Professional Summary

Results-oriented .NET Developer with 4+ years of experience designing, developing, and deploying secure, high-performance web and API solutions in financial and IT service domains. Proficient in building enterprise applications using ASP.NET Core, MVC, C#, and RESTful APIs. Skilled in SQL Server, Entity Framework, and frontend tools like Razor View Engine, Bootstrap, and jQuery. Proficient in deploying services on Microsoft Azure using ARM templates and monitoring via Azure Application Insights. Strong knowledge of secure authentication protocols OAuth 2.0, Identity Server and regulatory standards FINRA, SOX, SEC. Experienced in implementing CI/CD pipelines using Azure DevOps and performing automated testing with xUnit, NUnit, and Postman. Experienced in translating complex business requirements into scalable solutions through Agile ceremonies, code reviews, and rapid iteration.

Skills

Programming Languages: C#, JavaScript, LINQ, SQL.

Frontend Technologies: Bootstrap, jQuery, Razor View Engine.

Frameworks & Platforms: ASP.NET MVC, .NET Core, ASP.NET Web API, Razor Pages, Identity Server.

APIs & Integration: RESTful APIs, ASP.NET Web API, Bloomberg API, Morningstar API, Third-party APIs for CRM and Billing Systems.

Database: SQL Server, Entity Framework, Stored Procedures, Optimized SQL Queries.

DevOps & CI/CD: Azure DevOps, Git, CI/CD Pipelines, Build Monitoring, Docker, Kubernetes, Deployment Automation.

Testing Tools: NUnit, xUnit, Postman, Swagger, Test Automation.

Security & Compliance: Identity Server, OAuth 2.0, Role-Based Access Control, Secure Coding Practices, Audit Logging, FINRA, SOX, SEC.

Experience

.NET Developer | Freddie Mac, USA

Sep 2024 - Present

- Developed scalable web-based portfolio management platform using ASP.NET MVC and Entity Framework, automating risk analysis and recommendation workflows.
- Integrated RESTful APIs for real-time financial data from Bloomberg and internal systems, improving analysis accuracy by 40%.
- Created responsive dashboards using Razor View Engine, jQuery, and Bootstrap tailored for financial advisors.
- Optimized stored procedures in SQL Server, enhancing portfolio report generation speeds by 30%.
- Implemented CI/CD pipelines via Azure DevOps, reducing manual deployment efforts by 50%.
- Utilized .NET Core Identity and secure token-based APIs to safeguard sensitive financial data in alignment with FINRA and SOX regulations.
- Collaborated with cross-functional teams including Business Analysts and QA to translate business logic into technical specifications and unit test coverage using NUnit and Postman for API validation.
- Applied RBAC and encrypted data access techniques to enforce security policies across user and system levels.
- Deployed services on Azure using ARM templates and monitored performance using Azure Application Insights.

.NET Developer | Hartford Financial Services Group, USA

Aug 2023 to Aug 2024

- Designed secure modules in ASP.NET MVC/C# for Wealth Management Portal enabling high-net-worth clients to manage financial portfolios.
- Developed RESTful APIs integrating third-party data providers like Morningstar and Bloomberg.
- Enforced secure data practices using Identity Server, OAuth 2.0, and RBAC, aligned with FINRA and SEC standards.
- Enhanced query performance in SQL Server using Entity Framework optimization, improving transactional processing by 30%.
- Participated in Agile sprints with DevOps integration, version control via Git, and code reviews via Azure DevOps.
- Leveraged Azure DevOps for build pipelines and Git-based source control to streamline deployments and issue tracking.

Jr .NET Developer | Aplus Datalytics, India

Mar 2020 to Jun 2022

- Developed and maintained scalable backend components using ASP.NET MVC, C#, and .NET Core, improving performance by 30% over the legacy system.
- Designed and integrated RESTful APIs using Web API for seamless communication with third-party billing and CRM systems.
- Utilized Entity Framework for data access and implemented LINQ-based queries to streamline database operations across SQL Server.
- Implemented front-end features using Razor Pages, JavaScript, and Bootstrap to deliver a responsive and user-friendly UI.
- Collaborated with QA and DevOps teams to automate CI/CD pipelines using Azure DevOps, performed unit testing with xUnit, and monitored builds and deployments in staging and production environments.
- Contributed to Agile ceremonies and maintained documentation for RESTful services and API contracts using Swagger.

Education

Masters: Computer Science | University of Central Missouri, Warrensburg, Missouri

Dec 2023

Certifications

AWS Certified Developer – Associate, 2024
