OVERVIEW

I'm a Senior Data Analyst with over 5 years of experience bridging business needs with technical execution across healthcare, finance, and enterprise data. I build models, dashboards, and automations that drive decisions—not just reports. I've worked with everything from SQL, Python, and SAS to Power BI, APIs, and cloud platforms. Whether aligning to HIPAA or optimizing cash flow models, I turn raw data into clear, immediate actions.

SKILLS

- **Languages & Scripting:** Python, R, SQL (PostgreSQL, MySQL, SQL Server), DAX, VBA
- **Data Manipulation & Modeling:** Pandas, NumPy, dplyr, data wrangling, data cleaning, ETL pipelines, A/B testing, regression
- **Statistical & Clinical Tools:** SAS (PROC SQL, data step, macros), caret, Scikit-learn, tidyverse, ggplot2, inferential statistics
- **Visualization & Dashboards:** Power BI, Tableau, Qlik Sense, QlikView, Looker, Google Data Studio, Excel (Power Query, PivotTables, advanced formulas), Matplotlib
- **Cloud & Platforms:** AWS (S3, Athena), GCP (BigQuery, Cloud Functions), Azure Synapse, Databricks, Alteryx, dbt, Airflow
- **Automation & Workflow:** Python scripting, Shell scripting (cron), SAS macros, R scripting, API automation, ETL tools
- **Database Technologies:** SQL Server, PostgreSQL, MySQL, Oracle, Redshift, BigQuery, Snowflake
- **Governance & Compliance:** HIPAA, SOX, HEDIS, CMS, GDPR, data governance, internal control documentation
- **Version Control & DevOps:** Git (GitHub, GitLab), CI/CD pipelines, Shell scripting, Bash, Jenkins, GitLab CI
- **Soft Skills:** Analytical thinking, cross-functional communication, execution under pressure, prioritization, end-to-end ownership

WORK EXPERIENCE

Root Insurance | *Senior Data Analyst, Columbus, Ohio, USA*

Jul 2024 - Present

- Constructed **Python, SAS** models to project loss ratios, **boosting** reserve accuracy, underwriting quality across multiple risk categories.
- Designed **SQL pipelines** for ingesting claims and customer data from **AWS Redshift**, enhancing actuarial visibility across verticals.
- Engineered real-time dashboards in Power BI with **DAX, SAS**, improved operational oversight of premiums, losses, and **ROE** metrics.
- Computerized **ETL** processes with **Airflow**, cutting monthly financial reporting lag, driving faster P&L alignment for FP&A teams.
- Conducted **SOX-compliant** audit trails on data workflows using **Git** and **Python**, ensuring financial integrity and version tracking.
- Led A/B testing using **R** and **SAS** to evaluate pricing changes, uncovering 18% revenue uplift from adjusted quote funnel conversion.
- Presented cross-functional insights with **Looker**, improved stakeholder alignment across underwriting, marketing, and finance leads.

Abercrombie & Fitch | *Data Analyst, New Albany, Ohio, USA*

Jan 2023 - Jun 2024

- Built **segmentation models** in **R** and **Scikit-learn** to cluster shoppers by behavior, improved campaign targeting and conversion rates.
- Developed advanced **SQL queries** and **VBA scripts** for inventory forecasting, reduced out-of-stock scenarios across retail channels.
- Integrated **Power BI** dashboards with **Azure Synapse** to track sales, margins, and markdowns across 300+ global stores.
- Automated sales reporting via **ETL pipelines** using **dbt**, cutting refresh time by **45%** and driving better promotional timing.
- Used **DAX** and **Power Query** to analyze foot traffic trends, increased visual merchandising ROI through location-specific insights.
- Deployed **Python scripts** for price elasticity analysis using promo history APIs, unlocking new bundle pricing strategies.
- Created executive-ready visuals in **Tableau** and **Excel**, aligning leadership on margin improvement plans and shopper retention.

Electronic Arts | *Data Analyst, Telangana, India*

May 2022 - Dec 2022

- Built **predictive models** in **Python, Scikit-learn** to anticipate player churn, supporting retention campaigns in key gaming franchises.
- Queried player session data from **BigQuery** using advanced **SQL**, streamlining game design decisions with playtime segmentation.
- Orchestrated KPI dashboards across **Tableau, Google Data Studio**, enhancing DAU/MAU visibility, reduced reporting time by 40%.
- Systematized feature usage reports via **Airflow** and **R scripting**, reduced data latency, accelerating product team feedback loops.
- Applied **DAX logic** in **Power BI** to assess monetization funnels, influencing loot box redesign and microtransaction placement.
- Styled embedded **Looker** reports using **Sass** and presented insights to UX teams for interface optimization across console vs. mobile.
- Conducted A/B tests in **SAS** to evaluate difficulty tuning on user retention, improved level progression success by 22%.

United Imaging Healthcare | *Programmer Analyst, Telangana, India*

Mar 2021 - Apr 2022

- Analyzed **EHR** and claims datasets using **SAS, SQL Server**, generating insights on provider utilization and population health trends.
- Devised risk adjustment models in **R** and **caret**, enhancing prediction of comorbidity **scores by 28%** in chronic care cohorts.
- Formulated clinical KPI dashboards using **Power BI, DAX**, and **Sass** to **support data-driven decisions** on care quality by department.
- Automated compliance workflows via **cron, Python**, and **Azure** tools, reduced manual audit prep time by **38%** for HIPAA reviews.
- Extracted **ICD-10** and **CPT** codes using **Python** and NLP libraries, improved disease tagging accuracy for claims adjudication.
- Scheduled ETL jobs in **Airflow**, documented pipelines for **SOX** and **HIPAA** control reporting, aligning with governance frameworks.
- Crafted data visualizations in **ggplot2** to monitor CMS/HEDIS metrics, resulting in a 35% increase in stakeholder engagement.

CERTIFICATIONS

- **Microsoft Certified:** Power BI Data Analyst Associate
- **Microsoft Certified:** Azure Fundamentals
- **AWS Certified:** Cloud Practitioner

EDUCATION

Wright State University | *Masters, Computer Science*

Dayton, Ohio **Jan 2023 - Dec 2024**
