Seaborn, Scikit-learn), Jupyter Notebook

Outcome: Built a Random Forest model achieving 82% precision and 89% recall, enabling targeted retention strategies.

SKILLS

Programming Languages : RPG IV (ILE), CL, Java, Windev, Webdev

Data Engineering and Analytics : SQL, Python (Pandas, NumPy), Excel (Macros, VBA), Tableau, Data Modeling, Automation, Performance Tuning, Pyspark

Visualization Tools : Tableau

Database Management : SQL/DB2, MS SQL Studio

Technical Expertise : Data pipelines, ETL processes, Automation scripting, AWS (EC2, S3, RDS, IAM, Lambda, AWS Glue, EMR)

Other Tools : Jira, ServiceNow, QMF
