Software Architect – .NET | C# | AI/ML | Azure | Cloud

Senior Software Architect with 16+ years of experience in designing and delivering high-performance, cloud-native, and AI-driven solutions for trading systems, SaaS platforms, and enterprise applications. Adept at architecting microservices using .NET Core and deploying secure, scalable systems on Microsoft Azure.

Core Competencies & Architectural Expertise

- ✓ .NET & C# Development: ASP.NET, .NET Core, MVC, Web API
 - ✓ AI/ML Integration: TensorFlow, OpenAI, Hugging Face, LangChain
 - ✓ Cloud Architecture: Azure Functions, Cosmos DB, Redis, Load Balancer, Kubernetes
 - ✓ Microservices & APIs: REST, gRPC, Web API, WCF
 - ✓ DevOps & CI/CD: Docker, Kubernetes, Azure DevOps, GitHub Actions
 - ✓ Security & Identity Management: OAuth, SAML, Active Directory, Entra ID
 - ✓ Data & Performance: SQL Server, MongoDB, Cosmos DB, caching, distributed systems
 - ✓ Monitoring & Observability: New Relic, Grafana, Application Insights
 - ✓ Scalability & Optimization: Load balancing, distributed computing, performance tuning
 - ✓ Agile Delivery: SCRUM, Kanban methodologies
-

Technical Skills

- Languages: C#, Python
- Web: ASP.NET, ASP.NET MVC, .NET Core, Angular, JavaScript
- Databases: SQL Server, Cosmos DB, MongoDB, PostgreSQL
- AI/ML Frameworks: TensorFlow, PyTorch, Keras, scikit-learn, NumPy, pandas, Matplotlib
- AI/ML Tools: OpenAI, Hugging Face, LangChain
- Cloud & DevOps: Azure, Kubernetes, Docker, CI/CD pipelines
- Version Control: Git, TFS, SVN
- Monitoring Tools: Grafana, New Relic, Application Insights

Education

🎓 M.S. (Software Systems)

📜 Professional Certificate Course in Generative AI and Machine Learning

Professional Experience

Consultant | BNP Paribas CIB | April 2024– Current

Project: Next Gen Trade Settlement System | NJ, USA

Skills: .NET Core, Kafka, SQL Server.

Technical Accomplishments

- Developed and maintained software solutions for the trade clearance department, enhancing operational efficiency.
- Integrated Kafka message processing with .Net Core, leveraging microservices architecture for scalable applications.
- Streamlining Trade processing for trade settlements and improving transaction accuracy.

Consultant | Mobirey LLC| Feb 2024– April 2024

Project: Alpha Pulse: AI-Powered Trading Bot by Mobirey | NJ, USA

Skills: .NET Core, LangChain, OpenAI API, Python, gRPC, ChromaDB, LLMs, Natural Language Processing (NLP), Sentiment Analysis, Technical Analysis, SEC EDGAR API, GenAI.

Technical Accomplishments

- Implemented sentiment analysis on social media to assess market sentiment real time.
- Analyzed SEC EDGAR filings (10-K, 10-Q) using NLP frameworks like LangChain to extract key financial insights.
- Applied technical analysis techniques on live market data for trend and pattern detection.
- Built a central AI model to integrate sentiment, fundamental, and technical signals for stock prediction.
- Developed a GenAI layer to generate concise natural language summaries of complex financial data.
- Designed a decision engine with built-in risk management logic to trigger automated buy/sell actions.

Senior Software Architect | Ansira | Dec 2018– Feb 2025

Project: Instant Impact | Chicago, IL

Skills: C#, ASP. Net, Angular, .NET core, SQL Server, MongoDB, Azure Function, Azure Redis, Azure Blob storage, AKS, New Relic, Elastic search.

Technical Accomplishments

- Architected cloud-native SaaS applications using Azure and .NET technologies, ensuring high availability and scalability.
- Implemented a GenAI-powered product recommendation engine that analyzes user shopping cart data and generates personalized upsell/cross-sell suggestions using OpenAI's embedding and completion models.
- Developed a solution to extract and identify brand mentions from uploaded PDFs (e.g., contracts, campaign briefs) using a combination of LangChain, OpenAI, and Azure Blob Storage, enabling smart tagging and campaign alignment.
- Migrated legacy applications to a cloud-based microservices architecture, reducing operational costs and improving performance.
- Integrated Azure Blob Storage for secure digital asset management, enhancing data security and compliance.
- Implemented RESTful APIs for seamless integration with marketing platforms and third-party services.
- Optimized SQL Server performance, reducing query execution time by 40% through indexing strategies and query tuning.
- Integrated Grafana & Application Insights for real-time monitoring, reducing system downtime by 40%.

Associate Technical Architect | BenefitAlign Tech Pvt Ltd |Mar 2017– Dec 2018

Project: BrokerEngage | NM, USA

Skills: C#, ASP.MVC, Angular, jQuery, JavaScript, SQL Server, Cosmos DB, Azure Cosmos, Docker.

Technical Accomplishments

- Developed ASP.NET Core microservices for broker interactions.
- Leveraged Azure API Management to monitor, secure, and scale API traffic effectively.
- Designed SQL Server stored procedures to optimize data retrieval and processing.
- Implemented API versioning and authentication using JWT and OAuth 2.0.
- Built an ASP.NET MVC-based workflow system, streamlining business operations.
- Implemented CI/CD pipelines with Azure DevOps and GitHub Actions.

Lead Member of Technical Staff | Kaseya software Pvt. Ltd | July 2014– Mar 2017

Project: Virtual System Administrator | NV, USA

Skills: C#, ASP.MVC, ASP.Net, SQL Server, Python, Pandas, Cosmos DB, NHibernate, Azure APIM, NUNit.

Technical Accomplishments

- Developed .NET Core microservices to enhance remote IT system monitoring, improving reliability and scalability.
- Built a REST API gateway to unify communication across multiple services, ensuring efficient API traffic management.
- Implemented caching strategies, improving API response times by 35%, enhancing application performance.
- Implemented caching strategies, improving API response times by 35%, enhancing application performance.

Technical Leader |Replicon software (India) Pvt. Ltd | July 2011 - Apr 2014

Project: Web Timesheet Tracking Software | Calgary, Canada

Skills: C#, ASP.MVC, ASP.Net, SQL Server, Postgres, Entity Framework, NUNit.

Technical Accomplishments

- Developed a SaaS-based timesheet tracking system using ASP.NET and Angular.
- Optimized API responses with caching strategies, improving performance by 35%.
- Designed Swagger API documentation, streamlining integration with 3rd-party clients.
- Built an ASP.NET MVC-based workflow system, streamlining business operations.
- Developed SQL Server queries and indexing strategies, optimizing data retrieval.
- Designed microservices for streaming, user authentication, and playlist management.

Technical Leader | Symphony Services Corp Pvt. Ltd| June 2007 – July 2011

Project: Ancestry.com, Subex | UT, USA

Skills: C#, ASP.Net, SQL Server, SSRS, Ektron, JavaScript, CSS.

Technical Accomplishments

- Developed a genealogy research platform using ASP.NET MVC and SQL Server.
- Developed SQL Server queries and indexing strategies, optimizing data retrieval.
- Developed an enterprise reporting platform using ASP.NET and SQL Server.
- Optimized SQL Server performance, reducing query execution time by 40%.
