PROFILE

Solution Architect with 20+ years of experience designing and delivering enterprise solutions across finance, insurance, and public sectors. Skilled in software architecture, agile delivery, and cloud platforms. Adept at translating strategy into scalable, cost-effective IT systems.

SKILLS

- Architecture: Enterprise & Solution Architecture, Agile, DevOps, UML, ITIL, C4 Model, OpenCA, TOGAF, BPMN, Event-Driven Architecture, Domain-Driven Design, Data Modeling, ETL, IAM, CI/CD, IAC
 - Tech: Java, Spring Boot, React, JavaScript, MongoDB, ELK, Git, Jakarta EE, Kotlin, Camel, Kafka, Quarkus, Temporal, OAuth 2.0, OIDC, SOAP, SAML 2.0, PostgreSQL, ETL, AI, Swift
 - Cloud & APIs: Microsoft Azure, AWS, Kubernetes, REST APIs, Docker, Microservices, CRM Dynamics
 - Strategy: Strategic Planning, Consulting, Change & Risk Management, Team Leadership
 - Languages: English · Spanish · Norwegian
-

EMPLOYMENT

IntellectEU Belgium | Solution Architect | Remote | 2024 – 2025

- Design and improve products, ensuring they meet functional and non-functional requirements.
- Align technical solutions with business needs with close collaboration with stakeholders and teams.
- Own technical decisions and support pre-sales, guiding scope, architecture, and client proposals.

Unisys Spain | Solution Architect | Remote | 2024 – 2025

- Designed and implemented IT solutions for the European Union Intellectual Property Office (EUIPO) in an European Cooperation Program (ECP), optimizing processes.
- Led a team to achieve program objectives, translating company goals into actionable projects.
- Collaborated with the hiring team to assess technical assessments and make informed decisions, ensuring candidates met the company's requirements and fit within the team

Tietoevry Norway | Lead Architect | 2017 – 2024

- Defined technical vision, balanced innovation with cost control, cooperate with stakeholders, delivery managers, and other teams to translate them into technical solutions.
- Established architecture best practices across projects and ensure that the architectural vision aligns with business objectives and user needs.

Apotek 1 Norway | Software Engineer | 2015 – 2017

- Developed web applications, improved user experience and documentation.

Color Line Norway | Software Engineer | 2013 – 2015

- Built backend for CMS and booking interface. Enhanced e-commerce platform.

GlobalConnect & OKTAN Norway | Software Engineer | 2007 – 2013

- Created prototypes to visualize client needs and supported user requirement gathering.
- Developed front-end using JavaScript and CSS, involved in the UX process from start to finish.
- Collaborated with teams to explain product rationale and design approach.

PROJECTS

Swift SIL/IPLA Replacement - Financial Institutions Worldwide (Feb 2025 - Present)

Solution Architect driving SIL/IPLA modernization across different financial institutions: leading a large Spanish SIL replacement (CAT-IM POC, Common Module, RMV flows, full connector/workflow/transform migration and upgrades); delivering a Mexican ISO20022 & Swift API platform (SOAP for Siglo, SFTP inbound, proprietary↔MX, file/folder design, SOAP errors); and authoring the Cayman IPLA→CAT-IM ODD (reusing Swift Translator/libs, plus resource planning, access, and formal effort estimates).

Backoffice V4 - EUIPO (Jan 2024 - Jan 2025)

This project involved designing and supporting a new architecture for the BackOffice system, including implementing new functionalities using Jakarta EE, Keycloak for authentication, and Elastic Search. The role also included providing technical guidance to the development team.

TFFAuto - Finans Norge (Feb 2023 - Dec 2023)

For this project, Daniel was responsible for designing, creating, and maintaining the overall architecture and documentation for TFFAuto, an administrative system used by Norwegian motor insurers to handle vehicle insurance cases.

Digital Life Certificate - Finans Norge (Mar 2022 - Jan 2023)

This project created a new digital solution for Norwegian social benefit recipients to confirm their living status, replacing a manual process. As the lead architect, Daniel supported and mentored the development team and collaborated with customers and other architects on the solution.

Partner Portal - Söderberg & Partners (Jun 2021 - Jun 2022)

The goal of this project was to create a portal for business partners to authenticate, perform credit checks, and create contracts. Daniel designed scalable architectures, integrated REST APIs and Azure services, and led cross-functional teams while ensuring GDPR compliance.

Klimadata - Finans Norge (Oct 2021 - Feb 2022)

This project delivered a solution for insurance companies to securely upload data in compliance with legal requirements. Daniel reviewed requirements, created a High-Level Solution Architecture document, and worked with the development team within an agile framework.

Handelsbanken - IPS Calculator (Sep 2019 - Sep 2020)

For Handelsbanken, Daniel was responsible for the technical solution and integration of an Individual Pension Savings (IPS) calculator. The role included creating the High-Level Solution Architecture Document and technical specifications, and supporting the team in adapting the solution to business needs.

WAD/WCAG - Tietoevry Banking (Feb 2020 - May 2020)

Daniel served as the lead architect to upgrade the online banking system to comply with WCAG (Web Content Accessibility Guidelines). The project involved guiding the analysis of requirements, evaluating technologies, and leading the project team.

Anti-money Laundering - Tietoevry Banking (Nov 2018 - Oct 2019)

As a technical architect and developer, Daniel created a new Anti-Money Laundering (AML) module. This system works with other banking systems to prevent customers from depositing unlimited amounts of cash at ATMs.

Rental guarantee - Söderberg & Partners (Oct 2018 - Jul 2019)

This project developed a mobile-first website for a rental guarantee service, which offers an alternative to a traditional deposit. Daniel worked as a developer and later as an architect on the project, focusing on integrations and cloud architecture in Azure.

Norwegian Labour and Welfare Administration - Contribution solution (Jul 2017 - Feb 2018)

Daniel worked as a developer on a solution for processing cases related to child support and other grants. His responsibilities included solution description, estimation, construction, and testing.

Tietoevry AI Service Desk (Apr 2017 - Sep 2017)

For this project, Daniel was a developer on a "Proof of Concept" for a cognitive customer service center. The system used IBM's Watson technology to enable customer-system chat with natural language processing.

Online Pharmacy (Jan 2016 - Oct 2016)

Daniel was responsible for the development of an application that handled online prescriptions. He participated in all phases of the development process, including integrations with prescription providers.

Backend upgrade - Color Line (Jun 2013 - Dec 2013)

This project involved upgrading the backend stack and Content Management System for Color Line's new booking system. Daniel was responsible for the update and made several changes to the architecture and infrastructure.

Fiberweb - GlobalConnect (Jan 2013 - May 2013)

Daniel was part of the Java team that developed the Fiberweb portal. This system provides GlobalConnect customers with an overview of their subscriptions and allows them to order broadband products.

EDUCATION

- MSc in Innovation – University of Oslo (2008–2010)
- Technopreneurship – National University of Singapore (2010)
- Computer Science Engineer – Universidad Rafael Belloso Chacín (2002–2006)
- Architect Program – Tietoevry, Oslo (2017)

CERTIFICATIONS

- Security Awareness Training (Unisys, 2024)
- Data Privacy Training (Unisys, 2024)
- Trade Compliance (Unisys, 2024)
- Master Certified Solution Architect (The Open Group, 2023)
- Level 2 Architect - Experience Profile (The Open Group, 2022)
- Microsoft Certified: Azure Data Fundamentals (Microsoft, 2022)
- Level 2 Solution Architect - Experience Profile (The Open Group, 2022)
