

Madison Fiehrer

Denver, CO 80205 • 724-612-0025 • madisonfiehrer@outlook.com

Professional Summary

Data Engineering Manager with proven success leading cross-functional teams to design, implement, and govern large-scale data solutions. Skilled in optimizing ETL pipelines, leveraging SQL and cloud platforms (Azure), and delivering data-driven insights through Power BI and Tableau. Adept at aligning technical solutions with business needs, strengthening governance and compliance practices, and mentoring high-performing teams to improve efficiency and scalability. Passionate about driving continuous improvement, data integrity, and innovation through advanced analytics, automation, and emerging technologies.

Work Experience

Manager – Audit Data Analytics & Emerging Methods

BDO USA – Denver, CO | 06/2023 – Present

- Lead and mentor a global team of ETL specialists and data engineers, delivering sustainable data solutions aligned with enterprise standards and governance requirements.
- Partner with stakeholders and architects to design scalable data pipelines, ensuring accuracy, timeliness, and compliance with audit/regulatory standards.
- Strengthened governance by standardizing data integration processes, documentation, and quality controls, improving audit-readiness and transparency.
- Collaborated with data scientists to explore automation, predictive analytics, and advanced technologies to increase value of firm-wide data assets.
- Drove continuous process improvement by optimizing data extraction pipelines and reducing cycle times, increasing efficiency for cross-border engagements.

Data Extraction Engineer

BDO USA – Denver, CO | 01/2021 – 06/2023

- Engineered and deployed automated ETL workflows using SQL, Alteryx, and Azure Data Factory to streamline extraction across diverse ERP platforms (SAP, Oracle, NetSuite, JD Edwards).
- Developed and maintained interactive dashboards in Power BI to enable leadership and auditors to visualize complex datasets and uncover key business insights.
- Enhanced compliance by embedding audit controls and documentation into data workflows, ensuring traceability and accuracy of extracted data.
- Partnered with business analysts, project managers, and IT teams to translate business requirements into technical solutions.

Industrial Engineer

Honda of America Mfg. – Marysville, OH | 05/2019 – 12/2020

- Designed and implemented advanced simulation models to optimize production efficiency and reduce operational costs, achieving \$26.5M in cost avoidance.
- Applied statistical process control and data analysis to identify process bottlenecks, reduce downtime, and improve decision-making.
- Introduced governance and standardization practices for monitoring KPIs, ensuring accuracy and sustainability of reporting methods.

Education

Bachelor of Science – Industrial & Systems Engineering

Ohio University – Athens, OH | 05/2019

Skills

Data Engineering & ETL: SQL, Alteryx, Azure Data Factory, Databricks, ERP integrations (SAP, Oracle, NetSuite, JD Edwards)

Visualization & Analytics: Power BI, Tableau, DAX Studio

Programming & Automation: Python, data modeling, workflow automation

Cloud Platforms: Microsoft Azure

Other Tools: Simul8, Simio, AutoMOD, AutoCAD

Core Strengths: Data governance, compliance alignment, stakeholder engagement, team leadership, continuous improvement, technical documentation

Professional Interests

Data Analytics • ETL • Automation • Data Governance • Cloud Data Platforms • AI/ML Applications • Continuous Improvement • Business Intelligence
