SUMMARY

A senior QA professional with over 20 years of experience in software testing and quality management, expert in QA team leadership and process optimization. A position is being sought, where software testing and quality management skills will be brought to transform quality engineering into a core product offering, enhancing product performance and user satisfaction through innovative strategies and tools.

EXPERIENCE

Director of Quality Assurance

Vital Tech Corp

📅 06/2023 - 03/2025 📍 Carrollton, TX

- Improved testing efficiency by 40% by implementing enhanced regression for a rapidly growing company
- Conducted release readiness assessments and performed risk analysis
- Implemented traceability and root cause analysis methodologies, and training programs for operations/support leading to a 35% drop in reported issues
- Spearheaded the research, design, and implementation of a test automation program that increased test coverage by 30% and reduced maintenance resulting in a 50% drop in release regression time allowing for faster product releases
- Key Contributions: Established Tier 2 Support program by integrating Technical Support and QA to speed up and improve troubleshooting and proper escalation of issues. This program helped to decrease reported defects by 30% and fostered greater customer satisfaction through training and RCA programs

Lead Quality Engineer

Vital Tech Corp

📅 03/2021 - 06/2023 📍 Carrollton, TX

- Developing quality and testing programs to develop quality-focused business processes throughout SDLC resulting in an increase in overall client satisfaction
- Lead distributed and global offshore test teams, using manual and automated test programs, to increase testing coverage and efficiency
- Championed release management and testing process for functional and regression testing programs to decrease time to market by 25%, exceed client expectations, and improve product quality
- Key Contributions: Expanded defect triage process to better collect data, troubleshoot, fix, and release issues, communicate progress, and address client concerns. This process heightened user and client satisfaction, allowing for renewed contracts and increased revenue

Senior Software Quality Engineer

Centene Corporation

📅 01/2017 - 03/2021 📍 Amherst, NY

- Acted as Test Lead for multiple application redesign projects as well as User Interface/User Experience and accessibility coordination
- Led and mentored test team of 5 QA engineers for multiple application and public client-facing websites and member, provider, and broker portals
- Conceptualized, documented and executed company-wide accessibility testing initiative to meet ADA compliance on all user and client-facing websites and portals based on Section 508 and WCAG standards
- Led accessibility team to measure risk and develop an accessibility testing process to mitigate a lawsuit brought against the company for missing accessibility standards
- Key Contributions: Development of process based on Section 508 and WCAG Accessibility standards saved the company 1.5 million dollars

STRENGTHS

Client satisfaction focus

Improved client satisfaction by 50% with quality-driven solutions.

Global team leadership

Led distributed and global teams to enhance testing coverage and efficiency.

Efficiency and quality boost

Spearheaded regression and automation programs, reducing testing time, and boosting overall product quality.

Automation test innovator

Design and implement automation programs and on-demand test plans increasing coverage

Process improvement specialist

Upgraded quality processes for in-sprint execution and shift left programs to increase product quality

EDUCATION

Bachelor of Science

University Of Phoenix

📅 2008 - 2011 📍 Phoenix, United States

- Information Technology, Information Systems Security
- University Of Phoenix

EXPERIENCE

Senior QA Analyst

CSS Inc

01/2016 - 01/2017 Buffalo, NY

- Created and implemented enterprise-level quality processes and procedures, including requirements and traceability, RCA process, development code review, peer review process, QA Testing, and business reviews that amplified CMS compliance by 25%
- Oversaw daily and weekly projects and executive-level reporting processes as well as determined testing coverage for bi-weekly sprints and major projects
- Managed client and product releases, distributed test team of 6 engineers, responsible for assigning work, managing resources, tracking test results, and defect management using multiple applications, including JIRA and SharePoint
- Key Contributions: Collaborated with product and development to implement new agile sprint and release processes. This allowed new features to be delivered to production 50% faster, allowing for client commitments and state compliance deadlines to be met.

Quality Engineer II

First Niagara Financial Group

01/2014 - 01/2016 Buffalo, NY

- Served as Lead Test Engineer for complex credit card and mobile banking application projects, custom portal sites, and product releases increasing regulatory compliance by 80%
- Oversaw daily and weekly project and executive reporting processes as well as determined testing coverage and resourcing needs, including management of contract and offshore test teams
- Managed large UAT test teams, responsible for assigning work, managing resources, tracking test results, and defect management using multiple applications
- Key Contributions: Started a regression and POS testing process for two major credit card projects, allowing the project launch dates to stay on target and budget and achieve revenue goals of over 2.5 million. Developed testing procedures to test at POS systems that found five major bugs that would have otherwise failed the projects post-launch.

Lead Quality Engineer

Liazon Inc

01/2013 - 01/2014 Buffalo, NY

- Acted as Lead Test Engineer for frontend, client-facing projects, custom health benefits exchange, email integration, accessibility compliance, and releases of updates and upgrades
- Authored and implemented a quality program from scratch for a mid-size startup, including the building of a team of 5 engineers, developing process and procedure documentation, and QA and development team training in a new quality assurance program
- Coordinated accessibility compliance changes, improving user satisfaction metrics by 35% on custom application projects
- Key Contributions: Improved a quality testing process that helped contribute to a high-quality marketplace solution application, allowing it to win the first of five HIRC Digital Health Awards in 2014
