EXPERIENCE

Sr. Director of Generative AI & Knowledge Systems, 01/2022 - 06/2025

The Wharton School, University of Pennsylvania - San Francisco, CA

As the Sr. Director of Generative AI & Knowledge Systems IV at The Wharton School, I oversaw the strategic design, deployment, and operational management of the university's AI, machine learning, and analytics-driven technology ecosystem. My leadership role focused on ensuring the delivery of innovative, secure, and data-driven solutions that advanced Wharton's mission as one of the world's top business schools.

Key Responsibilities:

- **AI & Machine Learning Strategy** – Directed enterprise-level initiatives in generative AI, natural language processing (NLP), and predictive modeling, embedding AI into academic and administrative workflows.
- **Knowledge Systems & Analytics** – Built and scaled knowledge management platforms powered by data analytics and machine learning pipelines, enabling faculty, students, and administrators to access actionable insights in real time.
- **Digital Transformation Leadership** – Championed the modernization of IT and analytics infrastructures, aligning AI and cloud strategies with Wharton's institutional goals.

- Helpdesk Administration
- Technology Planning
- Service Implementation
- Black Box Testing Tools
- Harden Network and Server Infrastructure
- CRM Software
- Needs Assessment
- Firewalls and Endpoint Security
- Diagram and Chart Preparation
- Bandwidth Evaluations
- Agile Methodology

- **Team Leadership and Development:** Manage and mentor a team of IT professionals, fostering a collaborative work environment that encourages innovation and continuous improvement. Responsible for hiring, training, and professional development of staff to meet evolving IT needs.
- **Project Management:** Lead large-scale IT projects from conception to implementation, ensuring they align with business objectives and are delivered on time, within scope, and budget. Utilize agile methodologies to manage project timelines and deliverables effectively.
- **Operational Excellence:** Oversee the daily operations of server and network infrastructures, ensuring systems are secure, scalable, and optimized for performance. Implement best practices for IT service management, including incident management, change management, and disaster recovery planning.
- **Vendor and Stakeholder Management:** Negotiate with and manage relationships with software and hardware vendors to secure necessary resources and support. Act as a primary liaison between IT and other departments, ensuring that IT's projects and strategies align with the broader business goals.
- **Innovation and Continuous Improvement:** Continuously assess and implement new technologies and systems improvements to enhance business operations. Lead initiatives to drive innovation within the IT department and the organization as a whole.
- **Security and Compliance:** Ensure compliance with IT security standards and policies, including risk management and data privacy regulations. Conduct regular system audits and coordinate with security teams to fortify IT infrastructure against potential threats.
- **Budget Management:** Develop and manage the IT department's budget, ensuring optimal allocation of resources towards projects and operations. Monitor expenditure and make adjustments to align with financial targets and strategic objectives.

Achievements:

- Successfully led the migration of on-premises infrastructure to cloud-based solutions, enhancing system scalability and reducing operational costs by 30%.
- Developed a comprehensive disaster recovery and business continuity plan that reduced system downtime and mitigated risk exposure.
- Implemented a new IT service management platform that improved ticket resolution time by 40% and increased user satisfaction ratings.

Skills and Technologies:

- Proficient in AWS cloud services, Microsoft Active Directory, SQL database management, and Cisco network systems.
- Strong project management skills, certified in ITIL.
- Expertise in cybersecurity frameworks and compliance regulations such as ISO 27001 and GDPR.

This role demanded a strategic leader who can manage complex IT environments and drive significant technology initiatives that align with

- Job Control Language (JCL)
- Database Administration
- Apache Tomcat
- Information Systems Management
- PeopleSoft Administrator
- PeopleSoft Technical Consultant
- Virtual and Cloud Technologies
- PeopleSoft Analyst

Amazon's high standards of innovation and customer satisfaction.

Sr. Director, Call Center Operations, 05/2015 - 10/2021

Change Healthcare - Nashville, TN

As the Senior Director of Call Center Operations, supporting medical providers, hospitals, and insurance carriers as clients, my primary responsibilities included: client management, development & implementing KPI improvement plans, and overseeing the daily site operations including direct supervision of (5) Operations Managers, (3) Business Analysts (6)C/S Supervisors, (6)Team Leads, (47)Customer Support Agents, (1)Trainer, (2)Quality Assurance Spec And (2)Workforce Mgmt Analyst

Successes Include:
